(Indian Standards Institution)

New Delhi, the 1st July, 1969

B.O. 2397.—In pursuance of sub-regulations (2) and (3) of regulation 3 of the Indian Standards Institution (Certification Marks) Regulations, 1955, as amended from time to time, the Indian Standards Institution hereby notifies that the Indian Standard (s) particulars of which are mentioned in the Schedule given hereafter, have been established during the period 16 to 30 June 1969 :

THE SCHEDULE

Sl. No.	No. and Title of the Indian Standards Established	No. & Title of the Indian Stand- ard if any, superseded by the new Indian Standard	Brief Particulars
(1)	(2)	(3)	(4)
1.	IS : 28-1969 Specification for phosphor bronze ingots and castings (second revision).	IS : 28-1958 Specification for phosphor bronze ingots and castings (revised).	This standard covers the requirements of two grades of phosphor bronze ingots and castings designated as PCuSn7 and PCuSn10. (Price Rs. 4.00)
2.	IS : 271-1969 Grading of white, <i>tossa</i> and <i>daissee</i> uncut Indian jute (first revision).	IS : 271-1950 Grading of raw jute kutch assortments.	This standard covers the grading of white <i>TOSSA</i> and <i>DAISEE</i> jute from which the roots have not been cut. (Price Rs. 3.50).
3.	*IS : 1184-1968 Specification for maize starch for use in the cotton textile industry (first revision).	*IS : 1184-1957 Specification for maize starch for use in the cotton textile industry.	This standard prescribes requirements of maize starch as manufactured by the sulphitation process for use in the cotton textile industry as a sizing and finishing material (price Rs. 6.00).
4.	*IS : 1703-1968 Specification for ball valves (horizontal plunger type) including floats for water supply purposes (first revision).	*IS : 1703-1962 Specification for ball valves (horizontal-plunger type) including floats for water supply purposes.	This standard lays down requirement regarding sizes, material manufacture and workmanship, weight and testing of ball valves (horizontal plunger type) including floats for water supply purposes (Price Rs. 6.00).

*For purposes of the Indian Standards Institution Certification Marking Scheme, IS : 1184-1968 and IS : 1703-1968 shall come into force with effect from 1 July 1969 while IS : 2474-1968 will effect from 1 August 1969.

(1)	(2)	(3)	(4)
5.	IS : 2448 (Part II)-1968 Specification for adhesive insulating tapes for electrical purposes. [*]	—	This standard covers adhesive insulating tapes for electrical purposes with pvc substrates to be used for holding, binding and insulating in electrical applications (Price Rs. 6.50).
6.	Part II tapes with PVC substrates. 6. *IS : 2474-1968 Specification for closures for drums.	—	This standard prescribes the requirements for closures for drums. The following types of closures are covered : (a) 75-and 100-mm separate neck with inner plug and capseal; (b) 32-and 44-mm tapered spout with inner plug and capseal; (c) Integral neck with plug and capseal; (d) Lever lid, tight fit; and (e) Screw-on type brass bung and fauce (Price Rs. 4.00).
7.	IS : 2591-1969 Specification for hot rolled bars for threaded components (first revision).	IS : 2591-1964 Specification for hot rolled bars for threaded components.	This standard prescribes the sizes and tolerances of hot rolled bars for the manufacture of threaded components (Price Rs. 2.00).
8.	IS : 4808-1968 Specification for pyrethrum emulsifiable concentrates.	—	This standard prescribes the requirements and the methods of test for pyrethrum emulsifiable concentrates containing various percentages of total pyrethrins (Price Rs. 6.50).
9.	IS : 4831-1968 Recommendation on units and symbols for refrigeration.	—	This standard recommends units and symbols to be used in refrigeration (Price Rs. 5.50).
10.	IS : 4878-1968 Byelaws for construction of cinema buildings.	—	This code deals with the standard provisions and requirements for safe and stable design, desirable acoustical and visibility conditions, methods of construction, and sufficiency of materials in structures and regulations for maintenance of equipment use and occupancy of places exhibiting cinematographic films (Price Rs. 12.50).
11.	IS : 4905-1968 Methods for random sampling.	—	This standard lays down general procedures for the selection of items from a lot on an objective basis by using random sampling techniques. It also describes the methods of calculation of simple estimates like mean and proportion of defective from the sample data (Price Rs. 9.00).
12.	4920-1968 Glossary of terms applicable to roof coverings.	—	This standard deals with terms commonly used for various processes of roof coverings and are covered in seven sections (Price Rs. 7.00).
13.	IS : 4928-1968 Specification for quick closing clack-valve for centrifugal pump outlet.	—	This standard lays down the requirements regarding material, shape and dimensions, construction and tests for quick closing, clack-valve for centrifugal pump outlet (Price Rs. 3.50).
14.	IS : 4949-1968 Specification for 2 Amp switches for domestic and similar purposes	—	This standard specifies requirements for manually operated 2-Amp single pole one-way switches, such as tumbler, push button and other types for domestic and similar purposes, for incorporation in cords, lamp-holders or for mounting on or in appliances or accessories where tappings cannot be taken, suitable for use on ac or dc circuits at rated voltages not exceeding 250 V (Price Rs. 6.50).
15.	IS : 4965-1968 Specification for inter-lock-knitted cotton vests	(i) IS : 2755-1964 Specification for plain and inter-lock knitted cotton vests, and (ii) IS : 2556-1966 Specification for plain knitted sleeveless cotton vests.	This standard prescribes the requirements of grey, scoured or bleached interlock-knitted cotton vests. (Price Rs. 5.00).

*For purposes of the Indian Standards Institution Certification Marking Scheme, IS 1184-1968 and IS 1703-1968 shall come into force with effect from 1 July 1969 while IS 2474-1968 with effect from 1 August 1969.

(1)	(2)	(3)	(4)
16.	IS : 4986-1968 Code of practice for installation of raingauge (non-recording type) and measurement of rain.	—	This standard covers the details regarding the installation of raingauge (non-recording type), method of measurement and recording of precipitation (Price Rs. 5.50).
17.	IS : 4987-1968 Recommendations for establishing network of raingauge stations.	—	This standard lays down recommendation for distribution, density and representativeness of network of raingauge stations for rainfall study (Price Rs. 3.50).
18.	IS : 4994-1968 Specification for forceps, redressing, Walsham's, right, left and straightening.	—	This standard covers the requirements of Walsham's redressing forceps, right, left and straightening. (Price Rs. 2.50)
19.	IS : 5019-1968 Specification for lubricating plugs.	—	This standard specifies the requirement for lubricating plugs (price Rs. 2.50).
20.	IS : 5053-1969 Dimensions for rough copper and copper alloy rods for fasteners.	—	This standard specifies dimensions for copper and copper alloy rods for fasteners (both threaded and nonthreaded) (Price Rs. 1.50).
21.	IS : 5063-1969 Specification for TUR husk.	—	This standard prescribes the requirements and the methods of sampling and test for TUR husk meant for livestock feeding (Price Rs. 1.50).

These Indian Standards are available for sale with the Indian Standards Institution, Manak Bhavan, 9, Bahadur Shah Zafar Marg, New Delhi-1 and also its branch offices at (i) 534 Sardar Vallabhbhai Patel Road, Bombay-7 (ii) 5 Chowinghee Approach Road Calcutta-13 (iii) 54 General Patters Road, Madras-2 (iv) 117/418 B, Sarvodaya Nagar, Kanpur and (v) 5-9-201/2 Chirag Ali Lane, Hyderabad-1.

New Delhi, the 21st September 1971

S.O. 2401.—In pursuance of regulation 4 of the Indian Standards Institution (Certification Marks) Regulations, 1955, the Indian Standards Institution hereby notifies that amendment(s) to the Indian Standard(s) given in the schedule hereto annexed have been issued under the powers conferred by the sub-regulation (1) of Regulation 3 of the said Regulations.

THE SCHEDULE

Sl. No. and title of the Indian Standard amended (1)	No. and Date of Gazette Notification in which the establishment of the Indian Standard was notified (2)	No. and Date of the Amendment (3)	Brief particulars of the Amendment (4)	Date from which the amendment shall have effect (6)
1. IS : 293—1967 Specification for seaworthy packaging of cotton cloth and yarn (<i>second revision</i>).	S.O. 1719 dated 11 May, 1968	No. 1 Oct., 1970	This amendment is being issued to make certain minor modifications regarding packing procedure in order to completely bring it in line with the Central Government Notification No. SRO 1317; as pointed out by the Cotton Textiles Export Promotion Council, Bombay, and introduce bag packing of cotton yarn on cones.	1 October, 1970
2. IS : 555—1967 Specification for electric table type fans and regulators (<i>Second Revision</i>)	S.O. 1720 dated 18 May, 1968	No. 2 September, 1970	(i) Clauses 5·1, 15·2·1·2 and 15·9·3 have been amended (ii) Clause 6·4 and table 3 have been substituted by new ones.	1 September, 1970
3. IS : 562—1962 Specification for BHC water dispersible powder concentrates. (<i>Second Revision</i>)	S.O. 3593 dated 1 December 1962	No. 4 June, 1970	Clause 5·1·1 has been amended	1 June, 1970
4. IS : 692—1965 Specification for paper insulated lead-sheathed cables for electricity supply (<i>Revised</i>)	S.O. 1253 dated 24 April, 1965	*No. 4 July, 1970	(i) Requirements given in Table 9 for 1100 volts five core cables have been specified separately in two tables 9A and 9B covering cables with full and reduced neutral respectively. (ii) Maximum drainage allowed, under dairnage test has been relaxed for all types of cables. (iii) Requirements in respect of Armouring wire and tape given in the specification have been deleted and a reference made to IS : 3975—1967 and (iv) Other editorial changes.	1 July 1970
5. IS : 885—1967 Common names for pesticides. (<i>First Revision</i>)	S.O. 3152 dated 14 September 1968	No. 1 October 1970	(Page 27, Table 1, footnote with an asterisk (*) mark—Substitute 'G.R. Geigy SA; Basle, Switzerland' for* M/s. Ramfry & Son, Calcutta.'	1 October 1970
6. IS : 1169—1967 Specification for electric pedestal type fans and regulators. (<i>First Revision</i>)	S.O. 1720 dated 18 May, 1968	No. 1 September, 1970	(i) Clauses 5·1 and 16·9·3 have been amended. (ii) clauses 6·4 and 16·2·1·2 have been substituted by new ones.	1 September, 1970
7. IS : 1170—1967 Specification for ferrochromium (<i>First Revision</i>)	S.O. 287 dated 20 January, 1968	No. 1 September, 1970	Table 1 has been amended.	1 September, 1970.
8. IS : 1398—1968 Specification for packing paper waterproof, bitumen-laminated (<i>First Revision</i>)	S.O. 3745 dated 26 October, 1968	No. 2 September, 1970	Clause 4·2 has been substituted by a new one.	1 September, 1970
9. IS : 1520—1960 Specification for horizontal centrifugal pumps for clear, cold, fresh water	S.O. 1742 dated 16 July, 1960	No. 3 September, 1970	Clause 14·9 has been substituted by a new one.	1 September, 1970
10. IS : 1526—1960 Sizes and shapes of firebricks.	S.O. 2494 dated 15 October, 1960	No. 1 September, 1970	(First cover page, pages 1 and 2 (pages 1 and 3 of Reprint), Title— Substitute the following for the existing title at all the three places : 'Indian Standard' sizes and shapes for firebricks (230 mm SERIES).	1 September, 1970

*For purposes of ISI Certification Marks Scheme, this Amendment shall come into force with effect from 1 Nov. 1970.

(1)	(2)	(3)	(4)	(5)	(6)
11. IS : 1528—1962 Methods of sampling and physical tests for refractory materials.	S.O. 3593 dated 1 December, 1962	No. 1 October, 1970	(i) Clause 2·4·1·2 has been amended 1 October, 1970 (ii) A new clause 2·4·1·8 has been added.		
12. IS : 2086—1963 Specification for carriers and bases used in rewirable type electric fuses up to 650 volts. <i>(Revised).</i>	S.O. 2370 dated 24 August 1963	*No. 3 October, 1970	(i) [(Page 23 (page 24 of the Reprint), clause A-O 1, line 1)]— substitute 'specified' for 'employed'. (ii) (Paged 11, clause 6·1(b)—Add a new item as below and re-number the subsequent items '(c)' (d)' as '(d)' and '(e)' respectively : '(c)' Size of fuse wire,' (iii) A new clause 7·5·0 has been added.		1 October, 1970.
13. IS : 2148—1968 Specification for flame proof enclosures of electrical apparatus. <i>(First Revision)</i>	S.O. 3728 dated 13 September, 1969	No. 1 September, 1970	(i) Clause 3·1 has been substituted by a new one. (ii) (Page 40, explanation of Fig. 188) substitute the following for the existing explanation : '18b Cast or welded or Brazed Shroud : Three Fourth Circle'		1 October, 1970
14. IS : 2232—1967 Specification for slotted and castle nuts <i>(First Revision)</i>	S.O. 4562 dated 23 December 1967	No. 1 October 1970	(Pages 5 to 15 Tables I to II)— add the following matter below the figures in each of the Tables I to II : 'The underside of the slot may be round or at with rounded corners or flat with chamfered corners, at the discretion of the manufacturer.'		1 October 1970.
15. IS : 2312—1967 Specification for propeller type ac ventilating fans <i>(First Revision)</i>	S.O. 520 dated 10 Feb 1968	No. 2 September 1970	(i) Clauses 5·1 and 14·8·2 have been amended (ii) Clause 6·5 has been substituted		1 September 1970
16. IS : 2316—1968 Methods of preparation of standard solutions for colorimetric and volumetric analysis <i>(First Revision)</i>	S.O. 593 dated 15 Feb 1969	No. 1 September 1970	(Page 5, clause 11·1, line 1)— Substitute '1.64 kg' for '3.6 kg'		1 September 1970
17. IS : 2453—1963 Specification for phenyl mercury chloride, technical	S.O. 2038 dated 20 July 1963	No. 1 December 1970	(Page 6, clause 5·1, line 2)— Substitute '0.062 mm (250 gauge)' for '0.125 mm (500 gauge)'		1 December 1970
18. IS : 2354—1963 Specification for ethyl mercury chloride, technical	S.O. 2160 dated 3 August 1963	No. 1 December 1970	(Page 5, clause 5·1, line 2)— Substitute '0.062 mm (250 gauge)' for '0.125 mm (500 gauge)'		1 December 1970.
19. IS : 2355—1963 Specification for stabilized ethoxy ethyl mercury chloride concentrate	S.O. 2160 dated 3 August 1970	No. 1 December 1970	(Page 6, clause 5·1, line 1 line 2)— Substitute '0.062 mm (250 gauge)' for '0.125 mm (500 gauge)'		1 December 1970
20. IS : 2387—1969 Methods for determination of weight of jute fabrics <i>(First Revision).</i>	S.O. 4311 dated 25 October 1969	No. 1 September 1970	Formula under clause 6·1·3(b) has been substituted by a new one		1 September 1970.
21. IS : 2427—1968 Grading of continuous filament viscose rayon yarn and acetate yarn, bright and dull <i>(First Revision)</i>	S.O. 2961 dated 9 November 1968	No. 1 December 1970	(i) [Page 6, Table 1 S1No. (iii)(a) against '40' under Grade 1] Substitute '40' for '34'. (ii) [Page 10, Table 2, S1No. (iii)] Delete this item and renumber the subsequent items accordingly wherever they appear in the standard.		1 December 1970
22. IS : 2516 (Part II Sec 2)—1965 Specification for alternating current circuit-breakers Part II Tests Section 2 Voltage Above 1,000 Upto and Including 11,000 volts	S.O. 1081 dated 9 April 1966	No. 1 November 1970	Clause D-3 has been amended		1 November 1970

*For purposes of ISI Certification Marks scheme, this amendment shall come into force with effect from 1 Nov. 1970.

¶For purposes of ISI Certification Marks Scheme, this Amendment shall come into force with effect from 1 January 1971.

(1)	(2)	(3)	(4)	(5)	(6)
23.	IS : 2575-1963 Specification for leather gauntlets for welders	S. O. 950 date 21 March 1964	No. 1 October 1970	(Page 5, Fig. 1) (a) First finger Substitute '75' for '70' (b) Second finger Substitute '85' for 82 (c) Third finger Substitute '80' for '76' (d) Fourth finger substitute '55' for '57' (e) Thumb-substitute '75' for '57'	1 October 1970.

ELECTION COMMISSION OF INDIA

New Delhi, the 22nd June 1972

S.O. 2405.—In pursuance of Section 106 of the Representation of the People Act, 1951 (43 of 1951) the Election Commission hereby publishes the Order, pronounced on the 7th December, 1971 by the High Court of Mysore at Bangalore in Election Petition No. 1 of 1971.

IN THE HIGH COURT OF MYSORE AT BANGALORE

Dated the 7th day of December, 1971

BEFORE THE HON'BLE MR. JUSTICE
E. S. VENKATARAMIAH.

ELECTION PETITION No. 1/1971

BETWEEN

Rachappa Gangappa Wali, aged 46 years, residing at 54. Club Road, Hubli.—Petitioner.

Sri S. C. Javali.

Sri C. N. Kamath.

(By Sri S. B. Chandrashekhar)

Sri R. Venkateswara Rao and Smt. Bharathi R. Rao.

AND

1. Smt. Sarojini Bindurao Mahishi, Ramanagar, Dharwar, at present residing at Delhi as Deputy Minister for Civil Aviation & Tourism, Government of India.

2. The Chief Election Commissioner of India, New Delhi.

3. The Chief Electoral Officer, G.O.M., High Grounds, Bangalore-1.

4. The Returning Officer, Parliamentary Constituency, Dharwar North, Dharwar.

5. S. P. Sirur, c/o Krishna Bhavan, Hubli.—Respondents.

Sri R. M. Patil, Sri V. H. Ron, Sri L. G. Havanur, Sri P. G. C. Chengappa and Smt. Malini Mahishi for respondent No. 1.

By Sri S. G. Sundarawamy and Sri P. R. Srinivasan for respondent No. 2.

By Sri B. K. Ramachandra Rao, Additional Government Advocate, for respondents Nos. 3 and 4.

Election Petition filed by the petitioner under section 81 r/w section 100 of the Representation of the People Act, 1951, challenging the election of the Respondent No. 1 to the House of the People from Dharwar North Parliamentary constituency in the Mid term Elections held in the month of March, 1971, and seeking an order that (i) the election of the returned candidate respondent No. 1 is void and her election is set aside; (ii) the respondent No. 1 is guilty of corrupt practice within the meaning of Section 123 of R.P. Act, 1971; (iii) this petitioner is declared as having been duly elected; (iv) this petition is allowed with costs, and (v) for such other reliefs as may be deemed fit and proper under the circumstances of the case.

This Election Petition coming on for trial on 13th, 14th, 15th, 16th, 20th, 21st and 30th days of September, 1971, 4th, 5th, 6th, 7th, 11th, 12th, 13th, 14th, 21st, 25th, 26th and 28th days of October, 1971, and 2nd, 3rd, 4th, 8th, 9th, 10th, 15th, 16th, 17th, 18th, 22nd, 23rd, 29th and 30th days of November, 1971 in the presence of Sri S. C. Javali, Sri C. N. Kamath, Sri S. B. Chandrashekhar, Sri R. Venkateswara Rao and Smt. Bharathi R. Rao, advocates for the petitioner and Sri R. M. Patil, Sri V. H. Ron, Sri L. G. Havanur, Sri P. G. C. Changappa, and Srimathi Malini Mahishi, Advocates for respondent No. 1, Sri S. G. Sundarawamy and Sri P. R. Srinivasan, Advocates

for respondent No. 2, Sri B. K. Ramachandra Rao, Additional Government Advocate, advocate for respondents Nos. 3 and 4, and this Election Petition having stood over for consideration, the Court delivered the following judgment this 7th day of December, 1971.

JUDGMENT

The petitioner who was a candidate at the election held in the month of March, 1971, for Lok Sabha from Dharwar North Constituency in Mysore State, has filed the above petition under section 81 of the Representation of People Act, 1951, (hereinafter referred to as the Act) calling in question the election of respondent-1 to Lok Sabha from the said constituency at the said election. Respondent—5 was another candidate who contested the said election. Respondent 2 is the Chief Election Commissioner of India. Respondent—3 is the Chief Electoral Officer in the State of Mysore. Respondent—4 is the Returning Officer of Dharwar North Lok Sabha Constituency.

The grounds urged in the petition among others for declaring the election of respondent—1 to Lok Sabha as void were the following:

(1) That the election of respondent—1 was void for the reason that votes recorded on spurious and non genuine ballot papers had been counted in her favour. According to the petitioner at the time of counting of votes it was noticed that the voting marks placed on the election symbol 'Calf and Cow' which had been assigned to respondent—1 were found in a large number of ballot papers at the same point in all those ballot papers; that the colour of those marks appeared to be brighter than the marks on other ballot papers and somewhat shining. It was urged that the rubber stamping on the symbol 'calf and cow' appeared to have been done in many of the ballot papers more than once and that was a matter of surprise to the petitioner. It was also urged that in a large number of ballot papers no voting marks at all were found anywhere and they were declared as invalid ones. The petitioner and his agents did not know the reason for the existence of such features in many of the ballot papers. Thereafter, on further consideration, the petitioner felt that the rubber stamping on large number of ballot papers referred to above could not have been made by human hand but must have been made by a mechanical process. The petitioner also felt that there must have been a preplanned scheme and that some fraud had been committed in order to secure the success of respondent—1. According to the allegations in the petition, the petitioner had reason to believe that certain appreciable percentage of ballot papers which were printed at Bangalore had been removed to Delhi and they were chemically treated at Delhi or that they were altogether removed and replaced by another set of chemically treated papers. It was urged that the object of chemically treating the ballot papers was to see that any voting mark made at the polling station on the symbols other than the symbol 'calf and cow' by the voters should disappear by the time the ballot papers were taken up for counting and that on the symbol 'calf and cow' a certain mark made with a mechanical process appearing to be similar to the mark made by the voters in the polling station, which was invisible at the time when the ballot papers were issued to the voters in the polling station, should appear at the time they were taken up for counting. In other words the petitioner's case on this point was that on account of the chemical treatment of the ballot papers, votes which had been validly cast in favour of candidates other than respondent—1 could not be counted in their favour because they had disappeared by the time the ballot papers were taken up for counting and that the appearance of marks which were invisible at the time when the ballot papers were issued at the polling station, was responsible for counting those ballot

papers in favour of respondent—1. It was specifically urged that the treatment of ballot papers to achieve the above result could be made by using 15 per cent solution of stabilised sodium chlorite (NaClO_2) and by drying the paper at low temperature. When such a paper was stamped after a couple of days of storing with methyl violet based stamping ink, the mark would gradually wear out within a period of 24 to 48 hours. Thus at the end of that period, there would not be any mark at all on such paper. It was also urged that it was possible to make an invisible mark made by using 5 per cent solution of silver nitrate (AgNO_3) and 0.2 per cent indigosol pink LR extra on such paper visible after some time. It was stated that by using ultra violet light in a dark room, it was possible to detect bleached impressions of rubber stamps and there were other methods by which the fact whether a ballot paper was chemically treated or not could be detected. It was urged that these ballot papers were chemically treated as a part of a pre-planned scheme in order to see that candidates belonging to Congress (R) party to which respondent—1 belonged succeeded in the election and in doing so the Election Commission had also colluded or connived. It was, therefore, urged that the election of respondent—1 was liable to be set aside on that account.

(2) That the amendment of Rule 56 of the Conduct of Election Rules (hereinafter referred to as the Rules) as it stands today was done with the object of helping candidates belonging to Congress(R) party and that the said Rule was ultra vires.

(3) That the allotment of the symbol 'calf and cow' to Congress (R) party amounted to a corrupt practice. It was urged that the symbol 'calf and cow' was a religious symbol, for a large majority of the Indian Population, namely, Hindus considered 'cow' as a sacred animal.

(4) That respondent—1, in the course of the election propaganda canvassed on communal lines by a systematic appeal to the voters on the basis of caste and religion. A large number of workers who worked on behalf of respondent—1 also canvassed on communal lines. It was, therefore, urged that respondent—1 was guilty of corrupt practice under section 123(3) of the Act.

Respondent—1 in her written statement denied all the allegations which had been made in the election petition. She pleaded that the ballot papers had not been chemically treated as alleged by the petitioner; that Rule 56 of the Rules was valid and it had been duly framed; that the symbol 'calf and cow' was not a religious symbol; that neither she nor any of her agents or workers appealed to voters on communal lines, and that the Election Commission had not connived or colluded with Congress (R) party in order to secure the success of the members of that party at the last Lok Sabha elections. It was also pleaded by respondent—1 that the election petition had not been properly presented and that the petition was not maintainable since the copy of the petition served on the first respondent had not been duly attested.

Respondent—2 denied in the written statement that the ballot papers had been chemically treated as alleged by the petitioner. He pleaded that he was not in any way a party to the alleged fraud said to have been committed with the object of securing the success of respondent—1 and her party at the Lok Sabha elections. It was pleaded that he was not a necessary party to the petition. Similarly respondents 3 and 4 have also denied the allegations in the petition. They have stated that the ballot papers were got printed in accordance with the instructions received by them from the Election Commission of India and that the ballot papers were despatched to the Returning Officer immediately after they were so printed. The allegation that a number of ballot

papers were removed from the printing press to some other place for the purpose of treating them chemically, was also denied by them. It was also stated that there was neither time nor opportunity to remove the ballot papers to some other place for the purpose of chemical treatment.

Respondent—5 has been placed ex parte.

On the basis of the aforesaid pleadings, the following issues were framed on 13th August, 1971:

1. (a) Whether the petitioner proves that the rubber stamping on the symbol 'cow and calf' on large number of ballot papers used in the election had been made by a mechanical process on chemically treated ballot papers and not by voters?
- (b) Whether the petitioner proves that an appreciable percentage of ballot papers were removed from Bangalore to New Delhi before the election and that the ballot papers so removed to New Delhi were brought back after subjecting them to chemical treatment to be used in the election?
- (c) Whether the petitioner proves that a corrupt practice has been committed and that the result of the election is materially affected or is otherwise vitiated in the event of findings on Issues I (a) and (b) being in the affirmative?

(deleted on 9-11-71)

[II.(a) Whether the symbol 'cow and calf' is a religious symbol?

(b) Whether the allotment of 'cow and calf' to respondent—1 amounts to corrupt practice in law?

(c) Whether the result of the election is materially affected by such allotment, in the event of such allotment being held as a corrupt practice?

(d) Whether the validity of the election can be called in question in an election petition on the ground referred to in Issue II (b) above?]

(deleted on 9-11-71)

[III. (a) Whether the validity of amendment of Rule 56 of the Conduct of Election Rules can be called in question in an election petition?

(b) If the validity of amendment of Rule 56 can be called in question in an election petition, whether the amended Rule 56 is ultra vires?

(c) If Rule 56 is ultra vires, whether the result of the election is materially affected?]

(deleted on 30-11-71)

[IV. (a) Whether respondent—1 appealed to voters in the course of her election campaign on the basis of community, caste and religion?

(b) Whether the petitioner proves any act referred to in Issue IV (a) on the part of respondent 1 or any of her agent or agents or by any other person or persons working for her or in furtherance of her prospects at the election?

V. Whether any of the alleged corrupt practices was committed with the connivance or consent or with the knowledge of respondent—1?

VI. (a) Whether the names of any voters were removed from the electoral rolls in violation of the Rules?

(b) Even if it is so, whether such removal can form a ground of attack in an election petition?

(c) Whether the result of the election was materially affected on account of such removal?]

(deleted on 9-11-71)

[VII. Whether respondent—2 is a necessary party to the election petition?

VIII. Whether the election petition is not properly presented before the Court?

IX. Whether the petition is not maintainable on account of non-attestation of the copy of the election petition furnished to the respondents?

X. What order is to be passed on the election petition?]

(deleted on 30-11-71)

On 9th November, 1971 the counsel for the petitioner submitted that he would not press the ground covered by Issues II (a) to (d), IV(a) and (b), V and VI (a) to (c) and on 30th November, 1971 he submitted that he would not press Issues Numbers III (a), (b) and (c). Sri R. M. Patil, the learned counsel for respondent—1 submitted on 30th November, 1971 that he would not press the grounds covered by Issues VIII and IX. The resulting position is that only issue I (a), (b) and (c), VI and X survive for decision in this case.

Issues I (a), (b) and (c):

The above issues relate to the allegation of the petitioner that a substantial number of ballot papers were chemically treated with the object of securing the success of respondent—1. Even though the petition is silent regarding the name of the chemical used and the method of treatment of ballot papers with the chemical, there is an averment that certain experiments said to have been conducted had shown that when a paper was treated with sodium chlorite solution it acquired the characteristic of causing disappearance of mark made with ink which was used at the polling station for ink pads at a subsequent stage and making a mark placed with the help of 5 per cent solution of silver nitrate (Ag NO_3) which was invisible when the mark was made visible at a later stage. It is urged that as a result of such chemical treatment and the printing of invisible marks on the symbol 'calf and cow' on about 30 to 35 per cent of the ballot papers, the mark made by voters at the polling station with the help of Kores ink or any other ink, disappeared and the invisible marks placed on the symbol 'calf and cow' which was the symbol of respondent—1 became visible by the time the ballot papers were taken up for counting. It is pleaded that all those papers which had the mechanically printed marks on the symbol 'calf and cow' were counted as valid votes in favour of respondent—1, and, therefore, respondent—1 got about 30 to 35 per cent of the total number of votes polled even though the voters had not given their votes in her favour.

It may be mentioned here that the date on which the ballot papers were chemically treated has not been furnished in the petition. Sri R. Venkateshwara Rao, the learned counsel for the petitioner, however submitted that as can be gathered from the allegations made in the petition, the case of the petitioner was that the ballot papers were chemically treated sometime after they were printed at the Government Central Press, Bangalore, and before they were delivered to the authorised representative of the Returning Officer to be carried to the constituency in question. If that is so, it may be taken that the case of the petitioner is that the ballot papers must have been chemically treated sometime between 12th February, 1971 and 19th February, 1971. The necessary inference which follows from the above allegations is that the ballot papers were treated with a chemical of a specified concentration or quality so that the invisible marks alleged to have been made on the symbol 'calf and cow' which were not visible by the polling date should become visible on March 10, 1971, which was the date of counting and the marks made by the voters on the polling day disappeared by March 10, 1971.

The evidence on this point consists of (i) the oral evidence of some persons who were present at the time of counting; (ii) oral evidence of M. M. Kulkarni (P.W. 2 in E. P. 2/71) and Dr. R. O. P. Dharmarao (P.W. 6 in E. P. 2/71) who were examined as experts and whose evidence is treated as common evidence by consent of parties in E. P. 1 to 4 and 6 of 1971 (iii) the oral evidence of P. I. Jacob (RW. 2 in E.P. 3/71), K. G. Gowda, RW. 1 in E. P. 2/71, M. S. Hirannaiah, R. W. 2 in E. P. 2/71; M. A. Arham, RW. 3 in E. P. 2/71, Allabaksh Imam Hasan, R. W. 4 in E.P. 2/71; M. L. Ramanna, RW. 5 in E. P. 2/71 (the evidence of all these witnesses is treated by consent of parties as common evidence in E. Ps. 1 to 4 and 6 of 1971) and S. S. Patil, RW. 1 in this case, and the documents marked through these witnesses and (iv) the result of inspection and scrutiny of certain unused and used ballot papers pertaining to the election in question.

P.W. 1 N. J. Desai is an advocate by profession. He acted as a counting agent on behalf of the petitioner. His evidence is that at the time of counting of votes he noticed some peculiar features about the voting marks on majority of ballot papers. He states that the voting marks in those ballot papers appeared to be printed marks and all those marks were at the same place on the symbol 'calf and cow' in all such ballot papers. These features, according to this witness, aroused his suspicion and the said peculiar features were noticed by him in a large majority of ballot papers. He has admitted that he did not raise any objection before the Counting Officer or the Returning Officer regarding the genuineness of the said ballot papers and also for counting them as valid votes in favour of respondent—1. The witness knew the grounds on which the ballot papers could be rejected in law. He has stated that he discussed about the said peculiarities with other counting agents of the petitioner. P.W. 2 is Benkappa of Gadagbetagcri. He is a trader by profession. He too acted as a counting agent of the petitioner at the last election. His evidence is almost similar to the evidence of P.W. 1. He has stated that he found in a large number of ballot papers the voting marks on the symbol 'calf and cow' which had been assigned to respondent—1 were at the same point in majority of ballot papers and that the colour of those marks was brighter than the marks on other ballot papers and that those ballot papers about which he got suspicion were shining and whiter than the rest of the ballot papers. He too did not raise any objection before the Returning Officer although he has stated that the matter was discussed amongst the petitioner and the other counting agents on March 10, 1971. P.W. 3 is S. V. Shettar, who was also one of the counting agents of the petitioner, but he had been asked by the petitioner to sit near the Returning Officer's table where no counting was going on. He was at that table to keep watch over the orders passed on rejected ballot papers by the Returning Officer on disputed ballot papers and to note down the number of votes secured by the candidates as the counting was in progress. He has stated that he used to go round whenever he had no work at the Returning Officer's table to verify the trend of voting and while doing so he noticed that in the trays in which the ballot papers of respondent—1 were being placed a large majority of ballot papers having certain characteristics, namely, that the voting marks on those ballot papers were on the symbol 'calf and cow' at a particular place and those marks appeared to be printed marks and according to this witness those marks were shining. He also stated that the matter was discussed amongst the petitioner and the other counting agents. He has admitted that this question was not raised by him before the Returning Officer. According to this witness, it did not occur to him that he should raise objection to those ballot papers in which he found those peculiar features because he thought that he could not raise objections on that ground nor did he ask the petitioner to raise any objection. The witness does not know whether the petitioner raised any objection to those ballot papers.

The next witness examined on behalf of the petitioner is the petitioner himself. The petitioner is examined as P.W. 4 in the case. According to his evidence, he was present at the counting hall on both days on which the counting took place, namely 10th and 11th of March, 1971 and at the time of counting he observed some distinct features in a large majority of ballot papers in which votes had been cast in favour of respondent—1. The said ballot papers appeared to be whiter than the rest of the ballot papers in colour and appeared to have been subjected to extra bleaching. In those ballot papers the voting marks had been placed on the symbol 'calf and cow' at the same place and those ballot papers were slightly smoother than the other papers and he did not raise objection before the Returning Officer in regard to those papers because he wanted further confirmation about his suspicion. On seeing those papers the petitioner felt that the same must have been treated chemically. He has stated that he discussed the said matter with some of his friends and later came to know that it was possible by chemical treatment to produce such peculiar features. The petitioner after examining about 7,000 unused ballot papers and about 1,560 used ballot papers pertaining to the election in question stated that in about 40 percent of those ballot papers the voting marks were on the symbol 'calf and cow' at the identical place. When he was asked to substantiate the above statement, he took out some ballot papers which had been used at the election and classified them into five categories A to E and later on stated that it was not possible for him to state by looking at the ballot papers whether any of them was whiter than the other ballot papers and/or smoother than any other ballot papers. He admitted that by visual examination he could not pick out any ballot paper which had been chemically treated from the 8,500 ballot papers (both used and unused). Before making the above statement, the witness had scrutinised the ballot papers for over a period of two and half hours. He admitted in cross-examination that the ballot papers which he had inspected were genuine ones and he could not pick out even one ballot paper from the ballot papers he had inspected containing a voting mark not made with the help of the instrument provided at the polling station but by means of some other mechanical means. He admitted that the position of the points of the arrow marks found in the voting marks varied from one ballot paper to the other. On further scrutiny he stated that voting marks in the ballot papers in each of the five categories into which he had classified them, did not appear to be at the identical place in all of them. He had to admit on inspection of the ballot papers that the voting marks were at different places in the column in which the symbol 'calf and cow' appeared.

The petitioner further admitted in the course of his evidence that he did not make any other enquiry or investigation about the truth of the allegation that the ballot papers had been chemically treated. He could not say when the ballot papers were taken from Bangalore to New Delhi as alleged in para 13 of the petition and where, when and by whom the ballot papers were chemically treated and what chemical was used for the treatment. He could also give no information about the person who conceived the preplanned scheme to play fraud at the election as alleged by him. Apart from whatever he had stated already in examination-in-Chief he could not give further particulars of the alleged fraud. He could not also give the details of the mechanical stamping of ballot papers. He told the court that except the ballot papers which had been produced before the Court for inspection, he had no other evidence to prove the allegations made in paragraphs 11 to 13 of the petition. He admitted that he made no other enquiry regarding the truth or otherwise of the allegations that the ballot papers had been chemically treated.

The uniform version of the above witnesses P.W.s. 1 to 4 is that on 10th March 1971 on which date

counting of votes commenced within about two hours they all noticed that a large number of spurious ballot papers or ballot papers containing marks made by an instrument other than the one provided at polling stations were being counted as valid ballot papers in favour of Respondent-1. Later on all of them discussed about it in the course of the day, but still did not raise any objection before the Returning Officer or the Counting Officers in regard to the same. It may be remembered that the counting took place on the following day also. They all admit that they were aware of the rule which required the Returning Officer to reject the ballot papers which were spurious or which contained marks made by instruments other than the one provided at the polling station. The conduct of these witnesses in not raising objections in regard to the peculiarities they observed, does not appear to be in conformity with the ordinary conduct of persons who are faced with such a situation. The reason given by the petitioner that he wanted to verify the matter before raising an objection appears to be an afterthought. The further evidence of the petitioner in the above case is that he did not make any attempt to verify whether the suspicion he had about the ballot papers was true or not. No enquiry has been made by the petitioner about the truth or otherwise of the matter. The petitioner has stated that he read some articles published in some periodicals after the Lok Sabha elections dealing with the possibility of chemical treatment.

The petitioner also relied upon the evidence of M. M. Kulkarni, P.W.2 in E.P. 2/1971 whose evidence is marked as Exhibit P-1 in this case and Dr O. P. Dharmaraj, P.W.6 in E.P.2/1971 whose evidence has also been marked as Exhibit P-2 in this case as expert witnesses. Their evidence as already stated is treated as common evidence in all the petitions E.P.1 to 4 and 6 of 1971. They were examined in support of the above allegation regarding chemical treatment of ballot papers. M. M. Kulkarni is a person who holds a degree in Engineering. Admittedly he does not possess any high qualification in Chemistry. The extent of his knowledge of Chemistry could only be what he might have studied as an allied subject in the school and in the course of his engineering study. He however claims that he had occasion to study the science of invisible inks while he was serving in the British Territorial Army and that he had conducted experiments after the last Lok Sabha elections on invisible inks. Be that as it may, the question for consideration is what value should be attached to his evidence.

M. M. Kulkarni was the election agent of Naval Tata who contested from one of the Bombay Lok Sabha Constituencies at the last Lok Sabha elections. Naval Tata was defeated in the election. Kulkarni who was disappointed at the result of that election developed suspicion about the ballot papers and started conducting experiments to find out whether it was possible to treat the ballot papers chemically to achieve the desired result. He appears to have given demonstration before the members of the All India Congress (O) who did not fare well at the last Lok Sabha elections. A reading of the deposition of Kulkarni left me with the impression that he was not a disinterested witness. That however is not the real factor which has led me to feel that his evidence is of no use to the petitioner. There are however other more weighty reasons to come to that conclusion.

In the course of his evidence he stated that the methods of detection of the fact whether a particular paper was chemically treated or not were many. One of the methods according to him was that if ultra violet rays were made to fall on a chemically treated paper, when it was treated with sodium

chlorite, the treated paper would appear glowing white in colour with fluorescence and if an untreated paper was seen under ultra violet rays, it would have dull blue colour. He further stated that when he conducted experiments on paper with the help of diazo compound he found that the treated paper appeared to be violet in colour whereas the untreated appeared white. According to him there were some other methods of detection with the help of infrared rays, X-rays, etc. He also stated that if a treated paper and an untreated paper were immersed in a solvent which would dissolve the particular chemical, the composition of the solvent after such immersion would be different. He stated that a mark made with the help of Kores ink (methyl violet which is being used in ink pads) would disappear if the paper had been treated before such marking with sodium chlorite or sodium hypochlorite on account of decoloration. The time taken for the mark to disappear, according to the witness, depended on the concentration of the chemical used and the quality of paper which was treated. To a question put by the court, the witness answered that once a mark made by an invisible ink became visible on a treated paper, it would continue to be visible for an indefinite period unless the paper was again subject to another chemical treatment. He stated that such a mark would be visible at least for a period of one year. He stated that certain marks which would be invisible to the naked eye would be visible in some cases when they were looked at under ultra violet rays. According to the witness as could differentiate treated papers from untreated papers either by visual inspection or by conducting experiment or with the help of an instrument with which ultra violet rays could be made to fall on paper even without touching the paper. The above evidence was given on September 20, 1971 and the further examination of this witness was postponed to October 4, 1971. On October 5, 1971, I made an order that the Returning Officer, should produce before the court the unused ballot papers for purposes of inspection and scrutiny in this case. The unused ballot papers relating to the constituency with which we are concerned in this case and five other Lok Sabha Constituencies in Mysore State were scrutinised by the witness. Before those ballot papers were scrutinised, the witness was asked by the court whether he was in a position to state whether the ballot papers were chemically treated or not if ballot papers printed for the purpose of election in the month of March 1971 were taken out from the box and shown to him. His answer to that question was that it was possible for him to find out either with the ultra violet rays or by some other method and that he was ready on that day with the necessary equipment to examine the ballot papers with the ultra violet rays. On October 7, 1971 after carefully examining about 6,035 ballot papers pertaining to Mysore Lok Sabha Constituency (the election from that Constituency is questioned in E.P. 6 of 1971) the witness stated that by passing ultra violet rays on a paper it was not possible for him to say whether the paper had been treated with sodium chlorite or not. He further stated to find out with the ultra violet rays whether a piece of paper was treated with any chemical or not, it would be necessary to have the untreated paper of the same kind and quality. He stated that even when both treated and untreated papers are viewed under ultra violet rays, he could only say whether any paper had been treated or not, but could not say whether it was treated with sodium chlorite or not. He further stated that by passing ultra violet rays he could say that the paper had been treated with some chemical and could not say whether the chemical used is a bleaching agent or not. Later on he stated that by passing ultra violet rays on a paper which was treated, he could not say even though he was given the sample of the paper, whether the paper had been treated with a particular

chemical. This answer of the witness is at variance with his statement in his evidence which he gave on September 20, 1971, namely, "method No. 1 when ultra violet rays are made to fall on a chemically treated paper, when it is treated with sodium chlorite of the type on which Exhibits P-1 and P-2 are printed, the treated paper will appear glowing white in colour with fluorescence. Similarly if ultra violet rays are made to fall on the untreated paper it will have dull blue colour." The witness gave a different version after examining the unused ballot papers because he was not able to say that any of those papers was treated with sodium chlorite. As already stated this witness was a person who was interested in making out a case that in the last Lok Sabha elections held in India the ballot papers that were used had been chemically treated in order to see that the members of Congress (R) party returned to Lok Sabha in large numbers. The witness further stated at the end of his deposition on October 7, 1971 "that the colour of the paper varies under ultra violet rays from one piece of paper to another piece of paper even when it is taken out from the same stock if there is variation in the deposit on the paper of the chemical used for bleaching purposes in the paper factory." In his deposition, on 12th October, 1971 the witness stated that he had seen in all about 35,000 unused ballot papers relating to Election petitions 1 to 6 of 1971 and he could not say without resorting to some other chemical test whether any of them was treated with sodium chlorite or any other particular chemical. He had seen hundreds of those ballot papers under ultra violet rays and he was not in a position to say whether any of them had been treated with sodium chlorite or not. He further stated that it was not possible to say whether a paper is treated with sodium chlorite or not by passing ultra violet rays on it. He further admitted that he did not find any voting mark anywhere on the unused ballot papers under ultra violet rays. The witness also admitted that he had not conducted any experiment so far by which he could regulate the appearance of any invisible mark 18 hours after the marks were made and he could not do any experiment before the court to obtain that result, and he required at least three months time to conduct such an experiment.

The next witness who has been examined as an expert in this case is P.W. 6 in E.P. 2 of 1971, Dr. O. P. Dharmaraj. He is a Professor of Chemistry in a college affiliated to the University of Delhi. He has stated that he was a former member of Rashtriya Swayam Sevak Sangha and that on the Governing council of his college there are some members belonging to Bharatiya Jan Sangh, some of whose members have filed election petitions in the High Court of Delhi containing similar allegations. I shall however deal with his evidence without reference to the above statement.

This witness was summoned on an application made by the petitioner after the case of the petitioner had been closed and after some of the used ballot papers were inspected and scrutinised by the Court. In his deposition he stated that he could not say by merely looking at the ballot papers whether any of them was subjected to chemical treatment. He however stated on examining the ballot papers under ultra violet rays, that the ballot papers under ultra violet rays appeared to differ in opacity and exhibited different fluorescence or colours. He further admitted that when the paper was manufactured if there was difference in the chemical deposit on the surface of the paper, different portions of the paper would exhibit different colours even when they were taken out from the same roll due to the use of different quantities of sizing agent, binding agent, etc. He stated that in the ballot papers in the five constituencies concerned in E.P. 1 to 4 and 6 of 1971 which he inspected he could not take out any ballot paper by visual examination in which the mark which was originally visible had become invisible because he found

in all of them marks put on symbols other than 'calf and cow' were still there. He stated that nobody by mere visual examination of a paper could say that it was chemically treated. Even by looking at the ballot papers under ultra violet rays, he was not in a position to say whether the ballot papers contained mechanically printed marks or the marks were shining. He could only say whether any particular paper was whiter than the other. This witness admitted that he was present at the time when M. M. Kulkarni gave demonstration at Constitution Club, New Delhi, about his experiment. He was present at that place for about 20 minutes. He had discussed the matter with M. M. Kulkarni before he came to court to give evidence and he had also read the deposition of M. M. Kulkarni. The witness admitted that if a printed paper was given to him and he was asked to treat the paper chemically with the object of making an invisible mark visible later on and visible mark disappear at a later stage, he could not off and say how he should experiment. After examining the ballot papers, he stated that none of the ballot papers which he had seen in the Court had been subjected to chemical treatment by applying sodium chlorite in liquid form. The witness next stated that a paper treated with sodium chlorite when viewed under ultra violet lamp would emit yellow fluorescence. This statement is inconsistent with the statement of M. M. Kulkarni who on the first day of his examination stated that a paper treated with sodium chlorite would emit glowing white colour under ultra violet rays. This witness however admitted that sodium chlorite was sometimes used by paper manufacturers as bleaching agent. His further evidence was that even when a mark which was visible at the commencement became invisible at a later stage, there would be some stain on the paper and it depended upon the nature of chemical used and the nature of the ink used and he did not observe any such stain by visual examination and even under ultra violet rays in any of the ballot papers examined by him. He however made it clear in his deposition that he could not say by visual examination whether any of the ballot papers which he had examined in court had been chemically treated or not. This witness made use of a ultra violet lamp in court while giving evidence. Continuing he said because he found different alignment of the mark between one ballot paper and another ballot paper, he would say that the marks were not made mechanically.

The above witness was appeared by the counsel for the petitioner through Balraj Mudhol who was a colleague of this witness at Delhi University and who had also filed an election petition with similar allegations before the High Court of Delhi. This witness proceeded to state that a mark made with the help of Kores ink on a chemically treated paper and which disappeared at a later stage could not be detected by looking at the paper under ultra violet rays. This statement is slightly at variance with the statement of M. M. Kulkarni, namely "certain invisible marks to the naked eye become visible in some cases when looked at them under ultra violet rays". This witness was of the opinion that none of the ballot papers which he inspected in court under ultra violet rays had any mark which was invisible to naked eye but which was visible when it was made. Lastly he stated that to his knowledge it was not possible with the equipment available in India to treat about ten lakhs of ballot papers with sodium chlorite in a period of ten days or less. The above question was asked in the context of the election petition which were being tried in this court. He also stated that by the experiments he conducted, he had not been able to regulate the time of appearance of invisible mark, but he had been able to regulate the time of disappearance of a visible mark.

Apparently the information which this witness possesses regarding the possibility of treating a paper chemically with the object of making a visible mark

disappear and an invisible mark appear, appears to be of a recent origin. The witness has admitted in the course of his deposition that he attended the demonstration given by M. M. Kulkarni at the Constitution Club, Delhi, out of curiosity and thereafter he conducted experiments to find out whether a mark placed on a paper would disappear after some time and whether it can be made to appear at a later stage even though it was invisible at the commencement. He has stated that the demonstration which M. M. Kulkarni gave was a surprise to him. If that is the position, then it is very difficult to place much reliance on the evidence of this witness because by his own statement it is clear that prior to his meeting M. M. Kulkarni in the month of March, 1971, he had no idea of this branch of chemistry. I find it difficult to accept the evidence of this witness without reservations.

Even granting that there was a possibility of treating ballot papers chemically as pleaded by the petitioner, the question still remains whether it has been done in this case. The evidence of an expert witness under Section 45 of the Evidence Act is not conclusive and cannot be used as substantive evidence. The court must look for corroboration from the other evidence adduced in the proceedings to assure itself about the correctness or otherwise of the opinion of the expert. The court will have to take into account the various factors that surround the transaction which is in dispute and should judge the case on the basis of both external and internal evidence available in the case. The supreme Court while dealing with evidence of a hand-writing expert in BANU RAM—Vs—PRASANNI (A.I.R. 1950 Supreme Court, 93) as follows:

"Section 67 of the Indian Evidence Act (1 of 1872) provides *inter alia* that if a document is alleged to be signed by any person the signature must be proved to be in his hand-writing. Sections 45 and 47 of the said Act prescribe the method in which such signature can be proved. Under section 45, the opinion of the hand-writing experts is relevant while under Section 47 the opinion of any person acquainted with the hand-writing of the person who is alleged to have signed the document is admissible. The explanation to the section explains when a person can be said to be acquainted with the hand-writing of another person. Thus, there can be no doubt as to the manner in which the alleged signature of the appellant could and should have been proved; but even assuming that the signature of the appellant can be legally held to be proved on circumstantial evidence the principle which governs the appreciation of such circumstantial evidence in cases of this kind cannot be ignored or is only if the Court is satisfied that the circumstantial evidence irresistibly leads to the inference that the appellant must have signed the form that the court can legitimately reach such a conclusion. In our opinion, it is impossible to accede to Mr. Daobia's argument that the facts held proved in the High Court inevitably lead to its final conclusion that the appellant had in fact signed the form. It is clear that in reaching this conclusion the High Court did not properly appreciate the fact that there was no legal evidence on the point and that the other facts found by it cannot even reasonably support the case for respondent—1."

Hence, unless there is other reliable evidence in the case which leads to the conclusion that the ballot papers must have been tampered with as suggested by the petitioner, it would not be safe to act merely on the evidence of the experts and come to a conclusion one way or the other on the question in issue. We should also bear in mind that the experts are not always disinterested.

The most important material available on the above question is the result of inspection and scrutiny of ballot papers themselves. On October 5, 1971, I

made an order that the Returning Officer should produce before the Court the sealed boxes containing unused ballot papers and accordingly they were produced. The counsel for the petitioner was asked to select at random a few packers containing unused ballot papers of different polling stations in the constituency for purpose of scrutiny and inspection. He accordingly selected 7,039 ballot papers pertaining to this constituency and after inspection of ballot papers it was noticed that in none of them there was any mark resembling a voting mark on the symbol 'Calf and Cow'. M. M. Kulkarni one of the experts examined in the case who examined the ballot papers under ultra violet rays also was not able to say whether any of them had been chemically treated.

Now let me explain the usefulness of the examination of the unused ballot papers in determining the truth or otherwise of the allegations made in this petition. It is admitted that the ballot papers were printed with serial No. 1 upto the serial number of the last voter in the Lok Sabha Constituency. On an average there were about 5,00,000 voters in each constituency and the ballot papers which are printed would therefore bear serial No. 1 to 5,00,000 or little more or less depending upon the number of voters in each constituency. It is stated that to each polling station in constituency approximately about 1,000 voters would be assigned. Thus, ballot papers bearing serial No. 1 to 1,000 would have been assigned to the first polling station; ballot papers bearing serial No. 1,001 to 2,000 would have been assigned to the second polling station; ballot papers bearing serial Nos. 2,001 to 3,000 would have been assigned to polling stations No. 3 and so on. It is also not possible to imagine how many voters would exercise their right to vote at each polling station. Hence, if there was a preplanned scheme to see that about 35 percent of all the ballot papers were chemically treated in such a way that invisible mark on the symbol 'Calf and Cow' should become visible at a later stage, then amongst the ballot papers which are not used, there must have been some papers in which the invisible marked had become visible. The only way of avoiding this contingency was by seeing only the first few ballot papers assigned to each polling station were chemically treated so that all such papers would be used and there would be no trace of such papers among the unused ballot papers. In fact that was the submission made on behalf of the petitioner. It was argued that the chemically treated ballot papers were among the first three hundred to four hundred papers in each polling station. Then if about 35 per cent of the ballot papers had been so treated as alleged by the petitioner then amongst the used ballot papers the percentage of treated ballot papers should be nearly 60 to 70 per cent because the average voting in any polling station would be about 60 per cent of the total voters. That however was not the case of the petitioner. Hence, I feel that the absence of even a single ballot paper among the unused ballot papers containing the voting mark said to have been mechanically made on the symbol 'calf and cow' is a very strong circumstance against the contention of the petitioner. It is very difficult to accept that it was possible for anybody to see that not even a single ballot paper which was so chemically treated was found in the bundle of unused ballot papers for no one know how many voters in a given area would go to a polling station on the date of the poll.

I shall now deal with the result of examination of used ballot papers during the course of the election petition. When the trial of this petition was in progress, the Supreme Court pronounced its judgment in Civil Appeal No. 1343/71 (*Shashi Bhushan vs. Prof. Balraj Madhok and others*) and Civil Appeal No. 1473/71 (*Amer Nath Chawla vs. Kanwar Lal Gupta and others*) which had been filed by some successful candidates who were respondents in some election petitions pending on the file of the High Court of Delhi in which similar allegations had been made. Following the said decision, I ordered that the Returning Officer should

produce all the used ballot papers including the rejected ballot papers for purposes of inspection and scrutiny before the court and it was accordingly done. The counsel for the petitioner was permitted to select at random certain number of ballot from the boxes containing the used ballot papers. Accordingly the counsel for the petitioner selected 1,000 ballot papers in which votes had been cast in favour of respondent-1 and 550 ballot papers in which votes had been cast in favour of the petitioner and 10 rejected ballot papers. Thereafter the said ballot papers were scrutinised by the counsel for the parties and by the court. I recorded the result of visual examination of those ballot papers in a separate proceeding which was drawn up at that time. On visual examination of those ballot papers I felt that the allegation that a large majority of ballot papers had been chemically treated with the desired object was not true. I found in the ballot papers in which votes had been cast in favour of respondent-1 the voting marks were sometimes to be left of the symbol 'calf and cow' sometimes to the right of the symbol and sometimes on the symbol itself. Even when the voting marks were sometimes to be left of the not found at the same position in all the ballot papers. The angle of the arrow mark in the voting mark varied from one ballot paper to the other. In none of the ballot papers in which votes had been cast in favour of the petitioner, the voting mark had disappeared or had become dull. An examination of the ballot papers in which votes had been cast in favour of respondent 1 as well as the petitioner showed that the brightness of the mark varied from paper to paper depending upon the quantity of ink present on the instrument provided at the polling station for placing the voting mark. The allegation that in a large majority of ballot papers in which votes had been cast in favour of Respondent-1, the voting marks were at the same point in all the ballot papers and were uniform in brightness and the marks were shining, was not substantiated by the result of visual examination of those papers. The ballot papers appeared to be natural in form and none of them appeared to have been chemically treated. In fact that is the opinion of Dr. O. P. Dharmaraj, one of the experts examined in this case. The statement of other witnesses of the petitioner that certain peculiar features were noticed in a large majority of ballot papers by them at the time of counting was also not substantiated. It is no doubt true that the colour of the paper between one ballot paper and another was slightly dissimilar. That was because the ballot papers were selected at random for purposes of inspection. I am satisfied on the examination of the ballot papers that no further enquiry in this regard is necessary. In the judgment of the Supreme Court in the cases cited above, it was observed that if the court came to the conclusion on an examination of certain number of ballot papers selected at random, that the matter should be further proved into the court might take evidence on the point at issue including the evidence of expert witnesses and thereafter it was open to the court to direct or not to direct a general inspection of the ballot papers. In view of what is stated above, I am of the opinion that no case has been made out to direct a general inspection of the ballot papers.

The other evidence which remains to be considered in this case is the evidence of the witnesses examined on behalf of the respondents. The Deputy Election Commission of India, P. I. Jacob has been examined on behalf of the Chief Election Commissioner in this case. He was examined as R.W. 2 in E.P. 3 of 1971 and by consent of parties his evidence is read as common evidence in E.P. 1 to 4 and 6 of 1971. A copy of his deposition is marked as Exhibit R.8 in this case. This witness was incharge of the last Lok Sabha elections. Under Section 19-A of the Representation of People Act, 1951, he was authorised to exercise the powers of the Election Commission subject to supervision and control of the Chief Election Commissioner. He has stated that

the paper used for printing of ballot papers in Mysore was procured from the Mysore paper Mills Limited, Bhadravati, pursuant to an order made by the Director General of Supplies and Disposals, India. The colour, size and substance of the paper to be used for printing ballot papers were prescribed by the Election Commission. The colour of the paper was prescribed 'cream wove white'; the size of the paper was prescribed as 43 cms. by 69 cms. and the substance of the paper was prescribed as 10·9 Kgs. per ream, by the Election Commission of India. The instructions regarding the printing of ballot papers were issued as per paragraphs 22 and 23 in Chapter II of the Hand Book for Returning Officers (Pages 34 and 35). Exhibit R-5 in E.P. 3 of 1971 is the said book. This witness stated that instructions had been issued that ballot papers should be printed under maximum security conditions and should be despatched to the various constituencies in enclosed vans under police escort. He emphatically denied that any of the ballot papers used in any of the Lok Sabha Constituencies which were concerned in E.P. 1 to 4 of 1971 had been taken out of the press after they were printed and they were chemically treated before they were delivered to the Returning Officers or their authorised agents. He denied that there was any pre-planned scheme to which the Election Commission was a party under which it was intended that respondent—1 who belonged to Congress (R) party should succeed. He also denied that there was any fraud committed with the connivance of the Election Commission in that direction. The witness stated that it was no true to say that the ballot papers used in any constituency had been tempered with or chemically treated or they were replaced by another set of ballot papers which had been chemically treated. It was also denied by this witness that in many of the ballot papers in which votes had been cast in favour of respondent—1 the voting marks had been made with the help of an instrument or mechanical device other than the one provided at the polling station. According to this witness the object of prescribing that the counting of votes should take place on the same day in all the constituencies in India except in West Bengal was to see that the result of the election in any of the constituencies in which poll had taken place did not have any effect on another constituency where poll had not yet taken place. The date of poll in West Bengal was March, 10, 1971. Nothing has been brought out in cross-examination of this witness by the counsel for the petitioner to discredit his testimony. He was however questioned about the discovery of certain ballot papers at Chandigarh at a places where the ballot papers should not have been found. He stated that those ballot papers did not relate to the constituency with which we were concerned and that he had investigated into the same and found that certain number of ballot papers which should have been destroyed by the press had not been destroyed, but had been sold as waste paper to the contractors after March 15, 1971, by which time election in India had been over. Similarly he stated that his investigation into another allegation that certain ballot papers were being removed in two railway wagons bound for Madhya Pradesh also revealed that it did not affect the result of the election in any constituency.

The next witness examined on behalf of the Respondents is R.W.1 in E.P. 2 of 1971 who is again a common witness. His deposition is marked as Exhibit R3 in this case. He is the Assistant Director of Stationary, Government Press, Bangalore. He has stated that the ballot papers which were used at the last Lok Sabha elections in Mysore State were all printed at Government Central Press, Bangalore. The paper which was used for printing ballot papers was purchased by the Government Central Press from Mysore paper Mills Ltd. Bhadravathi. He produced

exhibit R-3 in E.P. 2 of 1971 which was the challan under which the paper was supplied by the Mysore Paper Mills Ltd., Bhadravathi. The paper was received on 1st December, 1970 and from out of that stock of paper, certain quantity was released for purpose of printing ballot papers from 10th February, 1971 and 17th February, 1971. Exhibits R-4 and R-10 in E.P. 2 of 1971 are the indents given by the Assistant Director of Printing for supply of paper. In cross-examination he has stated that the Press did not place order for paper specifically for the purpose of Lok Sabha elections held in March, 1971. In answer to a question regarding the type of paper that was issued for printing the ballot papers the witness stated that cream wove paper had been issued. When his attention was drawn to some discrepancy between Exhibits R-4a and R-6a on the one hand and Exhibits R-5a, 7a, R-8a, R-9a and R-10a, answered that by mistake instead of cream wove paper it might have been written as white paper in Exhibits R-5a, R-7a, R-8a, R-9a and R-10a. The witness stated that he had not noticed the discrepancy in the description of paper referred to above at the time when the paper was issued for printing. He stated that the entire quantity supplied under Exhibit R3 was supplied from one stock.

M. S. Hirannaiah, R.W.-2 in E.P. 2 of 1971 whose deposition is marked as Exhibit R4 in this case, is the Assistant Director, Government Central Press, Bangalore, and he was in charge of the printing of ballot papers. He stated that the programme of printing and despatch of ballot papers was settled by the Chief Electoral Officer in consultation with the Director of Printing as per Ex. R-11 in E.P. 2 of 1971. The said document is signed by the Under Secretary working under the Chief Electoral Officer. This witness stated that he received instructions regarding the printing of ballot papers from the authorised representatives of the Returning Officers. He printed the ballot papers in accordance with Form No. 7A (Ex. 12 to 16 in E.P. 2/71) sent by the Returning Officers. After the proof of the ballot papers in respect of each constituency was approved by the concerned authorised representative of the Returning Officer, the ballot papers were printed and after the ballot papers were printed they were numbered serially from No. 1 to last number of the ballot paper printed for that constituency. After the ballot papers were printed and were cut to size, they were being taken to another portion of the Government printing Press premises, which was known as 'Election Shed' where the ballot papers used to be kept in sealed boxes. There they were checked, counted and bundled into bundles of 500 each. Exhibit R-17 in E.P. 2 of 1971 is the programme of work of printing of ballot papers which was being maintained by this witness.

The said Exhibit R-17 contains the date on which the ballot papers were despatched and according to this witness till the ballot papers were despatched they used to be at the 'Election Shed'. He has further stated that the printing press where the ballot papers were being printed and the 'Election Shed' where the ballot papers were being kept were under the care and protection of the Watch and Ward staff of the Press and police officers whose services were secured for the said purpose at the time when the ballot papers were being printed at the Government Central Press. This witness has been cross-examined at length, but I do not find that anything is brought out is to discredit the testimony of this witness. Sri R. V. Rao, learned counsel for the petitioner, however argued that this witness had not explained the difference in the colour of some of the ballot papers and the use of bigger type of numbers in some cases to print serial numbers of the ballot papers than what were used in the case of other ballot papers. It was open to the petitioner on whom the burden of proof lay in this case to have put the question about them to this witness but he has not done so. It would be unfair

to draw any inference against the witness or the respondents without drawing the attention of the witness to these points raised on behalf of the petitioner. The position of the petitioner in an election petition is not that of an accused in a Criminal case and it is not open to a petitioner in an election petition to raise some point which is likely to lead to some doubt and to claim the benefit of it and on that basis to seek a declaration that the election is void. In fact the position of the petitioner in an election petition is equivalent to the position of the prosecution in a Criminal case. The petitioner cannot take advantage of a circumstance of the above kind.

The next witness examined on behalf of the respondent is M. A. Arham, R.W. 3 in E.P. 2 of 1971, who is again common witness. His evidence is marked as Exhibit R5 in this case. He was an Under Secretary to the Government of Mysore and was in charge of election. He was working under the directions of the Chief Electoral Officer at the last Lok Sabha elections. He has stated that he was visiting the Press nearly 4-5 times every day when the ballot papers were being printed and during the time when the ballot papers were in the premises of the Government Central Press, Bangalore. He was in charge of the supervision of the printing of ballot papers. He was assisted by Allabaksh Inam, Section Officer R.W. 4 in E.P. 2 of 1971 and M. A. Kalburgi, a Senior Assistant. His duty was to see that ballot papers were printed and despatched well in time through the authorised representatives of the Returning Officers after they were duly checked, scrutinised and bundled at the Government Central Press. R.W. 4 in E.P. 2 of 1971 is Allabaksh Inam whose evidence is marked as Exhibit R6 in this case. He was the Section Officer who was assisting M. A. Arham referred to above. His evidence corroborates the evidence of M. A. Arham.

M. L. Ramanna, R.W. 5 in E.P. 2/71 who is again a common witness and whose evidence is marked as Exhibit R7 in this case, is the police Officer who was security arrangements at the Government Central Press, Bangalore, at the time when the ballot papers were being printed for the last Lok Sabha elections. His evidence is that from 12th February, 1971 to 3rd March, 1971 had made necessary security arrangements. He had posted one Head Constable and 3 Constables to be in charge of the security of Government Central Press and they had to be in charge of security of the Press all the 24th hours during that period. No doubt the police Officers used to do their job by turns along with the members of the Watch and Ward staff of the Government Central Press. He has stated that he was visiting the premises of the Government Central Press occasionally to verify whether the persons who had been entrusted with the duty of looking after the premises of the Press were doing their job properly or not.

S. S. & Patil who has been examined as R.W.1 in this case was the authorised representative of the Returning Officer of Dharwar-North Lok Sabha Constituency in connection with the election held in the month of March 1971. He had been deputed to go to Government Central Press, Bangalore and attend to the supervision of the Printing of the ballot papers and to take delivery of the ballot papers after they were printed and made ready for delivery. His evidence is that he came to Bangalore on the 11th February, 1971 to attend to the work of printing of ballot papers at Government Central Press and along with him he had brought 4 officers to assist him. This witness approved the proof of the ballot papers and after it was so approved, the ballot papers were printed. After the ballot papers were printed, he had to verify each ballot paper with the help of his assistants and after verification all the ballot papers were put into deal wood boxes for purposes of being carried to Dharwar. The printing and counting of ballot papers went on at the Government Central press from 12th February, 1971 to 18th February, 1971 and the ballot

papers were delivered to him on 19th of February, 1971. He has sworn that during that period the ballot papers were not removed from the premises of Government Central Press to any other place. This witness carried the ballot papers with police escort to Dharwar. In the course of the cross-examination of this witness, it was elicited that he used to work between 7 A.M. to 9 P.M. and he had no control over the security arrangement at the Press. It was argued that after 9 P.M. what had happened to the ballot papers could not have been known to this witness. On reading the evidence of this witness and the other witnesses examined on behalf of the respondents as a whole, I am satisfied that adequate arrangements had been made regarding the security of the ballot papers at the Government Central Press and the ballot papers were never removed from the premises of the Government Central Press until they were actually delivered to the authorised representatives for the purpose of being carried to the constituencies.

Shri R. V. Rao, learned counsel for the petitioner, urged that the Chief Electoral Officer had not produced the sample of the paper used for the printing of ballot papers which had been retained at the Government Central Press, Bangalore, even though he was called upon to do so by the petitioner, and, therefore, an adverse inference should be drawn against him. In reply to the memo of the petitioner calling upon the Chief Electoral Officer to produce the said sample paper, the Additional Government Advocate had stated that the paper was with the Government Central Press and the petitioner could take steps to summon it. Neither the Director of Government Central Press nor the State of Mysore is a party to this petition and the Government Central Press is not under the control of the Chief Electoral Officer. It was open to the petitioner in these circumstances to have taken steps to summon the said paper from the Government Central Press which he has not done. No adverse inference can therefore be drawn against the Chief Electoral Officer on this ground.

It was next contended by the counsel for the petitioner that the chemical analysis of the ink that was used at the polling stations for the purpose of making the voting marks on the ballot papers had not been produced by the Election Commission. The petitioner cannot make a grievance of this because he had not asked the Election Commission to produce the same. One other ground urged by Sri. R. V. Rao was that the Stock Ledger of the Government Central Press, Bangalore, had not been produced by the Chief Electoral Officer. As already stated the Chief Electoral Officer could not be called upon to produce any document which was in the custody of the Government Central Press. Hence the petitioner cannot also make a grievance of it.

The allegation that many of the ballot papers had been removed from the premises of the Press to some other place after they were printed and before they were delivered to the agents of the Returning Officer for purposes of treating them chemically is baseless. I also hold that the allegations made by the petitioner against the Election Commission in the petition are untrue.

It is significant that the petitioner did not make any enquiry at the Government Central Press, Bangalore, to find out whether the ballot papers had at all been removed to some other place. It may be mentioned here that the Government Central Press, Bangalore was a department of the State Government and during the relevant time, the Government in the State of Mysore was being run by the members of the Indian National Congress (O) party. It is, therefore, very difficult to accept the case of the petitioner that in collusion with or with the connivance of the Election Commission somebody was able to treat these papers chemically.

The petitioner has also not placed before the court any positive evidence to show that the ballot papers had been taken out of the premises of the Government Central Press by somebody with the object of chemically treating them and replacing them by another set of chemically treated ballot papers.

At this stage, I may refer to the prayer made by the petitioner in an Interlocutory Application seeking the permission of the Court to recall O.P. Dharmaraj again and to allow the ballot papers used at the election to be subjected to a chemical examination. I am of the opinion that in the circumstances of this case, no case has been made out for any further investigation in this case. The said Interlocutory Application is, therefore, rejected.

Before recording my findings on Issues I(a), (b) and (c) I propose to refer to one other aspect of this case. Neither in the petition nor in the course of the evidence, the petitioner has suggested any motive which must have prompted the Chief Selection Commissioner to have become a party to the alleged act of chemical treatment of ballot papers. Having regard to the status which is assigned to the Election Commission and the security of tenure guaranteed to the Chief Election Commissioner in the Constitution of India, it is very difficult to believe that the Chief Election Commissioner was interested in one political party as against others. It appears that when the petitioner and several others who opposed the Congress (R) party, failed very badly at the election even in places where they were sure of their success and being unable to explain the cause of their failure, were in search of an alibi, the theory that the elections were rigged by resorting to chemical treatment of ballot papers which was the figment of the imagination of a deeply disappointed person with a fertile brain and which was given wide publicity just before the time for filing election petitions was over, was readily adopted by them as a ground to challenge the elections of some successful candidates. It is unfortunate that such grave allegations have been made in these proceedings without due verification. It is significant that the petitioner was not able to furnish any particulars about any of the persons involved in the alleged corrupt practice, but only relied upon the evidence of some witnesses who have given evidence regarding some peculiar features which they observed in some of the ballot papers at the time of counting. The result of visual examination of the ballot papers, both used and unused, and the other material which is available in the case totally belie the story that the ballot papers had been chemically treated and lead me to the conclusion that the allegation that certain peculiar features were observed by the witnesses for the petitioner at the time of counting must have been invented an after thought to suit the theory that the success of the Congress (R) party was on account of the chemical treatment of ballot papers. After giving my anxious consideration to all aspects of this case, I feel that the allegations made against the Election Commission and the officials connected with the election process are wholly unjustified. I fully exonerate the Chief Election Commissioner, the Chief Electoral Officer, the Returning Officer and all other officers who were entrusted with the duties connected with the election of all the charges and other veiled and sinister suggestions made against them.

I, therefore, hold on Issue No. I (a) that the petitioner has failed to prove that the rubber stamping on the symbol of 'calf and cow' on large number of ballot papers used in the election had been made by a mechanical process on chemically treated ballot papers, and not by voters, and on Issue I (b) that the petitioner has failed to prove that an appreciable percentage of ballot papers were removed from Bangalore to New Delhi before the election and that

the ballot papers so removed to New Delhi were brought back after subjecting them to chemical treatment to be used in the election. Issue No. I(c), therefore does not survive.

Issue No. VII

The next issue for consideration is Issue No. VII viz., whether the Election Commission is a necessary party to the Election petition. It was contended by Sri S. C. Sundara Swamy, learned counsel for respondent-2 that in view of Section 82 of the Representation of People Act, it was not open to the petitioner to implead any person other than the candidate as respondent to the petition. On going through Section 82, I feel that the said section only prescribes that all the contesting candidates should be made parties to an election petition. It does not say that no other person should be made party to the election petition. When allegations of corrupt practice are made in an election petition against some persons other than a candidate, there is nothing wrong in impleading them as parties even at the stage of the presentation of the petition. It may be mentioned that under Section 99 of the Representation of People Act if the Court trying an election petition wants to hold a person other than a candidate guilty of corrupt practice it has to issue a notice to him and then decide the said question. That only shows that persons other than the candidates could be made parties to an election petition. Even if it is to be held that the Election Commission was not a necessary party, I feel that the Election Commission, in the circumstances of this case, was a proper party. I, therefore, hold on Issue No. VII that respondent-2—Election Commission of India is a proper party though not a necessary party to the petition.

Issue No. X

In view of my findings on Issue No. I (a), (b) and (c), this petition fails and is dismissed.

In view of the baseless allegations made in the petition, I feel that in the circumstances of the case, the petitioner should be directed to pay by way of costs Rs. 650/- to respondent-1; Rs. 650/- to respondent-2 and Rs. 650/- to respondent 3 and 4, together.

Sd/- E. S. Venkataraman, Judge.
Dated, 7th December, 1971.

[No. 82/MY/1/72.]

By Order,
V. NAGASUBRAMANIAN, Secy.

New Delhi, the 23rd June 1972

S.O. 2406.—In pursuance of section 160 of the Representation of the People Act, 1951, the Election Commission hereby publishes the order, pronounced on the 10th November, 1971, by the High Court at Calcutta in Election Petition No. 5 of 1971.

Election Petition Case No. 5 of 1971

IN THE HIGH COURT AT CALCUTTA ELECTION PETITION JURISDICTION

Present:

The Honourable Mr. Justice Sankar Prasad Mitra
November 10, 1971

Rathindra Kumar Ghosh—Petitioner.

Versus

T. P. Bhattacharjee & ors.—Respondents.

The Court.—In this petition the election of the respondent No. 2 from the North East Calcutta Parliamentary Constituency has been challenged. The election was held on the 10th March, 1971. The election petitioner is one of the electors in the said constituency. There were three candidates in the election, namely, Hiren Mukherjee the respondent No. 2, Piyus Kanti Dasgupta the respondent No. 4 and Balai Chandra Paul, the respondent No. 3. The respondent No. 1 T. P. Bhattacharjee was the Returning Officer. From the final result sheet prepared under the signature of the Returning Officer it appears that the votes received by each of the candidates were as following:

Hiren Mukherjee (the respondent No. 2)—1,13,230 votes.

Piyus Kanti Das Gupta (the respondent No. 4)—1,10,939 votes.

Balai Chandra Paul (the respondent No. 3)—56,590 votes.

It appears further that 11,812 ballot papers were rejected and 32 votes cast on postal ballot papers were also rejected.

The election petitioner prays, *inter alia*, for a declaration that the respondent No. 4 has been duly elected, on a recount of the votes. There are no allegations of corrupt practices in the petition. The petitioner's only grievance is that the counting of votes was not properly done. Various allegations have been made in support of the petitioner's prayer for a recount. Before I come to these allegations, it would be necessary to discuss a few judgments,—particularly of the Supreme Court, which have discussed the nature of averments necessary to entitle an election petitioner to ask either for an inspection of the ballot papers or for a recount. Learned counsel for the respondent No. 2 herein has taken a point of demurrer. His contention is that on the averments made in the petition no order for a recount can be made at all. In several election petitions at present pending in this Court and also in previous years, orders for recounts were made, by consent of parties. But in this petition counsel for the respondent No. 2 was unwilling to make any concessions. He stated that the views expressed by Their Lordships of the Supreme Court from time to time, were so explicit and unequivocal that the election petitioner in this case was bound to fail in his attempt to secure an order for recount.

Let us, therefore, go straight to the Supreme Court's decisions on this subject on which counsel for the respondent No. 2 has strongly relied. In *Ram Sewak Yadav vs. Hussain Kamil Kidwai*, AIR 1964 S.C. 1249 the election petitioner made the following allegations:

"1. that there had been improper reception, rejection and refusal of votes at the time of counting, and in consequence thereof the election was materially affected;

2. that there were discrepancies between the total number of votes mentioned in Form 16 and Form 20;

3. that the tendered votes were wrongly rejected by the returning officer and on that account the election was materially affected;

4. that at the polling station No. 29 at Majgawan in Bhitauli Unit and Kursi Polling Station in Kursi Assembly Unit, the polling officers did not give ballot papers to the voters;

5. that counting of votes of Bhitauli Assembly Unit continued till 8-30 p.m. in insufficient light notwithstanding the protest lodged by the petitioner; and

6. that on a true count he (the election petitioner) would have received a majority of valid votes and that he was entitled to be declared duly elected."

At the trial before the Tribunal the parties did not lead any oral evidence. With regard to the pleas 3, 4 and 5 the burden of proof lay upon the petitioner; but he led no evidence to substantiate them. The tribunal was of the view that the election petitioner could have

discharged the burden of proof to establish that there were discrepancies between the original and the certified copies of Forms Nos. 16 and 20 but he did not call for the original forms and his second ground must also fail. Kidwai the election petitioner claimed that he would succeed in establishing his case on pleas Nos. 1 and 6 from the ballot papers and submitted that an order for inspection of the ballot papers he made and that he be permitted to show from the ballot papers that the returning officer had improperly received, refused or rejected the votes, and that on a true count he would get the largest number of valid votes. The Tribunal rejected the application for inspection. The High Court, however, was of opinion, *inter alia*, that the Tribunal rejected the application for inspection without adequate reasons. The matter then went to the Supreme Court. The Supreme Court's views relevant for our purposes in the present application, have been expressed in paragraphs 5, 6 and 7 of the judgment of Shah J. at pages 1251 and 1252. The relevant observations are as follows:

"5...The Tribunal rightly rejected this plea (the pleas of inspection), for by the mere production of the sealed boxes pursuant to its order the ballot papers did not become part of the record and they were not liable to be inspected unless the Tribunal was satisfied that such inspection was in the circumstances of the case necessary in the interests of justice.

6. An election petition must contain a concise statement of the material facts on which the petitioner relies in support of his case. If such material facts are set out the Tribunal has undoubtedly the power to direct discovery and inspection of documents with which a civil court is invested under the Code of Civil Procedure when trying a suit. But the power which the civil Court may exercise in the trial of suits is confined to the narrow limits of order 11 Code of Civil Procedure. Inspection of documents under Order 11 Code of Civil Procedure may be ordered under R. 15, of documents which are referred to in the pleadings or particulars as disclosed in the affidavit of documents of the other party, and under R. 18(2) of other documents in the possession or power of the other party. The returning officer is not a party to an election petition and an order for production of the ballot papers cannot be made under Order 11 Code of Civil Procedure. But the Election Tribunal is not on that account without authority in respect of the ballot papers. In a proper case where the interests of justice demands it, the Tribunal may call upon the Returning Officer to produce the ballot papers; and may permit inspection by the parties before it of the ballot papers that power is clearly implicit in sections 100(1) d(iii), 101, 102 and Rule 93 of the Conduct of Election Rules, 1961. This power to order inspection of the ballot papers which is apart from Order 11 Code of Civil Procedure may be exercised, subject to the statutory restrictions about the secrecy of the ballot paper prescribed by sections 94 and 128(1).

7. An order for inspection may not be granted as a matter of course; having regard to the insistence upon the secrecy of the ballot papers, the court would be justified in granting order for inspection provided two conditions are fulfilled:

(i) that the petition for setting aside an election contains an adequate statement of the material facts on which the petitioner relies in support of his case; and

(ii) the Tribunal is *prima facie* satisfied that in order to decide the dispute and to do complete justice between the parties inspection of the ballot papers is necessary. But an order for inspection of ballot papers cannot be granted to support vague pleas made in the petition not supported by material facts or fish out evidence to support such pleas. The case of the petitioner must be set out with precision supported by averments of material facts. To establish a case so pleaded an order for inspection may undoubtedly, if the interests of justice require, be granted. But a mere allegation that the petitioner suspects or believes that there has

been an improper reception, refusal or rejection of votes will not be sufficient to support an order for inspection."

The Supreme Court has held that the allegation of Kidwai the election petitioner that he was satisfied that on inspection and scrutiny of ballot papers he would be able to demonstrate that there had been wrong counting on account of improper reception, refusal or rejection of votes was wholly insufficient to justify a claim for inspection and has reversed the decision of the High Court.

Mr. Chatterjee, Learned Counsel for the respondent No. 4 has urged that in this case the election petitioner had asked for inspection of ballot papers prior to trial on evidence. And the Supreme Court has taken the view that inspection cannot be allowed for fishing out evidence. It is true that the petitioner had not adduced evidence in support of the plea that there was improper reception, refusal and rejection of votes. But on the pleadings that are necessary to support an order of inspection, the general principles have been laid down in this judgment. The petitioner must set out his case with precision supported by averments of material facts. Vague allegations of improper reception, refusal or rejection of votes would not entitle the petitioner to an inspection of the ballot papers having regard to the secrecy of the ballot provided for in the law. As to the power of a Court or Tribunal to direct a trial on evidence though the pleadings are inadequate, there are other judgments which we shall consider a little later.

The next case of the Supreme Court on which reliance was placed by counsel for the respondent No. 2 was the case of *Jagjit Singh vs. Giani Kartar Singh* reported in AIR 1966 S.C. at page 773. In this case one of the prayers in the election petition was for inspection of the ballot boxes and a recount of votes. The Tribunal allowed inspection of the ballot boxes and as result of recount declared the appellant to have been elected. The Tribunal found that the result of the election, so far as it concerned the returned candidate had been materially affected by the improper reception of votes in his favour which were void and by the improper rejection of valid votes polled in favour of the appellant. One of the principal questions before the Supreme Court was whether the Tribunal was justified in allowing inspection of the ballot boxes in this proceeding. In paragraph 31 at page 783 of the judgment the Supreme Court has answered this question. The observations are as follows:

"The true legal position in this matter is no longer in doubt. Section 92 of the Act which defines the powers of the Tribunal in terms, confers on it, by clause (a), the powers which are vested in a Court under the Code of Civil Procedure when trying a suit, *inter alia*, in respect of discovery and inspection. Therefore, in a proper case, the Tribunal can order the inspection of the ballot boxes and may proceed to examine the objections raised by the parties in relation to the improper acceptance or rejection of the voting papers. But in exercising this power, the Tribunal has to bear in mind certain important considerations. Section 83(1)(a) of the Act requires that an election petition shall contain a concise statement of the material facts on which the petitioner relies; and in every case, where a prayer is made by the petitioner for the inspection of the ballot boxes, the Tribunal must enquire whether the application made by the petitioner in that behalf contains a concise statement of the material facts on which he relies. Vague or general allegations that valid votes were improperly rejected, or invalid votes were improperly accepted, would not serve the purpose which section 83(1)(a) has in mind. An application made for inspection of ballot boxes must give material facts which would enable the Tribunal to consider whether in the interests of justice, the ballot boxes should be inspected or not. In dealing with this question, the importance of the secrecy of the ballot papers cannot be ignored. And it is always to be borne in mind that the statutory rules framed under the Act are

intended to provide adequate safeguard for the examination of the validity or invalidity of votes or for their proper counting. It may be that in some cases, the ends of justice would make it necessary for the Tribunal to allow a party to inspect the ballot boxes and consider his objections about the improper acceptance or improper rejection of votes tendered by votes at any given election; but in considering the requirements of justice, care must be taken to see that election petitioners do not get a chance to make roving or fishing enquiry in the ballot boxes so as to justify their claim that the returned candidate's election is void. We do not propose to lay down any hard and fast rule in this matter; indeed, to attempt to lay down such a rule would be inexpedient and unreasonable."

In the next paragraph the Supreme Court has considered the various rules relating to counting and says: "We have referred broadly to the scheme of these Rules to emphasise the point that the election petitioner who is a defeated candidate, has ample opportunity to examine the voting papers before they are counted, and in case the objections raised by him or his election agent have been improperly overruled, he knows precisely the nature of the objections raised by him and the voting papers to which those objections related. It is in the light of this background that section 83(1) of the Act has to be applied to the petitions made for inspection of ballot boxes. Such an application must contain a concise statement of the material facts." The Supreme Court has upheld the High Court's view that the Tribunal was in error in allowing inspection of the ballot boxes.

In this case, therefore, there is an indication that in terms of section 83(1) an election petition asking for a recount should contain material facts as to the voting papers to which objections were raised but were improperly over-ruled. The petitioner should give particulars as to the (a) nature of the objections and (b) the ballot papers to which those objections related.

Counsel for the respondent No. 2 then relied on the Supreme Court's recent judgment in *Jitendra Bahadur Singh vs. Krishna Behari* reported in AIR 1970 S.C. at page 276. In the election petition here, the following allegations were made:

"1. Only one counting agent was permitted at each table whereas three persons were doing the counting work simultaneously and it was impossible for one man to look into and detect the wrong acts of three persons at the same time.

Under this head it was further mentioned that the counting staff was from amongst the Government servants who had gone on two months strike before the election and during the elections they had adopted a hostile attitude towards the congress candidates and had made efforts to bring about their defeat:

2. The bundle of votes of either candidates were neither properly made nor properly scrutinised;

3. About 5000 votes of the Congress candidate were improperly rejected ignoring the protests of Mr. Malhotra, the election agent of the Congress nominee;

4. Invalid votes were counted in favour of the returned candidate. The votes of the Congress candidate were counted for the returned candidate."

The Allahabad High Court made in this case an order permitting inspection of the packets of the ballot papers containing the accepted as well as rejected votes of the candidates. The Supreme Court has set aside this order. In paragraph 7 of the judgment the Supreme Court refers to its earlier decisions reported in AIR 1964 S.C. 1249 and AIR 1966 S.C. 773 (already considered by me) and proceeds to state:

"These and other decisions of this Court and of the High Courts have laid down certain basic requirements

to be satisfied before an Election Tribunal can permit the inspection of ballot papers. They are:—

(1) That the petition for setting aside the election must contain an adequate statement of the material facts on which the petitioner relies in support of his case and (2) The Tribunal must be *prima facie* satisfied that in order to decide the dispute and to do complete justice between the parties, inspection of the ballot papers is necessary."

In paragraph 8 of this Judgment the Supreme Court points out some of the defects in the pleadings I have set out above. The Supreme Court says: "The Trial Court was of the opinion that if an election petitioner in his election petition gives some figures as to the rejection of valid votes and acceptance of invalid votes, the same must (not?) be considered as an adequate statement of material facts. In the instant case apart from giving certain figures whether true or imaginary, the petitioner has not disclosed in the petition the basis on which he arrived at those figures. His bald assertions that he got those figures from the counting agents of the Congress nominee cannot afford the necessary basis. He did not say in the petition who those workers were and what is the basis of their information. It is not his case that they maintained any notes or that he examined their notes, if there were any. The material facts required to be stated are those facts which can be considered as materials supporting the allegations made. In other words, they must be such facts as to afford a basis for the allegations made in the petition. The facts stated in paragraphs 13 and 14 of the election petition and in schedule "E", are mere allegations and are not material facts supporting those allegations. This Court in insisting that the election petitioner should state in the petition the material facts was referring to a point of substance and not of mere form.. The material facts disclosed by the petitioner must afford an adequate basis for the allegations made." In paragraph 9 the Supreme Court considers the effect of section 47 of the Representation of People Act, 1951 and states: "The petitioner did not state in the election petition that any of the counting agents appointed by the Congress candidate or his election agent in accordance with the Rules had been refused admission to the place of counting. Hence the allegation that the returning officer did not permit enough number of counting agents to be appointed is not supported by any statement of facts necessary to be stated. In other words, the material facts relating to the allegations made have not been stated."

In paragraph 10 it is observed: "Now coming to the rejection of the votes polled in favour of the Congress nominee, under the rules before a vote is rejected the agents of the candidates must be permitted to examine the concerned ballot paper. Therefore it was quite easy for them to note down the serial number of the concerned ballot papers. The election petition is silent as to the inspection of ballot papers or whether the counting agents had noted down the serial numbers of those ballot papers or whether those agents raised any objection relating to the validity of those ballot papers; if so who those agents are and what are the serial number of the ballot papers to which each one of them advanced their objections. These again are material facts required to be stated."

Mr. Chatterjee learned counsel for the election petitioner, submits that this judgment of the Supreme Court was delivered in an appeal from an interlocutory order permitting inspection of ballot papers. No oral evidence was taken on the averments in the election petition. The Supreme Court had sent the matter back to the Trial Judge for trial in accordance with law. Moreover, in this case no application was made to the returning officer for recounting. Mr. Chatterjee has urged that in the instant case he wants to adduce evidence justifying the necessity for an order for a recount and the election petitioner should not be deprived of the opportunity of adducing the relevant evidence.

At this stage I only intend to observe that evidence can be adduced only in support of facts alleged in the petition. And if the petition does not contain the material facts, the court cannot allow a party to call witnesses to supply the deficiencies in pleading.

What these 'material' facts are in relation to an order for a recount has been repeatedly pointed out by the Supreme Court in the decisions cited above. It is true that in the last cited case the Supreme Court has directed the trial judge to proceed with the trial in accordance with law. But it seems to me that this direction was given with reference to the other allegations in the petition apart from allegations to support an order for recounting. From the judgment it appears that the election of the appellant was challenged on various grounds but the Supreme Court made it clear that its present judgment was confined only to the allegations relating to the irregularity in the scrutinising and counting of votes. In this connection, I may once again advert to the Supreme Court's views expressed in Jagjit Singh's case reported in AIR 1966 S.C. 773. In this case the Tribunal allowed a recounting and came to the conclusion that the result of the election, so far as the returned candidate was concerned, had been materially affected by improper reception and rejection of votes; but the Supreme Court in unmistakable language deprecates the practice of allowing inspection of ballot papers without material averments. In paragraph 35 at pages 784 and 785 of the judgment the Supreme Court has said: "...The order passed by the Tribunal clearly shows that the Tribunal did not apply its mind to the question as to whether sufficient particulars had been mentioned by the appellant in his application for inspection. All that the Tribunal has observed is that a *prima facie* case has been made out for examining the ballot papers; it has also referred to the fact that the appellant has in his own statement supported the contention and that the evidence laid by him *prima facie* justifies his prayer for inspection of ballot papers. In dealing with this question, the Tribunal should have first enquired whether the application made by the appellant satisfied the requirements of section 83(1) of the Act; and, in our opinion, on the allegations made, there can be only one answer and that is against the appellant. We have carefully considered the allegations made by the appellant in his election petition as well as those made by him in his application for inspection, and we are satisfied that the said allegations are very vague and general, and the whole object of the appellant in asking for inspection was to make a fishing enquiry with a view to find out some material to support his case that the respondent No. 1 has received some invalid votes and that the appellant had been denied some valid votes. Unless an application for inspection of ballot papers makes out a proper case for such inspection, it would not be right for the Tribunal to open the ballot boxes and allow a party to inspect the ballot papers, and examine the validity or invalidity of the ballot papers contained in it. If such a course is adopted, it would inevitably lead to the opening of ballot boxes almost in every case, and that would plainly be inconsistent with the scheme of the statutory rules and with the object of keeping the ballot papers secret. That is why we are satisfied that the High Court was right in coming to the conclusion that the appellant had failed to make out a case for the inspection of the ballot boxes in this case."

In view of these observations of the Supreme Court, I cannot allow the election petition to be tried on evidence, as desired by counsel for the petitioner, unless I am satisfied that the material facts necessary for an order for recounting have been alleged in the instant case in the petition itself. By bringing witnesses into the Witness Box the petitioner cannot be permitted to improve upon his allegations in the petition. Reference may also be made in this connection to the case of *Jamuna Prosad vs. Shri Ramnivas A.I.R. (1959) Madhya Pradesh 226*. It has been observed in paragraphs 12 and 13 of the judgment at page 229 that in the absence of particulars of corrupt practices an election petition cannot be allowed to go to trial. On §

parity of reasoning if "material facts" for recounting are not stated in the petition a trial on evidence cannot be ordered. Oral evidence cannot be adduced to fill up "material facts" which ought to have been alleged in the petition itself.

I may now refer to a few other decisions on which counsel for the petitioner had relied. My attention was drawn to the Supreme Court's decision in *Jagan Nath vs. Jaswant Singh and ors.* reported in 9 E.L.R.; The Supreme Court has held in this case that the provisions contained in section 82 of the Representation of People Act, 1951 that all duly nominated candidates shall be joined as parties to an election petition is only a directory provision. Failure to implead a candidate who has withdrawn his candidature is therefore not a fatal defect, and an election petition cannot be dismissed *in limine* for failure to implead such a candidate. The Supreme Court is of opinion that the Tribunal should proceed in such a case in the manner provided in the Civil Procedure Code, which has been made applicable to the trial of election petitions, and it can permit candidates who have not been impleaded to be made parties to the petition.

Mr. Chatterjee has submitted to me on the basis of the above decision that, like section 82, section 83 is also a merely directory provision and an election petition cannot be dismissed altogether for non-compliance with any of the provisions of section 83.

I have to observe that in the above judgment the Supreme Court reserved its final opinion on matters specifically covered, *inter alia*, by section 83. And so far as order for recount is concerned, I am unable to accept Mr. Chatterjee's view that non-compliance with section 83(1)(a) is not fatal to an election petition in view of the Supreme Court's repeated pronouncements on this subject I have already referred to.

Relyance was then placed on the Supreme Court's decisions in *Bhikaji Keshao Joshi vs. Brijlal Bivani*, 10 E.L.R. 357 and *Harish Chandra vs. Triloki Singh* 12 E.L.R. 461. In the first case the Supreme Court has pointed out that if full particulars of some of the corrupt practices alleged are not given, the Tribunal should call for better particulars and can strike out charges only upon non-compliance with the order for better particulars. In the second case at pages 470 to 471 it has been stated that if the grounds on which an election is sought to be set aside are something other than the commission of corrupt or illegal practices, e.g., when it is stated that the nomination had been wrongly accepted or that the returned candidate was not entitled to stand for election, then section 83(2) has no application and the requirements of section 83(1) are satisfied when facts relating to those objections are stated. The Supreme Court points out that the facts to be stated under section 83(1) are thus different from the particulars which have to be given under section 83(2). When, therefore, an election is challenged on the ground that the candidate has committed the corrupt practices mentioned in section 123 instances constituting particulars thereof will properly fall within section 83(2) and not section 83(1).

These two cases are not relevant for the points under consideration in the present case. It is obvious that there are differences between "material facts" in section 83(1) and "full particulars of any corrupt practice" in Section 83(2). The Madras High Court in *S. Kandaswami vs. S. B. Adityan*, 19 E.L.R. 260 has considered the distinction between "material facts" in section 83(1) (a) and "full particulars of any corrupt practice" in section 83(1)(b). The Madras High Court says: "The section makes a distinction between material facts and particulars. Material facts are those which will go to make out the petitioner's case forming the charge against the respondent. If the material facts constitute a corrupt practice, certain amount of detail would be necessary to ensure clearness. The object of insisting on such details or particulars is to prevent surprise at the trial as otherwise the respondent would not know for certain what is the real point

in dispute. The function of the particulars is therefore to point out or indicate the nature of the defence expected of the respondent. It cannot, however, mean a disclosure of the evidence which the petitioner has to let in."

The Madras High Court in this case has also referred to the decision in *Bruce vs. Odhama Press Ltd.* (1936) I.K.B. 697 at page 712 Scott L.J. has construed the relevant rules of the Supreme Court and has stated that the word "material" means necessary for the purpose of formulating a complete cause of action; and if any one "material" fact is omitted, the statement of claim is bad; it is "demurrable" in the old phraseology, and in the new is liable to be "struck out"; "a further and better statement of claim" may be ordered. Scott, L.J. then goes on to say that the function of "particulars" is quite different. Their function is to fill in the picture of the plaintiff's cause of action with information sufficiently detailed to put the defendant on his guard as to the case he has to meet and to enable him to prepare for trial.

In this case we are concerned with the material facts that must be stated for a complete cause of action for an order for recount and not with particulars of corrupt practice. The Supreme Court's decisions on these "particulars" are not, therefore, apposite for our purposes.

Bearing in mind the Supreme Court's observations in the cases cited above on 'material facts' required in a petition praying for inspection of ballot papers or a recount of votes, let us try to analyse the averments made in the petition in the instant case to see if, in the interest of justice, any order for recount should be made. The relevant allegations are in paragraph 8 of the petition. This paragraph has been verified by the petitioner as "based on information received from Shri Chandra Sekhar Bose the election agent of the respondent No. 4 and his counting agents affidavits from five of whom are annexed to this petition and believed by me to be true." No affidavit of Chandra Sekhar Bose was filed along with the election petition on the 24th April, 1971. The period of limitation prescribed by section 81 of the Representation of the People Act, 1951 expired on the 27th April 1971 and Chandra Sekhar Bose has affirmed a belated affidavit on the 13th July, 1971 which was filed on the 14th July, 1971. In this affidavit (paragraph 1) he says that he attended a bipartite meeting with the management of the Life Insurance Corporation of India which was held in Bombay from the 19th to the 24th April, 1971. He says further that he left Calcutta on the 16th April and came back to Calcutta on the 26th April, 1971. There is no explanation as to why he could not affirm his affidavit between the 27th April 1971 and the 12th July, 1971. Nor is there any explanation as to why he did not affirm his affidavit before leaving Calcutta on the 16th April, 1971 since he was the only person who was in a position to speak generally about improper reception or rejection of votes at the different tables in the counting hall. The five counting agents whose affidavits have been filed with the election petition have no doubt, stated that the allegations in paragraph 8 of the election petition are true to their knowledge but no importance can be attached to this verification inasmuch as a counting agent can only speak of incidents that had occurred at his table and not at other tables. He can, however, speak of some general matters and I shall make my observations on such matters later on.

So far as Chandra Sekhar Bose is concerned I am unable to take any notice of the new facts that he has introduced into his affidavit. The Supreme Court in its recent judgment on "amendments" in the case of *A. K. Gupta & Sons Ltd. vs. Damodar Valley Corporation* AIR 1967 S.C. 96 in paragraph 9 at page 98 has categorically stated that no amendment will be allowed to introduce a new set of ideas to the prejudice of any right acquired by any party by lapse of time.

With these preliminary observations I proceed to examine the allegations in paragraph 8 of the petition. It is stated in paragraph 8(i): "There were a number of transistors inside the counting hall when the counting of the votes was going on and they were brought by the counting agents of respondents 2 and 3. The noise of the transistors seriously interfered with the counting work and the returning officer did not take any steps in spite of requests made on behalf of the respondent No. 4."

Chandra Sekhar Bose in paragraph 3 of his affidavit has made similar allegations; but he proceeds to add what the Supreme Court describes "as a new set of ideas." He says: "It (the operation of transistors "blaring out news and music") was seriously interfering with counting work and the counting assistants were counting negligently and without applying their minds. I saw the counting assistants inserting ballot papers of the respondent No. 4 into the bundles of respondents Nos. 2 and 3. I protested to the returning officer as well as to the assistant returning officer. I also asked them to cause the transistors to be removed. But they did not heed these protests."

It is rather difficult to believe that the returning officer who was the Collector of Stamp Revenue in Calcutta and his assistant returning officer did not take any steps against the playing of transistors in the counting hall even though their attention was drawn to the disturbance that these transistors were creating. The returning officer in paragraph 6(1) of his written statement has specifically denied these allegations. Secondly, in the election petition itself the most vital averments have not been made. There is no statement that the use of transistors in the counting hall by the counting agents of the respondents Nos. 2 and 3 led to miscounting of votes. Chandra Sekhar Bose has attempted to fill in the lacuna by stating a new fact namely, that he saw the counting assistants inserting ballot papers of the respondent No. 4 into the bundles of the respondents Nos. 2 and 3. This fact does not appear in the petition; but even if I take it into consideration the most material fact Chandra Sekhar Bose has omitted to state, namely the actual number of ballot papers that were negligently inserted into the bundles of the respondents Nos. 2 and 3. There are also no particulars of the counting tables at which the alleged insertions had taken place. Then again, it is interesting to note that Chandra Sekhar Bose applied to the returning officer for a recount on the 13th March, 1971. In this application nothing whatsoever is stated about the disturbance caused by the transistors which the counting agents of the other candidates had inducted into the counting hall or the effect thereof. It is true that an election petitioner need not be confined to the grounds urged before the returning officer: vide *Veluswami Thevar vs. Raja Nainar*, 17 E.L.R. 131 at page 189. But if unrestricted use of transistors went on within the counting hall despite protests, it would be but reasonable to expect some kind of allegation to this effect in the application for a recount made to the returning officer. The absence of such allegation, in my view, weakens the election petitioner's case to a great extent. The cumulative effect of all these infractions in the instant case is that I cannot allow a recount on this ground. Mr. Chatterjee, counsel for the petitioner, draw my attention to paragraph 11(1)(d) of the petition. It contains the petitioner's "submission" only that an anarchic situation prevailed in the hall of counting as alleged, inter alia, in paragraph 8(i). I do not think this 'submission' especially relied on by Mr. Chatterjee strengthens the petitioner's case.

In paragraph 8(ii) the allegation is: "On the 11th March, 1971, simultaneous counting was going on in respect of South-Beliaghata, Vidyasagar and Sealdah. On that date the counting in respect of the Cossipore Constituency.....was going on and announcement was being off and on made to the effect that the Congress candidate in that constituency.....was maintaining and/or increasing his lead over.....the C.P.I.(M) candidate. Whenever such an announcement was being

made, the counting-assistants who belonged to the group or groups hostile to C.P.I.(M) crowded round the transistors leaving the counting tables, causing near anarchy to prevail in the counting hall at these moments. The final news of the defeat of.....[C.P.I.(M) candidate] came at about 9 p.m. on the 11th March, 1971 and the counting assistants then burst into applause and joyous shouts and complete anarchy prevailed for about half an hour at that time and the majority of the counting assistants left the counting tables. Even the assistants of the presiding officer at the table where the counting for Vidyasagar constituency was going on left the counting table. Throughout 11th March, 1971 the atmosphere in the counting hall was not congenial for counting."

It is to be observed that in this sub-paragraph there is no specific allegation of miscounting. The petitioner merely complains that there was an uncongenial atmosphere in the counting hall. Chandra Sekhar Bose, however, in paragraphs 5 and 6 of his affidavit has added a few facts. He says that before his 'very eyes' the counting assistants deliberately inserted the respondent No. 4's ballot papers in bunches into the bundles of the respondents Nos. 2 and 3. He adds further that protests were made by him as well his counting agents to the counting assistants, the assistant returning officer and the returning officer; but these protests went unheeded. He alleges that the entire counting was being done in a fraudulent manner and the counting assistants, the assistant returning officer and the returning officer were all obviously hostile to the C.P.I.(M) candidate. Apart from these being new facts, the most remarkable feature is that Chandra Sekhar Bose has omitted to state even approximately how many ballot papers of the respondent No. 4 were 'deliberately' inserted into the bundles of the respondent Nos. 2 and 3. He could have also given particulars of the counting tables at which these incidents had occurred; but he has not chosen to do so. There are also no names of the counting agents who made protests or of the counting assistants to whom the protests were made. And, strangely enough, there is no mention of any of these facts in his

counting to the returning officer. On of this nature, therefore, the Supreme prevent me from making an order for recount. I would add that the returning officer has denied the allegations in paragraph 8(ii) of the petition in paragraph 6(ii) of his written statement. I shall make further observations on the Vidya-sagar Constituency later in this judgment.

In paragraph 8(iii) of the petition it is alleged: "There was an acrimonious wordy duel between the presiding officer at Vidyasagar and his assistants on 11th March, 1971. The exchanges that went on between them, were carried on in such a loud voice that there was serious disturbance to counting and the other counting assistants became visibly unmindful. As stated above, the atmosphere in the counting hall was seriously uncongenial to counting."

These are again vague allegations completely lacking in particulars that go to constitute "material facts" for an order for a recount apart from further comments on the Vidyasagar Constituency which I shall subsequently make.

In paragraph 8(iv) of the petition the statements are: "Both on 11th March, 1971 and 13th March, 1971 counting assistants were paid their remuneration while the counting was going on. At the time of, and during payment of the remuneration, hulla went on and the counting assistants became unmindful to their work, left their tables and were thoroughly negligent in the business of counting. On 13th March, 1971 there was a further hulla, and shouts and counter-shouts were raised for a considerable period of time over the quantum of remuneration. Whereas on 11th March, 1971, the counting assistants were paid at the rate of Rs. 3.00 per day, on 13th March 1971 they demanded more on the ground that the work of counting was strenuous and also prolonged. The demand was raised

to a high pitch and the officers came and went in vain attempt to persuade the counting assistants to resume working. Ultimately the employees became pacified only when they were promised at the rate of Rs. 9.00 per day. This wrangling of the employees and demand of the employees for a higher rate of remuneration went on from 7 p.m. to 9 p.m."

The election petitioner has stated all these facts to create the impression that counting did not take place in the proper atmosphere. But in the remaining statements he has made in this sub-paragraph he fails to state 'material facts' on the basis whereof the court can come to his aid. These remaining statements are: "This incident again shows that counting was carried on in an uncongenial and acrimonious atmosphere of quarrel, debate, struggle for higher wages and also political enthusiasm which was expressed in joyful shouts at the news of the defeat of C.P.I.(M) candidates. All this affected counting and the petitioner has every reason to believe that counting was in this atmosphere, perfunctory. Attention of the counting assistants was also, again and again diverted by the blaring of transistors and also by exciting news broadcast through these transistors."

The Supreme Court has said repeatedly that the secrecy of the ballot cannot be disturbed by in-determinate allegations of this nature. The petitioner's 'belief' is immaterial. What is material is what the petitioner sees or knows and the details thereof.

Chandra Sekhar Bose in paragraph 7 of his affidavit reiterates more or less these vague allegations; but he adds a few new facts which, if stated in the petition with full particulars and supporting affidavits might have persuaded me to think whether some kind of order for recount should be made. He says: "I found at many tables, the counting agents of respondent No. 2 sorting and arranging the ballot papers. Myself and some of my counting assistants, namely, Shri Saibal Ghose and Shri Rajendra Nath Ghose complained to the assistant returning officer and the returning officer, but, as usual the complaints were unattended. These are new facts not stated in the petition. Secondly, there are no particulars of the tables at which he saw the respondent No. 2's counting agents sorting out or arranging the ballot papers. Thirdly, there is no affidavit by Saibal Ghose; but there is an affidavit by Rajendra Nath Ghose filed along with the petition and he does not say that he made any such complaint either to the assistant returning officer or the returning officer. Last but not the least, these allegations do not find any place in Chandra Sekhar's application to the returning officer for a recount. On all these grounds I am unable to agree with Mr. Chatterjee that there can be any order for recount on the footing of what is stated in paragraph 8(iv) of the election petition.

I now proceed to paragraph 8(v). It is alleged: "Each counting table was very narrow and the counting assistants sat with upright wooden pigeon holes. The table was so narrow that only two counting agents could sit by each side of the counting-assistants and on many occasions the counting agents of the respondent No. 4 could not secure any chair by the side of the counting assistants. The chair opposite to the counting assistants was useless for observing and watching the counting because the wooden upright pigeon-hole completely obstructed the sight of the agents. Particularly, when the counting for Burtolla Constituency was done on 13th March, 1971, from the beginning to the end, from about 8-30 a.m. on 13th March to 1 a.m. on 14th March 1971, no counting agent of the respondent No. 4 could sit on either side of the counting assistants (who) belonged to group or groups hostile to C.P.I.(M), irregularities were committed in counting and ballot papers in favour of the respondent No. 4 had been bound and mixed with ballot papers in favour of the respondent No. 2 and the respondent No. 3 and the result of the counting was thereby grossly affected. It was not possible for counting agents to observe the counting from behind the counting assistants, just because there was no room for standing."

These are worthless allegations and Court can take any notice of them. In the election petition the petitioner has repeatedly said that he had made various complaints to the returning officer or the assistant returning officer; but, it is interesting that, in the case of allegations in this sub-paragraph he does not say that the attention of the said officers or any of them was drawn to the inconveniences of the counting agents of the respondent No. 4 complained of herein. Nor have these facts been referred to in Chandra Sekhar Bose's application for recounting. Moreover, the sub-paragraph suffers from a palpable contradiction. If the counting agents of the respondent No. 4 were unable to observe the counting, how could they see that the ballot papers of the respondent No. 4 were mixed up with the ballot papers of the respondents No. 2 or 3? In any event, no particulars of these ballot papers at all have been stated in this sub-paragraph. On these allegations, therefore, there can be no order in favour of the petitioner.

We now come to paragraph 8(vi). It is stated: "Doubtful and/or rejected votes were disposed of by the returning officer in the absence of the election agent of the respondent No. 4 and of the respondent No. 4 and/or any of his counting agents."

This sub-paragraph contradicts sub-paragraph (xvi). In this sub-paragraph the allegation is: "A large number of votes amounting to 11,812 were rejected and those included a large number cast in favour of the respondent No. 4 which were improperly rejected without any valid reason. If those had not been rejected, the respondent No. 4 would have received substantially more than 2,447 votes by which he was defeated by respondent No. 2. Similarly votes which should have been rejected have been counted in favour of respondent No. 2."

There cannot be an order for a recount on the basis of paragraph 8(vi) as it contradicts paragraph 8(xvi). If doubtful or rejected votes were disposed of in the absence of the respondent No. 4 and his election agent and his counting agents, the election petitioner's statements in paragraph 8(xvi) were wholly unwarranted. There cannot also be an order for a recount on the basis of sub-paragraph (xvi) inasmuch as these are but vague allegations without any details of the ballot papers of the respondent No. 4 actually rejected or those in favour of the respondent No. 2 improperly accepted.

Let us now go to paragraph 8(xvi). Here it is stated: "That the members of the counting staff were intensely hostile to the candidates of Communist Party (Marxist). In course of counting, a large number of valid votes cast in favour of the respondent No. 4 were not counted as valid votes and similarly a large number of invalid votes which should not have been counted in favour of respondents 2 and 3 were counted as valid votes in favour of the said respondents."

The petitioner has been complaining over and over again of the hostility of the counting assistants. No such complaint was made in the application for recount to the returning officer. Assuming that such hostility existed, the Court cannot direct a recount of votes unless it is satisfied that as a result of the hostility the counting was not properly done. And it is for the election petitioner to state the 'material facts' which lead to that conclusion. In the instant case such material facts have not been pleaded. A counting assistant may be against a particular political party; but the Court must be convinced that in the discharge of his duties as counting assistant, he had acted in a manner prejudicial to that party's interests. Far from giving the 'material facts' the election petitioner has only made vague allegations in the rest of this sub-paragraph and has given no particulars of the valid votes which were not counted and the invalid votes which were counted.

In paragraph 8(viii) the averment is: "That, while bundles of 50 ballot papers each were being made in favour of the different candidates, ballot papers cast in

favour of the respondent No. 4 were put inside the bundles made for the respondents Nos. 2 and 3 and, as the ballot papers were folded, the counting agents of the respondent No. 4 were not able to check from the outside that the bundles made for the respondents 2 and 3 concealed the ballot papers cast in favour of the respondent No. 4."

There could not have been better instances of wild and vague allegations which the Supreme Court has time and again discouraged and I am unable to act on them.

In paragraph 8(ix) it is alleged: "that such concealment of ballot papers cast in favour of the respondent No. 4 in the bundles made for the respondents 2 and 3 occurred on a large scale in—Burtolla Constituency and Vidyasagar Constituency. As stated in the foregoing paragraph 8(v) the counting agents of the respondent No. 4 were not in a position to catch the counting because they did not get any seat by the side of the counting assistants. When counting was going on in Vidyasagar Constituency on 11th March, 1971, the counting agents of the respondent No. 4 left the counting hall at about 8 in the evening in protest against the fraudulent operations of the counting assistants who were committing the illegalities mentioned above. They left when the returning officer did not heed their protest."

These are but reckless allegations. The petitioner himself is saying that the respondent No. 4's counting agents were unable to watch the counting for the Burtolla Constituency. So far as Vidyasagar is concerned in the petition it is stated that the respondent No. 4's counting agents left at 8 p.m., but in the application for recount to the returning officer Chandra Sekhar Bose has said that when the votes of the Vidyasagar Constituency were counted, the counting agents of the respondent No. 4 'could not present' inside the counting hall and Chandra Sekhar has "reasons to believe that error in counting has occurred." It is obvious that the petitioner is not entitled to an inspection of the ballot papers on such vague and self-destructive allegations.

In paragraph 8(x) it is averred: "The procedure adopted at the counting was to bind all the ballot papers in a Constituency after getting them out of the ballot boxes in bundles of 25 and then to mix them up in a drum and thereafter to distribute these bundles to different counting tables. These bundles were then opened and the counting assistants placed the ballots in the pigeon holes marked for the respective candidates according as they have been cast in favour of one candidate or the other. There were two other pigeon holes for rejected ballot papers and doubtful ballot papers. The counting assistants who were mostly hostile to the Communist Party (Marxist) and therefore to the Respondent No. 4 quietly slipped the ballot papers marked in favour of the Respondent No. 4 into the pigeon holes marked for Respondent Nos. 2 and 3. Thereafter separate bundles of 50 each were made of the ballot papers respectively for the Respondent No. 4, Respondent No. 2 and Respondent No. 3 according to the pigeon holes wherefrom they were picked and in those bundles the ballot papers were so folded that from the outside none could see to whom the ballot papers were marked. The petitioner states that many bundles purporting to contain votes of Respondent No. 2 comprised of ballot papers marked to the Respondent No. 4. Such things particularly happened in Burtolla and Vidyasagar Constituency because, as stated above, the counting agents of the Respondent No. 4 could not watch the counting at Burtolla Constituency and they left in protest when Vidyasagar Constituency was being counted. Part II of form 16 is filled in on the basis of the result of the counting of the bundles of accepted ballot papers. Form No. 20, the final result sheet, is prepared on the basis of form No. 16 and Form No. 21 the result of election is prepared on the basis of the entries in Form No. 20. As Form No. 16 was not, and could not be correctly filled in because the entries therein are filled on the basis

of bundles, the bundles being in this way incorrectly grouped, the result of the election has been wrongly declared."

These are instances of another set of wild allegations. There are no figures, no details of specific instances, no names of persons who have watched the misdeeds of the counting assistants and no reference to any notes kept by them contemporaneously. Moreover, it is not even alleged in this sub-paragraph that any protests were lodged on behalf of the respondent No. 4. Then again, there are special references to the Burtolla and Vidyasagar Constituencies. With regard to Burtolla, the election petitioner's case is that the respondent No. 4's counting agents could not watch the counting owing to defective arrangements: vide paragraph 8(v). So far as Vidyasagar is concerned, I have already pointed out that the case appears to be that no one was present on behalf of the respondent No. 4. In these circumstances, no order for inspection of ballot papers can be made on these allegations.

In paragraph 8(xi) it is pleaded: "That many bundles of ballot papers cast in favour of the respondent No. 4 though purporting to be of 50 each, actually contained more than 50 such papers whereas on the other hand similar bundles of the respondent No. 2 and 3 contained in many cases less than 50 ballot papers."

These are but bald assertions of which I can take no notice.

In paragraph 8(xii) it is stated: "that the respondent No. 1, the returning officer was not able to exercise supervision over the acceptance of ballot papers by the counting assistants and he would scrutinise only those ballot papers which were taken to him by the counting assistants or which were placed as doubtful ballot papers before him. In fact, neither the returning officer nor any assistant returning officer was present when the counting went on and the returning officer only came to the hall at the time of announcement of the result. He was keeping within his chamber in the building. The counting assistants who were politically hostile to the Communist Party (Marxist) candidate accepted even invalid ballot papers in favour of the respondents 2 and 3 and counted them as valid votes.

The returning officer has denied the allegations against him and his assistants in paragraph 8(xii) of his written statement. His case appears to be, broadly speaking, that each counting hall was under the charge of two assistant returning officers who were present all through. The returning officer also was moving from hall to hall. At each counting table there were two counting assistants and one counting supervisor. The work of the supervisor was to maintain general supervision over the counting assistants. In my opinion, the returning officer could not have made better arrangements than this having regard to the circumstances involved. It is not possible for a returning officer and his assistants to watch constantly the performances of the counting assistants and their supervisions. The relevant rules do not also envisage such supervision. The real grievance of the petitioner seems to be that counting assistants hostile to the Communist (Marxist) party candidate accepted invalid ballot papers in favour of the respondents 2 and 3 and counted them as valid votes; but he has given no particulars whatsoever of these invalid ballot papers. And in the absence of such particulars the Supreme Court has discouraged the practice of allowing inspection of ballot papers the secrecy whereof, according to their Lordships of the Supreme Court, has to be preserved as far as possible.

In paragraph 8(xiii) the averment is: "That when the counting was in process, the respondent No. 4's election agent, his counting agents and the respondent No. 4 himself gave objections to the process and the various irregularities and illegalities that were being committed during the counting but the returning officer paid no heed to those objections. When written objections were submitted to him, he refused to give

receipts for those objections. An application for recount was also given to him but that was also rejected by him. The returning officer also insisted that in the application for recount, allegations of faulty process or counting and allegations against the counting assistants should not be included and that, if such allegations were included, he would not accept such application. Accordingly the election agent of the respondent No. 4 was compelled to exclude from that application the allegations made in foregoing sub-paragaphs of this paragraph 8 as otherwise the returning officer would not accept the application for recounting." In the context of the vague and reckless allegations which the election petitioner has made in the foregoing sub-paragaphs of paragraph 8, it is difficult to place any reliance on the charges against the returning officer in sub-paragaph (xiv). The returning officer has denied all these allegations in paragraph 6(xiii) of his written statement. If there was any truth in these allegations, the election petitioner, one can naturally expect, would have disclosed or annexed copies of the written objections which were filed on behalf of the respondent No. 4. The names of the counting agents who made objections, should have also been disclosed and the precise nature of each of their objections should have been pleaded. I shall also make my comments on the application for recount to the returning officer a little latter part from what I have stated here.

I proceed now to paragraph 8(xiv). Here, it is stated: "That forms 16 and 20 were incorrectly filled in and the number of votes respectively secured by the respondent No. 4 has been wrongly stated."

The allegations are too indefinite to be taken into consideration. There are no particulars of the errors that were committed.

In paragraph 8(xv) the pleading is: "Two ballot boxes of the Burtolla constituency were found tampered with. Their seals were broken and signed papers torn. The presiding officer of Burtolla Constituency at first ordered that the votes contained in the aforesaid tampered boxes would not be counted but later he revoked this order and the votes were counted. While the first order was proper, the order revoking the previous order was unreasonable and passed without any reason and without hearing the respondent No. 4 or his election agent or his counting agent. Moreover, when the order was revoked and the tampered ballot boxes were counted the returning officer was not in sight and the respondent No. 4 has reason to believe that no reference was made to him."

The returning office in paragraph 6(vi) of the written statement has denied these allegations. Quite legitimately, he has stated further. "It is significant that no such allegation was ever brought to the notice of the returning officer by anybody at the time of or after the counting."

To my mind, no seriousness can be attached to the allegations in paragraph 8(xv). It is not the petitioner's case that any one complained to the returning officer on behalf of the respondent No. 4 that ballot papers in two tampered ballot boxes were being counted. The complaint was not made even in the application for recounting to the returning officer. Moreover, no particulars of these ballot boxes have been given in the petition. Each ballot box, it is common knowledge, contains the votes of persons residing in specified areas. It was not at all difficult for the petitioner to tell the Court which these areas were. The petitioner could have also given particulars of the polling stations and the room numbers thereof in which these ballot boxes were placed. In any event, it is not the petitioner's case that the result of the election has been materially affected by the irregular counting complained of. I am not, therefore, inclined to make an order for a recount on these allegations.

These are all the sub-paragaphs of paragraph 8 of the petition. Broadly speaking, therefore, the petition does not contain the 'material facts' on which a prayer

for recount can be allowed. Even when an attempt has been made to relate some 'material facts', such attempts are half hearted and are often self destructive. In a case like this, in view of the Supreme Court's interpretation of section 33(1)(a) of the Representation of the People Act, 1951, no order in favour of the petitioner can be made.

Before I conclude, however, I wish to make a few other observations. I have said that an election petitioner is not bound by the allegations made in an application for recounting; but it is legitimate to look into such application to see what precisely the grievances were when the returning officer was asked to make a recount. In the instant case the grounds urged are as follows:—

1. When the votes of the Vidyasagar Constituency were being counted the respondent No. 4's counting agents "could not be present." The election agent, therefore, has "reasons to believe that error in counting has occurred."

2. A large number of votes in favour of respondent No. 4 have been improperly rejected.

3. A good number of invalid votes in favour of Prof. Hiren Mukherjee have been accepted.

4. The new system of counting has caused some confusion and there is every chance for a good number of ballot papers either having been issued during counting or being doubly counted.

The election agent has requested the returning officer to direct a recount of votes "in respect of all the constituencies and particularly of Vidyasagar."

It is, indeed, surprising that there are no references in this application to (i) disturbances created by transistors; (ii) joyous or triumphant shouts on the victory of a Congress candidate; (iii) unseemly wordly duels between officers and counting assistants over remuneration; (iv) invisibility of counting due to up-right pigeonholes; (v) shortage of sitting accommodation to permit proper checking; (vi) inherent hostility of the counting staff to the CPI(M) candidate; (vii) tampering of ballot boxes of the Burtolla constituency; and (viii) protests against irregularities written or oral.

These omissions are significant and no credence can be attached to the petitioner's explanation that the returning officer was unwilling to accept the application unless all these charges were omitted. I do not believe that a candidate contesting for Parliament or his election agent can be cowed into submissiveness by a persistently hostile returning officer particularly after he has declared the result of the election. It is not also the petitioner's case that the respondent No. 4's election agent did not have or was not given reasonable or sufficient time to draft the application for recount.

I have already made a few remarks on the verification of paragraphs 8 and 11 of the petition. The supporting affidavits of the five counting agents are more or less identical. These counting agents do not give their admit card numbers nor do they give any particulars of the counting tables which they attended. They have said that all the statements made in paragraph 8 of the petition are true to their knowledge. And it is difficult to appreciate how one counting agent can speak of happenings at counting tables which he never attended. They also do not say that they conveyed any information to Rathindra Kumar Ghose, the election petitioner. The point I wish to make is that the verification both of the petition and of the supporting affidavits is so infirm that the petitioner ought not to succeed.

I have stated that Chandra Sekhar Bose the election agent of the respondent No. 4 has filed an affidavit after the expiry of the period of limitation. He has introduced, I have already said, many new facts into this affidavit which do not find any place in the petition. For instance, in paragraph 3 he says that he

protested to the assistant returning officer against the use of transistors; in paragraph 5 he speaks of counting agents of respondent Nos. 2 and 3 bringing into the counting hall news of the lead of the Congress candidate over a C.P.I.(M) candidate in an assembly constituency contradicting thereby the statements made in paragraph 8(II) of the petition; he speaks, further in this paragraph of deliberate insertion of the respondent No. 4's ballot papers into the bundles of ballot papers of the respondent Nos. 2 and 3 in spite of protests; and of the returning officer and the assistant returning officer being hostile to the C.P.I. (M) candidate which are all improvements on the petition. These embellishments give me the impression that Chandra Sekhar Bose has made a desperate attempt to put life into a dead petition or to inject vitality into it. But his affidavit also suffers from vagueness. For instance, in paragraph 3 he complains that he saw the counting assistants inserting ballot papers of the respondent No. 4 into those of the respondent Nos. 2 and 3; but he does not say how many ballot papers were inserted or at which table these insertions were done.

In paragraphs 4 and 5 he repeats the same statements without any particulars. In paragraph 6 he complaints of uncongenial atmosphere in the counting hall for the counting agents of the respondent No. 4. Apart from the vagueness of this allegation, he did not choose to give even an indication of it in his own application to the returning officer. In paragraph 7, as I have already pointed out, he gives the names of two persons, namely, Saibal Ghose and Rajendra Nath Ghose who are stated to have made complaints to the assistant returning officer and the returning officer that at many tables the counting agents of the respondent No. 2 were sorting out and arranging the ballot papers. Saibal Ghose has not affirmed any affidavit at all. Rajendra Nath Ghose has affirmed an affidavit on the 24th April, 1971; but he does not state this fact. Moreover, there is no averment as to how many counting agents of the respondent No. 2 had been handling the ballot papers and at how many tables such incidents were taking place. In other words, there are no figures at all. In paragraph 8 he makes the complaint that the counting assistants, while counting the ballot papers of the Burdolla Constituency, were fraudulently transferring ballot papers of the respondent No. 4 to the bundles of the respondents Nos. 2 and 3. No particulars of the fraud alleged have been pleaded. There is no mention of table numbers or of the number of ballot papers fraudulently transferred. In paragraph 9 he contradicts his own application to the returning officer for recount. In that application he said that when the votes of the Vidyasagar Constituency were counted, the respondent No. 4's counting agents "could not be present." In paragraph 9 of his affidavit he says that the counting started at 9 A.M. and the counting agents left at 8 P.M. when they found that their protests were useless. In paragraph 10 he brings the charge against the returning officer that he substantially accepted the rejections of ballot papers by the counting assistants. The intention is to convey to the Court that the returning officer did not apply his own mind in rejecting ballot papers. This statement contradicts paragraph 8(vi) of the petition in which the election petitioner categorically states that when the returning officer disposed of doubtful and/or rejected votes neither the respondent No. 4 nor his election agent nor any of his counting agents was present. In paragraph 11 for the first time it is stated on behalf of the election petitioner that in the two ballot boxes of the Burdolla Constituency which have been tampered with there were about 900 ballot papers. But there are no particulars as to how many ballot papers were accepted as valid in favour of each of the candidate contesting the elections and how many were rejected. And as I have already stated earlier, the result of the election it appears, was not materially affected by such counting. In paragraph 11 Chandra Sekhar also states that more than 3,000 ballot papers of the respondent No. 4 were illegally rejected. When the election petitioner's case is that these rejec-

4 or any one else on his behalf this allegation is of no substance. And it is, indeed surprising that Chandra Sekhar verifies this statement to be true to his knowledge.

The position, therefore, is that even if Chandra Sekhar Bose's affidavit had been filed within time one would be inclined to hold that it did not satisfy the requirements for an order for a recount, which the Learned Judges of the Supreme Court had insisted on. In the cases cited above.

Mr. Arun Prakash Chatterjee, learned counsel for the election petitioner, ultimately relied on the statements made in the recrimination petition of the respondent No. 2 wherein various irregularities in counting have been alleged. Learned Counsel's contention is that the respondent No. 2 himself admits that counting was not properly made. Unfortunately, for the election petitioner, in this recrimination petition, no fact has been stated which materially affects the result of the election so far as the returned candidate is concerned. On the contrary, the returned candidate complains that many of his votes were wrongfully rejected and on a recounting it would be found that he had secured a larger number of votes. On the basis of averments only in the recrimination petition, therefore, I cannot make an order for a recount in favour of the election petitioner.

In Halsbury's Laws of England, 3rd Edition, Vol. 14, at page 310, Art 559, it is stated that a recount is not granted as of right, but on evidence of good grounds for believing that there has been a mistake on the part of the returning officer. Our Supreme Court particularly in the decisions reported in AIR 1964 S.C. 249, AIR 1966 S.C. 773 and AIR 1970 S.C. 276, has laid down what a petition for a recount must contain to enable the petitioner to succeed. In the light of these principles the present petitioner is not, in my opinion, entitled to the order he has asked for.

In the result, this election petition is dismissed. The election petitioner will pay to the respondent No. 2 Rs. 750.00 as costs of this petition and will also pay to the respondent No. 1 Rs. 250.00 as costs.

(Sd.) SANKAR PRASHAD MITRA,

[No. 82/WB/HP/5/72.]

By Order,

A. N. SEN, Secy.

MINISTRY OF FINANCE

(Department of Expenditure)

New Delhi, the 23rd June 1972

S.O. 2407.—In exercise of the powers conferred by the proviso to article 309 and clause (5) of article 148 of the Constitution, and of all other powers enabling him in this behalf, the President, after consultation with the Comptroller and Auditor General of India in respect of persons serving in the Indian Audit and Accounts Department, hereby makes the following rules further to amend the Contributory Provident Fund Rules (India), 1962 namely:—

- (1) These rules may be called the Contributory Provident Fund (India) Amendment Rules, 1972.
- (2) They shall come into force on the date of their publication in the Official Gazette.

2. In the Contributory Provident Fund Rules (India), 1962, in rule 37, for sub-rule (3) including the Note thereunder the following shall be substituted, namely:—

"(3) Payments of the amount withdrawn shall be made in India only. The person to whom the amounts are payable shall make their own arrangements to receive payment in India. The following procedure shall be adopted for claiming payment by a subscriber namely:—

- (i) A subscriber may submit an application to the Account Officer through the Head of the office or Department for payment of the amount in the Fund at least one year in advance of the date of superannuation. The application may be made for the amount standing to his credit in the Fund as indicated in the Accounts Statement for the year ending one year prior to his superannuation or for the amount indicated in the ledger account, in case the accounts statement has not been received.
- (ii) The Head of Office/Department shall forward the application to the Account Officer indicating the advances taken and the recoveries effected against the advances which are still current and the number of instalments yet to be recovered in respect of each advance and also indicate the withdrawals, if any, taken by the subscriber.
- (iii) The Account Officer shall after verification with the ledger account issue an authority for the amount indicated in the application at least a month before the date of superannuation but payable on the date of superannuation.
- (iv) The authority mentioned in clause (iii) will constitute the first instalment of payment. A second authority for payment will be issued as soon as possible after the superannuation. This will relate to the contribution made by the subscriber subsequent to the amount mentioned in the application submitted under clause (i) plus the refund of instalments against advances which were current at the time of the first application.
- (v) The advances/withdrawals sanctioned after the forwarding of the applications for final payment to the Account Officer should be intimated to the Account Officer immediately and acknowledgement obtained by the sanctioning authority.

NOTE.— When the amount standing to the credit of a subscriber has become payable under rule 33, 34 or 35 the Account Officer shall authorise prompt payment of the amount in the manner indicated in sub-rule (3)."

(Department of Labour and Employment)

New Delhi, the 23rd August 1972

S.O. 2411.—In pursuance of section 17 of Industrial Disputes Act, 1947 (14 of 1947), the Central Government hereby publishes the following award of the Central Government Industrial Tribunal (No. 2), Bombay in the industrial dispute between the employers in relation to the management of Messrs V. M. Salgaocar and Brothers Private Limited, Vasco-de-gama, and their workmen, which was received by the Central Government on the 17th August, 1972.

BEFORE THE CENTRAL GOVERNMENT INDUSTRIAL TRIBUNAL NO. 2, BOMBAY.

REFERENCE NO. CGIT-2/5 of 1971.

Employers in relation to the management of Messrs V. M. Salgaocar and Brothers Private Limited, Vasco-de-gama, Goa,

AND

Their workmen.

PRESENT:

Shri N. K. Vani, Presiding Officer.

APPEARANCES:

For the Employees.—Shri L. R. Ferrao, Personnel Officer.

For the Workman.—Shri George Vaz, General Secretary, Goa Mining Labour Welfare Union, Goa.

INDUSTRY: Iron Ore Mines.

STATE: Goa, Daman and Diu.

Bombay, dated the 1st August, 1972.

AWARD

By order No. L-29012/23/71-LR.IV dated 10th September, 1971 the Central Government in the Ministry of Labour and Rehabilitation (Department of Labour and Employment) in exercise of the powers conferred by clause (d) of sub-section (1) of Section 10 of the Industrial Disputes Act, 1947 (14 of 1947) referred to this Tribunal for adjudication an industrial dispute existing between the employers in relation to the management of Messrs V. N. Salgaocar and Brother Pvt.

Ltd. and their workman in respect of the matters specified in the Schedule as mentioned below:—

"SCHEDULE

Whether the action of the management of Messrs. V. M. Salgaocar and Brother Pvt. Ltd. in terminating the services of Shri Jaiwant N. Naik, Construction Supervisor, Surla Mines with effect from 19th December, 1970 is justified? If not, to what relief is he entitled?"

2. The facts giving rise to this reference are as follows:—

- (i) Shri Jaiwant N. Naik was appointed on 11th June, 1968 in the construction Section of M/s. V. M. Salgaocar and Brother Pvt. Ltd. as supervisor on a pay of Rs. 285/- consolidated. In July, 1969 he was transferred to Surla Civil Construction. While he was working there Senior Executive Engineer directed him to do the work of alignment of steps before his next visit to the site i.e. 13th October, 1970. As he failed to execute this work within the prescribed time departmental enquiry was held against him and his services were terminated. He therefore raised an industrial dispute.
- (ii) Ass'tt. Labour Commissioner (C), Vasco-de-Gama tried to bring about conciliation but in vain. He therefore submitted his failure of conciliation report to the Government which referred this dispute to this Tribunal for adjudication.

3. On the receipt of the reference notices were issued to the parties. In pursuance of the notice both the parties appeared and filed their written statements.

4. Shri Jaiwant N. Naik has filed his written statement at Ex. 1/W on 27th December, 1971.

5. According to him,

- (i) He was engaged in the Civil Construction as a Construction Supervisor in June, 1968. He was then transferred to Surla Mines in the same capacity. As he was transferred to mines he was granted a new wage scale as per the Central Wage Board for Iron Ore Mining Industry on a basic salary of Rs. 235/- D.A. of Rs. 60/- and V.D.A. as admissible on the wage board Grade Rs. 215/- 10-285-15-330. He was under the Mines Regulations after being transferred to the mines to work in the Civil Construction works at Surla Mines, Velguam Mines, Pali Mines and Vagao Screening Plant in the Mining Industry of the company.
- (ii) He had to work under the directions of the Senior Executive Engineer Shri U. J. Counto and the Site Engineer Shri P. S. Angle who superseded Shri S. V. Kumar.
- (iii) Senior Executive Engineer had given him the job of alignment of the steps at Vagao Screening Plant. He could not do this job as urgent work was assigned to him by the Site Engineer Shri P. S. Angle. As he could not do the work before the prescribed period show cause notice was served on him. He submitted his explanation regarding show cause notice. In spite of his explanation enquiry was held against him and his services were terminated.
- (iv) Termination of his service is *mala-fide*, illegal, in violation of the principles of natural justice and the company's Standing Orders which are binding on the management. As his services were terminated without sufficient reason and with a view to harass and victimise him, his termination be set aside and he be reinstated in service with full back

wages and continuity of service and other benefits.

6. M/s. V. M. Salgaocar and Brother Pvt. Ltd. (hereinafter referred to as the "the company") has filed written statement at Ex. 2/E.

7. According to the Company,

- (i) The reference is not competent. It is bad in law. The Central Government is not the appropriate Government in terms of Section 2(a)(ii) of the I.D. Act, 1947.
- (ii) Shri Jaiwant Naik was engaged as construction Supervisor, at the material time, in the Civil Construction Works, Surla. Civil Construction Works, Surla is a distinct unit by itself and not a part of Surla Mine. As he was employed in Civil Construction work, he cannot be considered a person employed in a mine as defined in Section 2(1) (j) of the Mines Act, 1952.
- (iii) As he was not an employee of a mine, the appropriate Government in respect of any dispute between him and the company will only be the State Government and not the Central Government. As the present reference is made by the Central Govt., this Tribunal has no jurisdiction to entertain in the same.
- (iv) Shri Naik was issued with a charge-sheet. He was given opportunity to answer the charges levelled against him. After receiving explanations from Shri Naik and having found that the same was not satisfactory, the company proceeded with the Departmental enquiry into the charges levelled against him. In that enquiry Shri P. S. Pai, Angle, Shri U. J. Counto and Shri A. A. Fernandes were the witnesses of the company.
- (v) Shri Naik fully participated in the enquiry, led his defence and also cross-examined the witnesses of the company. The enquiry officer submitted his findings, holding Shri Naik guilty of the misconduct levelled against him.
- (vi) The company would have dismissed Shri Naik without notice on the basis of the findings of the Enquiry officer, but it took a lenient view and only discharged him from service. In doing so no principles of natural justice have been violated by the company. Shri Naik's dismissal is not *mala-fide* and illegal and inconsistent with the Standing Orders of the company. As his dismissal is justified he is not entitled for reinstatement with full back wages and continuity of service and compensation.

8. The affected workman Shri Naik has filed rejoinder at Ex. 17/W.

9. According to him,

- (i) He is a mine worker.
- (ii) The company had not raised the objection regarding jurisdiction before the Assistant Labour Commissioner (C) Vasco-de-gama. There is no substance in the preliminary objection on point of jurisdiction. As his termination is *mala-fide* in violation of company's standing and with a view to victimise him the same be set aside with full back wages and continuity of service.

10. Shri Jaiwant N. Naik has examined himself at Ex. 3/W. He has produced leave pass, show cause notice (Ex. 4/W), Enquiry notice Ex. 5/W and termination notice at Ex. 6/W.

11. The company has examined Civil Engineer, Shri U. J. Counto at Ex. 12/E, Driver Shri F. Coutinho, at Ex. 13/E, Typist Clerk Shri A. A. Fernandes at Ex. 14/E and the Engineer in charge Shri P. S. Pai Angle at Ex. 15/E. The enquiry proceedings have been produced at Ex. 18/E and some other documents.

12. From the pleadings and documents on record the following points arise for decision in this reference.

- (i) Whether Shri Jaiwant N. Naik was a mine worker?
- (ii) Whether the Central Government is the appropriate authority to refer this dispute to this Tribunal?
- (iii) Whether this Tribunal has jurisdiction to entertain this reference?
- (iv) Whether the termination of service of Shri Jaiwant N. Naik by the management is proper?
- (v) What Order?

13. My findings are as follows:—

- (i) No.
- (ii) No.
- (iii) No.
- (iv) No finding is recorded.
- (v) As per order.

Reasons

Point No. (i)

14. From the written statement Ex. 1/W filed by Shri Jaiwant N. Naik it is clear that he was engaged in Civil Construction work of the company as Construction Supervisor in June, 1968 and that he was transferred to Surla Mine in the same capacity in July, 1969. There can be therefore no doubt that he was employed as Construction Supervisor and that he was transferred to Surla as Construction Supervisor.

15. Shri Vaz for the affected workman contends that the work which Shri Naik was doing was connected with mine and that on account of this he is a mine worker. This contention cannot be accepted.

16. Definition of a person, who is said to be employed in a mine is given in Section 2(1)(h) of the Mines Act, 1952. It is as follows:—

"A person is said to be 'employed in a mine who works under appointment by or with the knowledge of the manager, whether for wages or not, in any mining operation or in cleaning or oiling any part of any machinery used in or about the mine, or in any other kind of work whatsoever incidental to, or connected with, mining operations."

17. In the present case Shri Naik would be a person employed in a mine, if he was doing the work connected with mining operations. It cannot be said by any stretch of imagination that Civil Construction work, which Shri Naik was doing was in any way connected with mining operation. On his own admission he works as Construction Supervisor at various places.

18. Shri Vaz for the affected workman contends that inasmuch as the company had not contended before the Assistant Labour Commissioner (C), Vasco-de-Gama that the applicant was not a person employed in a mine and inasmuch as the company allowed the conciliation proceedings to proceed further and make failure of conciliation report, it is not open to the company to raise this contention for the first time in this reference.

19. It is true that the management does not appear to have taken a stand before the conciliation officer that the applicant was not employed in the mine and that the company is taking this contention for the first time in this reference before me. As this contention involves law point and as both the parties have adduced evidence on this point, I allow the same to be raised and consider the same.

20. Civil Construction department is a separate department. It is distinct and separate from the mining department. The affected workman had to work under directions of Senior Executive Engineer Shri U. J. Counto and the Site Engineer Shri P. S. Angle. He had no concern with the mines. It cannot be therefore said that he was working in a mine and that he was a mine worker.

21. It is contended that the benefits of Central Wage Board for Iron Ore Mining Industry were extended to the employees working in Civil Construction department at Surla but the same were not extended to the employees working in the Head office and that on account of this the employees working in Surla Civil Construction are said to be mine workers. This contention is difficult to accept.

22. It may be that some additional benefits might have been extended to employees working in Civil Construction work at Surla for certain reasons, in the discretion of the company. It cannot be conclusively said that the employees at Surla Civil Construction work are also mine workers simply because they are given the benefit of the Wage Board recommendations and because these benefits are not given to the employees working in the Head Office of the Civil Construction work.

23. Shri F. Countinho, Ex. 13/E, who works at Surla Civil Construction work as a Driver says in his evidence that he is getting the pay as per the recommendations of the Central Wage Board for Iron Ore Industry though he is not working on mines.

24. Shri A. A. Fernandes, Ex. 14/E, is working at Surla Civil Construction work since May, 1966. He also says that he is not a mine worker, though he is getting the benefits of Central Wage Board for Iron Ore Industry recommendations.

25. The above mentioned two witnesses are the colleagues of Shri Naik and working in the same establishment. Their evidence clearly show that all employees working in Surla Civil Construction department are not mine workers, though they are getting the benefits of Wage Board recommendations.

26. From the evidence of Shri Naik, Ex. 3/W and the Company's witnesses Shri U. J. Counto Ex. 12/E, Shri F. Countinho, Ex. 13/E, Shri A. A. Fernandes, Ex. 14/E, and Shri P. S. Pai Angle, Ex. 15/E it does not appear to me that the applicant is doing any kind of work which is connected with the mine and that he is a mine worker. Hence my finding on point No. 1 is in the negative.

Point Nos. (ii) and (iii)

27. The company contends that the Central Government is not the appropriate Government within the meaning of Section 2(a)(i) of the Industrial Disputes Act, 1947 in this case and that it is not competent to refer the present dispute regarding termination of services of Shri Jaiwant N. Naik to this Tribunal and that this Tribunal has no jurisdiction to entertain this reference.

28. If the dispute relates to a mine, the Central Government would be the appropriate Government to refer such dispute to the Tribunal. In the present case the affected workman Shri Naik is not a worker working in a mine. Hence the dispute between him and the company regarding his termination of service cannot be referred for adjudication by the Central

Government. This Tribunal has therefore no jurisdiction to entertain the present reference. Hence my finding on point Nos. (ii) and (iii) are as above.

Point No. (iv)

29. In view of the finding regarding jurisdiction against the affected workman, it is not necessary to consider this dispute on merit. Hence no finding is recorded on point No. iv.

Point No. (v)

30. In view of the above findings I pass the following order:-

ORDER

(i) It is hereby declared that this Tribunal has no jurisdiction to entertain this reference.

(ii) Award is made accordingly.

(iii) No order as to costs.

(Sd.) N. K. VANI,
Presiding Officer

[No. L-29012/23/71-LR-IV.]

New Delhi, the 24th August 1972

S.O. 2412.—In pursuance of section 17 of the Industrial Disputes Act, 1947 (14 of 1947), the Central Government hereby publishes the following award of the Central Government Industrial Tribunal Calcutta, in the industrial dispute between the employers in relation to the management of Ningha Colliery of Messrs Lodna Colliery Company (1920) Limited, Post Office Kalipahari, District Burdwan and their workmen, which was received by the Central Government on the 21st August, 1972.

**CENTRAL GOVERNMENT INDUSTRIAL TRIBUNAL
AT CALCUTTA**
REFERENCE No. 105 OF 1971

PARTIES:

Employers in relation to the management of Ningha Colliery of Messrs Lodna Colliery Company (1920) Limited,

AND
Their workmen

PRESENT:

Sri S. N. Bagchi, Presiding Officer.

APPEARANCES:

On behalf of Employers—Sri D. Basu Thakur, Advocate.

On behalf of Workmen—Sri Sunil Majumdar, General Secretary, Ningha Colliery Mazdoor Union.

STATE: West Bengal

INDUSTRY: Coal Mine.

AWARD

By Order No. L/1912/125/71-LRII, dated 7th October, 1971, the Government of India, in the Ministry of Labour and Rehabilitation, Department of Labour and Employment, referred the following dispute existing between the employers in relation to the management of Ningha Colliery of Messrs Lodna Colliery Company (1920) Limited and their workmen, to this Tribunal, for adjudication, namely:

"Whether the management of Ningha Colliery of Messrs Lodna Colliery Company (1920) Limited, Post Office Kalipahari, District Burdwan, was justified in placing Sarvashri Rasid Ali and Banka Kora, Coal Cutting Machine Drivers in Category-V as per the recommendations of the Wage Board for Coal Mining Industry? If not, to what relief the workmen are entitled and from what date?"

2. Notices of the reference were duly served on both the management and the union espousing the cause of the workmen. On 12th January, 1971 the management filed its written statement and on 4th March, 1972 the workmen's written statement was filed by the union.

3. The management stated in paragraph 1(a) of its statement of case that a dispute similar to that raised in terms of the reference was referred to this tribunal being Reference No. 26 of 1971, and an award was rendered on that Reference on 6th May, 1971 and that award is binding for one year. The Union, Ningha Colliery Mazdoor Union, does not represent the majority of the workmen of the colliery. On 21st December, 1970 and 3rd February 1970 there were settlements, as per Annexure A and A1 to the written statement, arrived at between the management and the two unions are still in force. The recommendations of the Wage Board are not binding. Coal Mines Regulation, 1957 makes it mandatory *vide* Regulation No. 186(2) read with Regulation No. 144 that no person shall be appointed to supervise or operate any electrical machinery, apparatus or appliance other than a telephone or signalling device or any electric lamp or light unless he holds a gas testing certificate. Neither Sri Rasid Ali nor Sri Banka Kora has got gas testing certificate and as such in terms of the Coal Mines Regulation neither of them is entitled to be placed in Category VI of the Wage Board recommendations. Referring to article 52, Volume I, page 118 of the Coal Wage Board recommendations, the company states that in fixing the wages of certain workmen the Board observed that as it was necessary to have gas testing certificate for certain categories of workmen, they had taken into account all those facts in fixing their wages and as such has not allowed any separate Gas Testing allowance. The article 52 is quoted as follows:

"52. The demand is for a special allowance to those who obtain the gas testing certificates. It was, however, pointed out at the hearing that the possession of a gas testing certificate for certain categories of workmen is now a condition of service under the amended Coal Mines Regulations. In view of this, while fixing wage rates for workmen who are statutorily required to possess gas testing certificates, we have taken this into account. In the circumstances, the question of a separate allowance on this account does not arise."

Though Mazumdar award categorised coal cutting machine drivers as category VII and VIII, there being little difference of pay between two categories, the former Rs. 1.87 and the latter Rs. 2.25, the company, to preserve better relations placed all coal cutting machine drivers in category VIII in the colliery although the workmen Rasid Ali and Banka Kora as per job description should have been placed in category VII. In reference No. 26 of 1971 the union Ningha Colliery Mazdoor Union raised a dispute for placing Rasid Ali, Rajoo Mia, Mahadeo Gowala and Banka Kora in Category VI. As both Rajoo Mia and Mahadeo Gowala passed Gas Testing examination and obtained Gas Testing Certificates, they were placed in category VI as per settlement dated 3rd February 1970, marked Annexure A1 filed along with the written statement. Ningha Colliery Mazdoor Union by its letter dated 12th May, 1971 also raised a dispute for wages of Rajoo Mia and Mahadeo Gowala with retrospective effect from the date of implementation of the Wage Board recommendations which was the subject matter of conciliation along with the dispute of Rasid Ali and Banka Kora. The Assistant Labour Commissioner Central, Asansol accepted company's submission that only those coal cutting machine drivers who will obtain Gas testing certificate will be placed in category VI as per settlement as in Annexure A1 to the written statement. The union's letter dated 12th May, 1971 is filed along with the written statement and marked Annexure B. The management's action in placing Rasid Ali and Banka Kora in category V, as neither of them obtained Gas Testing certificate, was justified and the demand of the union should be rejected.

4. The union in its written statement asserted in paragraph 2 that both the workmen were rightly placed in category BIII of the Majumdar award but they were unlawfully denied category VI of the Coal Wage Board recommendations by the management. As regards the Reference No 26 of 1971, the union states that the union had withdrawn the dispute under reference when it found some fundamental mistake that was clarified in the award. In paragraph 8 of its written statement the union asserts that the Settlement dated 3rd February, 1970 with Colliery Mazdoor Sabha, CITU was something like contracting out not to demand their just dues and the Colliery Mazdoor Sabha was not entitled to represent the dispute of the workmen who were not its members. It is further asserted that when the present dispute under reference was pending before the Central Industrial Relations Machinery vide Assistant Labour Commissioner, Central, Asansol's file No. E.2/3(126)/68 dated 1st July, 1968, the Colliery Mazdoor Sabha could not lawfully represent the workmen involved in the dispute as that union was not authorised in writing by the workmen concerned. The union's letter dt. 12th May, 1971 to the Agent of the colliery with a request to make payment of the difference of wages to the two workmen was neither replied nor conceded to. The management did not agree to place the two workmen in proper category as per recommendations of the Central Wage Board for Coal Mining Industry in spite of best effort of the Assistant Labour Commissioner, Central, Asansol whereupon the conciliation proceeding ended in a failure. Claiming that the workmen are entitled to be placed in Category VI of the Coal Wage Board recommendations with effect from 15th August, 1967, the union prays that the refusal of the employer to put the workmen in Category VI with effect from 15th August, 1967 was to be declared illegal and unjustified and that the workmen should be placed in Category VI with effect from 15th August, 1967 as recommended by the Central Wage Board for Coal Mining Industry and that the workmen should be paid difference of wages, allowance and other amenities with retrospective effect from 15th August, 1967 and any other relief or reliefs the workmen are entitled to.

5. The learned Advocate for the management and the General Secretary of the Union Sri Mazumdar opened their respective cases. The management's learned Advocate submitted at the opening that workman Rasid Ali passed the Gas Testing certificate on 27th October, 1971 during the pendency of this reference (dated 7th October, 1971) and that he had been placed in Category VI of the Coal Wage Board recommendations on and from 10th January, 1972 so soon as he informed the fact to the management and satisfied the authorities of the management about his passing of Gas testing and holding of the gas testing certificate and that the other workman Banka Kora had not even now passed the Gas Testing certificate and as such he had been placed in Category V of the Coal Wage Board recommendations but not in Category VI. Neither party adduced any evidence. For the management the learned Advocate advanced his argument on materials on record, so also the General Secretary of the Union.

6. In Reference No. 26 of 1971 an award was rendered on 6th May, 1971. In that award it was found that the union did raise the dispute before the management but went straight to the Conciliation officer with the dispute wherefor the said industrial dispute referred to for adjudication fell within the mischief of Sindhu Resettlement Corporation Ltd. and Industrial Tribunal, Gujarat, 1968 I LLJ p. 834. The Union thereupon filed an application praying for withdrawal of the dispute with a prayer to raise the self-same dispute in a regular manner. The prayer was allowed with the reservation that nothing in the order should prevent the workmen from raising the identical dispute in future if they so like. So, the union was required to raise a dispute first before the management over the matter that was included in the Reference No. 26 of 1971 in which award was rendered on 6th May, 1971.

7. In paragraph 5 of the written statement of the Company the union's letter dated 12th May, 1971, Annexure B, has been referred to and in that connection it is stated that the union raised the dispute for wages of Rajoo Mia and Mahadeo Gowala with retrospective effect from the date of implementation of Wage Board recommendations and was the subject matter of conciliation along with the dispute of Rasid Ali and Banka Kora. That dispute being in Assistant Labour Commissioner file case No. E.2/3(208)/71 ended in a failure wherefor the Central Government has made this reference relating to the workmen. Therefore, this dispute which is an industrial dispute under Section 2(k) apparently evades the mischief of Sindhu Resettlement Corporation case referred to above.

8. In paragraph 1(b) of its written statement the management asserts that Ningha Colliery Mazdoor Union does not represent the majority of the workmen of the colliery. That paragraph has not been traversed by the union in its written statement. Be that as it may if it is the union of which workmen members are minority compared to the workmen members of any other union, it has still a locus standi to raise a dispute.

9. In paragraph 1(c) of its written statement the management referred to two settlements dated 21st December 1970 and 3rd February, 1970, Annexures A and A1 and claims that those settlements are still binding wherefor there cannot be any reference under Section 10 of the Industrial Disputes Act. In replying to that paragraph of the written statement of the management, the union in paragraph 8 of its written statement states that the settlement dated 3rd February, 1970 with the Colliery Mazdoor Sabha (C.I.T.U.) is something like contracting out not to demand their just dues. This Colliery Mazdoor Sabha cannot represent the dispute of those workmen who are not its members and specially this dispute (meaning the dispute under reference) pending before the Central Industrial Machinery vide Assistant Labour Commissioner, Central, Asansol's file No. E.2/3/(126)/68 dated 1st July, 1968 cannot be represented by any union unless it is authorised in writing by the workmen concerned. Now, Annexure A to the written statement of the company is the memorandum of a settlement arrived at between the management of Sripur 4, 5 and 6 Pits colliery (Ningha colliery), Sripur colliery, Rana Colliery and Sripur Seam Incline Colliery of M/s Srs Lodna Colliery Co. (1920) Limited and their workmen represented by the Colliery Mazdoor Congress (H.M.S.), Asansol, during the course of mutual discussions held between the parties at Asansol on the 21st December 1970. Annexure A relates to a dispute raised by the Colliery Mazdoor Congress (HMS), Asansol between the management of the collieries mentioned above and their workmen demanding grant of third annual increment, payment of arrears of annual increments, payment of V.D.A. in accordance with the recommendations of the Central Wage Board for the Coal Mining Industry, 23 per cent increase in the rates of commission of the trammers sirdars etc., that was referred to the Regional Labour Commissioner (C), Asansol for conciliation. The conciliation proceeding was initiated from 14th December 1970 and had been adjourned at the request of both the parties. In course of mutual discussion held between the representatives of both the parties on 21st December, 1970 that Industrial dispute was amicably settled between them on certain terms, paragraph 4 of Annexure A reads as follows:

"It is agreed that the demands regarding payment of lead, empty tub pushing as per actual measurement, increase in the rate of wages of the trammers, revision in the commission of wagon loading sirdars, payment fall back wages to the loaders, categorisation of some of the time-rated workmen and promotion of basket counters shall be mutually discussed between the parties at a later date."

Paragraph 5 says, "The Union did not press the demand regarding permanency of loaders, wagon

loaders and chaprasis for the present". This settlement was signed by the parties on 21st December, 1971. Annexure A. It does not concern the present dispute relating to the categorisation of the two workmen Rasid Ali and Banka Kora in category VI of the Wage Board recommendations. Annexure A1 is the settlement arrived at between the management of Sripur Colliery, Rana Colliery, Ningha Colliery and Sripur Seam Incline Colliery of Messrs Lodna Colliery Co. (1920) Ltd. and their workmen represented by the Colliery Mazdoor Sabha (AITUC), Raniganj during mutual discussion held on 3rd February, 1970. The Colliery Mazdoor Sabha (AITUC) Raniganj had been pressing for certain demands with regard to the wagon loaders, loaders, clumpman, line mistries and Machine drivers of Sripur, Ningha, Rana and Sripur Seam Incline collieries. The matter was discussed between the representatives of the management and the union in several meetings and on 3rd February, 1970 the dispute was amicably settled between the parties on several terms. Clause 5 of the terms reads as follows:

"5 Machine Drivers.—The question of upgrading Machine Drivers to Category VI was fully discussed. Since Category VI was for highly skilled machine drivers and since one of the statutory requirement was their holding of gas testing certificates, it was decided that those machine drivers who would produce valid gas testing certificates would be promoted to Category VI.

In case of other machine drivers, management agreed to give them one extra increment."

This Settlement, Annexure A1, to the management's written statement was arrived at between the management and the union officials on 3rd February, 1970. The Ningha Colliery Mazdoor Union in paragraph 8 of the written statement asserts that the Settlement dated 3rd February, 1970 with Colliery Mazdoor Congress, C.I.T.U., is something like contracting out not to demand their just dues. Firstly, on 3rd February, 1970 there was no Colliery Mazdoor Sabha affiliated to C.I.T.U., but it was Colliery Mazdoor Sabha affiliated to A.I.T.U.C. The Colliery Mazdoor Sabha, A.I.T.U.C. raised the dispute regarding all workmen of several categories including Machine drivers of Ningha colliery and other collieries. In paragraph 8 of its written statement the union states, "This Colliery Mazdoor Sabha cannot represent the dispute of those workmen who are not its members and specially this dispute pending before the Central Industrial Relation Machinery". Besides the two workmen there are other workmen in all those collieries mentioned in the Settlement, Annexure A1, who are working as machine drivers. So, the settlement in Annexure A1 relates not only to the workmen who are members of the Colliery Mazdoor Sabha, AITUC but also to members and non members of the said union. The Settlement, Annexure A1, relates all machine drivers working in the collieries such as Sripur colliery, Ningha Colliery, Sripur Seam Incline colliery of Messrs Lodna Colliery Co. (1920) Limited and their workmen represented by the Colliery Mazdoor Sabha, AITUC, Raniganj. The settlement was arrived at on 3rd February, 1970. So, the union's objection that the two workmen were not members of Colliery Mazdoor Sabha when the settlement was arrived at as per Annexure A1 on 3rd February, 1970 does not appear to be sound in law. Now, the union in paragraph 8 asserted that when the present dispute was pending before the Central Industrial Relation Machinery *vive* Assistant Labour Commissioner, Central, Asansol. File No. E.2/3(126)/168 dated 1st July, 1968, the Colliery Mazdoor Sabha, C.I.T.U. was not entitled to represent in the mutual discussion between the management and the union over the present dispute without authorisation by the union meaning the Ningha Colliery Mazdoor Union. Sri Mazumdar for the union was asked to substantiate the statement and was asked to explain how the present dispute could be pending before the Assistant Commissioner of Labour, Central, Asansol in his file No. E.2/3(126)/68 dated 1st July,

1968 when the present dispute before the Assistant Labour Commissioner, Central, Asansol was the subject matter of conciliation in the Assistant Labour Commissioner's file No. E.2/3(209)/71 dated 31st August, 1971. Sri Majumdar was taken aback. The failure report signed by the Assistant Labour Commissioner, Central along with the present reference was shown to Sri Majumdar wherein it is stated that the present dispute before the Conciliation Officer was numbered in his file as E.2/3(208)/71 which failed conciliation on 31st August, 1971 and this dispute has therefore no connection with the dispute that was pending before the Assistant Labour Commissioner, Central, Asansol in its file E.2/3(126)/68 dated 1st July, 1968. Sri Majumdar could not explain the situation. So, he had to admit that the present dispute under reference was pending before the Assistant Labour Commissioner, Central Asansol in its case file No. E.2/3(208)/71 but not in his case file No. E.2/3(126)/68 dated 1st July, 1968. So the dispute that was pending in the Assistant Labour Commissioner's file No. E.2/3(126)/68 dated 1st July, 1968 may be some dispute other than the present dispute under reference which before the Assistant Labour Commissioner, Asansol, was attempted to be conciliated upon in his case file No. E.2/3(208)/71. The failure report would show that the Ningha Colliery Mazdoor Union (Ind.) raised the industrial dispute under reference by its letter No. 54(7)/71 dated 26th July, 1971 which was received by the Conciliation Officer on 28th July, 1971 and the conciliation proceeding started on and from 25th August, 1971. So, the settlement Annexure A1 dated 3rd February, 1970 was arrived at between the management of the collieries concerned and the Union, Colliery Mazdoor Sabha, A.I.T.U.C., at a time when the present dispute was not pending conciliation before the Assistant Labour Commissioner Asansol, in his file No. E.2/3(208)/71 which resulted in failure of conciliation on 31st August, 1971. On a reference to the file of the Reference case No. 26 of 1971 it is found but the Ningha Colliery Mazdoor Union (UTUC) raised previous industrial dispute regarding the two workmen who are now involved in the present dispute under reference, by its letter dated 19th October, 1970 which was taken up for conciliation by the Assistant Labour Commissioner, Central, Asansol in its file No. E.2/3(309)/70 in which the failure report was sent to the Central Government on 19th November, 1970. The settlement dated 3rd February, 1970 between the management and the union, Colliery Mazdoor Sabha, AITUC, had been effected long before 19th October, 1970. This dispute raised by the Ningha Colliery Mazdoor Union in the conciliation Case No. E.2/3(309)/70 before the Assistant Labour Commissioner, Central, Asansol related to the wrong categorisation of the two workmen, Rasid Ali and Banka Kora and other two workmen Raju Mia and Mahadeo Gowala, coal cutting machine drivers. That conciliation proceeding ended in failure whereupon there was a reference which was registered as Reference Case No. 26 of 1971 in which an award was rendered by this Tribunal recording withdrawal of the dispute by the union. Therefore, the Annexure A1, the settlement dated 3rd February 1970 was arrived at at a time when there was no conciliation proceeding pending regarding the subject matter of the dispute now under reference before any Central Conciliation officer having jurisdiction to entertain the dispute. So, the objection in paragraph 8 of the union about the settlement, Annexure A1 dated 3rd February, 1970 as mentioned above, does not stand the test of scrutiny. The settlement Annexure A1 is dated 3rd February, 1970. The dispute was amicably settled on 3rd February, 1970. It is not stated in the settlement Annexure A1 as to when it will come into operation. There is no clause in the settlement Annexure A1, as to the agreed period for which the settlement would be binding. Therefore, Section 19(2) of the Industrial Disputes Act, 1947 should be decisive about the continuance of the binding effect on the parties to the settlement after expiry of the period of six months from the date of the settlement. As there is no period fixed, the settlement Annexure A1 it was to continue upto 2nd August, 1970 and thereafter until the expiry of two

months from the date on which a notice in writing of an intention of terminating the settlement is given by one of the parties to the other party or parties to the settlement. The union, that means the Ningha Colliery Mazdoor Union nowhere stated in its written statement that after the expiry of the terms of the settlement i.e. 2nd August 1970 any of the parties to the settlement gave notice in writing of an intention to terminate the settlement. Sri Majumdar for the union, Ningha Colliery Mazdoor Union, had not attacked the settlement, Annexure A1, on the score that after the expiry of the term of the settlement i.e. 2nd August, 1970, any of the parties to the settlement gave a notice in writing of an intention to terminate the settlement to the other. On the other hand, the management asserted in paragraph 1(c) that the statement, Annexure A1, was binding on the parties wherefor there could not be any reference under Section 10 of the Industrial Disputes Act. So, clause 5 of the settlement dated 3rd February, 1970, Annexure A1, relating to machine drivers of Ningha colliery was binding on the two workmen and the management when on 12th May, 1971 the Ningha Colliery Mazdoor Union by its letter to the management made the demand which was not, according to the union, conceded to by the management wherefor the union raised the dispute before the Assistant Labour Commissioner Asansol who in its File No. E.2/3(209)/71 took up the present dispute under reference for conciliation. Ningha Colliery Mazdoor Union was not a party to the Settlement, Annexure A1.

10. In reply to the management's assertion in paragraph 1(b) of its written statement that the Ningha Colliery Mazdoor Union did not represent the majority of the workmen of the colliery, the said union made no counter statement in its written statement. Therefore, it is admitted as it has not been specifically denied by the Ningha Colliery Mazdoor Union that it does not represent the majority of the workmen of Ningha Colliery. If that be the position, the Colliery Mazdoor Sabha, A.I.T.U.C., representing the workmen of all categories in several collieries of the Lodra Colliery Co. (1920) Ltd. mentioned in Annexure A1 had the *Locus standi* to enter into the settlement on 3rd February, 1970 which must be still binding on all the workmen as categorised in the settlement including coal cutting machine drivers of Ningha Colliery. Therefore, when Ningha Colliery Mazdoor union raised the present dispute before the Assistant Labour Commissioner, Central, Asansol, it had no jurisdiction to enter into the conciliation proceedings, and the union had no locus standi to represent the workmen in the conciliation proceedings when Settlement, Annexure A1, was in operation and binding on the two workmen to whose categorisation the present dispute under reference relates.

11. The fundamental question in the reference is whether the management is justified in not placing the two workmen in Category VI of the Central Wage Board recommendations. For the management it was submitted that the Coal Wage Board at page 118, Volume I, Article 52, considered the question of gas testing allowance. Those who obtained the gas testing certificate demanded special allowance before the Coal Wage Board. The Coal Wage Board observed that the possession of a gas testing certificate for certain categories of workmen is a condition of service under the Coal Mines Regulation. So, in article 52 of its Report, page 118, Volume I, the Coal Wage Board observed, "In view of this while fixing wage rates for workmen who are statutorily required to possess gas testing certificate we have taken into account. In the circumstances, the question of a separate allowance on this account does not arise". So, the gas testing certificate being a condition of service any workman holding gas testing certificate is eligible to be fixed at the wage rate higher than those not holding gas testing certificate. Instead of allowing gas testing allowance to the holder of a gas testing certificate the Coal Wage Board recommended for him a wage rate higher than the one not holding a gas testing certificate. This is the meaning of article 52 of the recommendations at page 118, Volume I of the Coal Wage

Board recommendations. Majumdar award at page 93, Volume II while giving job description of coal cutting machine drivers made two categories, Category VII working a long wall or short wall coal cutting machine in non-gassy mines and Category VIII coal cutting machine driver, working a short wall or long wall coal cutting machine in gassy mines. According to Majumdar award management of Ningha colliery which is a gassy mine placed the two workmen in category VIII although neither of the two workmen had at that time gas testing certificate. The management's case is that as Category VIII coal cutting machine drivers get higher pay than category VII of Majumdar award, the management in spite of the two workmen's not holding gas testing certificates placed them in category VIII of the Majumdar award. Naturally when the recommendations of the Central Wage Board for Coal Mining Industry came to be implemented in the Ningha colliery the union through its General Secretary Sri Majumdar as well as in its written statement paragraph 3 referring to page 51 Volume II of the Coal Wage Board recommendations pinned the case of the two workmen to clause 7 regarding coal cutting machine drivers which reads as follows: "... Those who are in the existing Category VII will be placed in the New Category V (Serial No. 7) and those who are in the existing Categories VIII and IX will be placed in the new Category VI (Serial No. 1)". Accordingly for two workmen Sri Majumdar claimed that they should be placed in Category VI of the Coal Wage Board recommendations, although they had been placed in category V. Now, Coal Mines Regulation, 1957 as amended was referred to in article 52 page 118, Volume I of the Coal Wage Board recommendations. Coal Mines Regulations, 1957, paragraph 186, sub-paragraph (2) reads as follows:

"(2) In every mine to which regulation 144 applies, no person shall be appointed to supervise or operate any electrical machinery, apparatus or appliance other than a telephone or signalling device or an electric lamp or light, unless he holds a Gas testing Certificate"

Sub-paragraph (2) clearly says that none shall be allowed to operate any electrical machine in a gassy mine unless he holds a gas testing certificate. Sri Basu Thakur, learned Advocate for the management, submitted that the Coal cutting machine was a electrically driven machine and that the Ningha colliery admittedly was a gassy mine. Sub-paragraph (2) of paragraph 186 of the Coal Mine Regulations, 1957 says that electrically operated machine such as coal cutting machine cannot be driven by a person in a gassy mine unless he holds a gas testing certificate. He referred to article 52, Volume I, page 118 of the Coal Wage Board recommendations. The Coal Wage Board took into consideration article 186 sub-article (2) of the Coal Mine Regulation while denying gas allowance and recommending higher wages to those who are to obtain the gas testing certificate. Sri Majumdar would not consider paragraph 186 sub-paragraph (2) of the Coal Mine Regulations, 1957 as governing article 52 of the recommendations of the Coal Mining Industry, Volume I, page 118. He referred to me para 36 of the Coal Mines Regulations which relates to appointment of officials and competent persons and submitted that although the two workmen did not hold gas testing certificates, they had been placed in category VIII according to Majumdar award and that they were to be fixed in category VI of the Coal Wage Board recommendations no matter whether the holding of a gas testing certificate was a condition of his service. He further submitted that by allowing the two workmen who did not hold gas testing certificates to be categorised in category VIII of Majumdar award and even allowing them to work in the gassy mine as Coal Cutting Machine drivers without holding gas testing certificates, the management violated Mines law. It may be so. But this is not the forum for agitation of such a proposition. If the management has violated the Mines law the union may bring it to the notice of proper authorities for enforcement of such law. Now, the question is whether holding of a gas certificate is a condition of service under paragraph 186

sub-paragraph (2) of Coal Mine Regulations, 1957. It is undeniably a condition of service. In this context we are to read in between the lines of article 52 of the recommendations of the Coal Wage Board, appearing in page 118, Volume I of the Report which I have already referred to. Gas allowance was denied to workmen who claimed such allowance while working in a gassy mine. Instead of gas allowance the Wage Board recommended higher rates of wages to those workmen who held gas testing certificate. According to Majumdar award category VIII coal cutting machine driver in gassy mine was entitled to higher rate of allowance compared to coal cutting machine drivers in non-gassy mines. According to Wage Board recommendations the coal cutting machine driver in a gassy mine in view of article 52, Volume I, page 118 of the Report read with Paragraph 186, sub-paragraph (2) of the Coal Mine Regulations, 1957 are entitled to be fixed in category VI of the Coal Wage Board recommendations with higher rate of pay compared to the pay in category VIII of Majumdar award and category V of Coal Wage Board recommendations provided the workman covered sub-paragraph (2) of Paragraph 186 of the Coal Mine Regulations, 1957 is holding a gas testing certificate. Sri Majumdar's contention was that when the Majumdar award came into force, the management placed the two workmen in category VIII in a gassy mine although they held no gas testing certificate; so they were entitled to be placed in the gassy mine under Coal Wage Board recommendations in category VI that means at a rate of pay higher than the rate of pay of those in category V of the Coal Wage Board recommendations and even those in category VIII of Majumdar award, and that such denial by the management of the two workmen's claim was illegal and unjustified. Placement of the two workmen in Category VI of Coal Wage Board recommendations is however dependant upon the fulfilment of the conditions in article 52, Volume I, page 118 of the Coal Wage Board recommendations read with Paragraph 186 sub-paragraph (2) of the Coal Mine Regulation, 1957. In violation of the Mine Regulations if the management had placed the two workmen in category VIII of Majumdar award in a gassy mine like "B", "C", "D", "E", "F", "G", "H", "I", "J", "K", "L", "M", "N", "O", "P", "Q", "R", "S", "T", "U", "V", "W", "X", "Y", "Z" every when they did not hold the gas testing certificate, the workmen or the union representing the workmen cannot now ask the Tribunal to be a party to the violation of the Mines Regulations and the recommendations of the Coal Wage Board i.e. article 52, Vol. I, page 118 of the Coal Wage Board recommendations read with sub-paragraph (2) of Paragraph 186 of the Mines Regulations. The *sine qua non* for the two workmen to be placed in Category VI is to hold a gas testing certificate when they are operating the gassy mine Ningha colliery, electrically driven coal cutting machines. The legal right of the two workmen to be placed in Category VI of the Coal Wage Board recommendation is dependant upon their holding a gas testing certificate. Now, the management had placed Rajoo Mia and Mahadeo Gowala in 1970-71 in category VI when they obtained gas testing certificate. Even on 10th January, 1972 workmen Rasid Ali has been placed in category VI of the Coal Wage Board recommendations so soon as he had obtained the gas testing certificate on 20th October, 1971 and brought it to the notice of the management. Sri Majumdar did not raise any comment on the management's action as regards Rasid Ali. The management submitted that Kora had not yet obtained any gas testing certificate. So, if the management is to implement article 52, Volume I, p. 118 read with note No. 7 page 51, Volume II of the Coal Wage Board recommendations by placing from 15th August, 1967 the workmen in category VI of the Wage Board recommendations who were in category VIII under Majumdar award in the gassy mine of Ningha colliery, it has got to obey the recommendations in article 52 read with the law as laid down in paragraph 186 sub-paragraph (2) of the Coal Mines Regulation, 1957. If the union claims as of right under article 52 page 118, Volume I of the Report of the Coal Wage Board recommendations read with note 7, in page 51, Volume II thereof, it cannot overlook the mandatory provision of sub-paragraph (2) of Paragraph 186 of the

Coal Mines Regulations, 1957 which was taken into consideration by the Coal Wage Board while recommending a rate of higher rates of wages to persons whose condition of service was to obtain a gas testing certificate. So, when Rasid Ali and Banka Kora did not hold, when the dispute was referred to for adjudication by this tribunal, the gas testing certificate, the management in regard to Rasid Ali was justified upto 9th January 1972 not to place him in category VI of the Coal Wage Board recommendations and is still justified in not placing Banka Kora in category VI of the Coal Wage Board recommendations. Neither the management can be allowed to violate the law nor the union can be allowed to claim anything which law would not permit the workman to claim. The management and the workmen or as a matter of that the Union are to be governed strictly by the law and law only. In this view of the matter the workman Rasid Ali shall have no grievance on and from 10th January, 1972 and he had no right till before 10th January, 1972 to claim that he should be placed in Category VI of Coal Wage Board recommendations. As regards Banks Kora, since he has not yet obtained gas testing certificate, he has no right to be placed in category VI of the Coal Wage Board recommendations.

12. In the result, the reference is answered in regard to the two workmen in the manner I have just mentioned.

This is my award.

Presiding Officer.

Dated, August 3, 1972.

[No. L/19012/125/71-LRII.]

New Delhi, the 26th August 1972

S.O. 241^o—Whereas an industrial dispute exists between the management of Madhujore Colliery, Post Office Kajoragram, District Burdwan (hereinafter referred to as the said employers) and their workmen represented by the Colley Mazdoor Union (INTUC), Bastin Bazar, G.T. Road, Post Office Asansol, District Burdwan (hereinafter referred to as the union);

And whereas the said employers and the union have by a written agreement in pursuance of the provisions of sub-section (1) of section 10A of the Industrial Disputes Act, 1947 (14 of 1947), agreed to refer the said dispute to arbitration of the person specified therein, and a copy of the said agreement has been forwarded to the Central Government;

Now, therefore, in pursuance of the provisions of sub-section (3) of section 10A of the Industrial Disputes Act, 1947 (14 of 1947), the Central Government hereby publishes the said arbitration agreement.

AGREEMENT

Under Section 10A of the Industrial Disputes Act, 1947

BETWEEN

Name of the Parties :

Representing the employers : Representing the workmen :

Shri R.C. Patel, Resident Director, M/s. Madhujoire Coal Co. Pvt. Ltd., P.O. Kajoragram Distt. Burdwan. Shri Pravat Goswami, General Secretary, Colliery Mazdoor UNION (INTUC) G.T. Road, Bastin Bazar, P.O. Asansol (Burdwan).

It is hereby agreed between the parties to refer the following industrial dispute to the arbitration of Sri R.J.T. D'Mello, Chief Labour Commissioner (Central), New Delhi.

(i) Specific matters in dispute :

"Whether the management of Madhujore Colliery of M/s. Madhujore Coal Co. (P) Ltd., P.O. Kajoragram Distt. Burdwan, was justified in dismissing from service the workmen named below with effect from 10-4-1971? If not, to what relief are the workmen concerned entitled?"

Sl. No.	Name of the workmen	Designation
1.	Sri Ramnath Singh	Loader
2.	Sri Md. Saddique Mia	Loader
3.	Sri Sankar Harijan	Loader
4.	Sri Balli Harijan	Loader
5.	Sri Shek Nath Karu	Loader
6.	Sri Ramchandra Rajbhar	Surface Trammer
7.	Sri Tuffani Harijan	Onsetter
8.	Sri Sk. Hadish	Timber Mistry
9.	Sri Provakar Roy	Mining Sirdar
10.	Sri Chabbi Yadav	Machine Mazdoor
11.	Sri Ugrasen Singh	S.G. Trammer."

(ii)	Details of the parties to the dispute including the name and address of the establishment or undertaking involved.	Madhujore Colliery of M/s. Madhujore Coal Co. (P) Ltd., P.O. Kajoragram, Distt. Burdwan.
(iii)	Name of the Union, if any, representing the workmen, in question.	Colliery Mazdoor Union (INTUC) G.T. Road, P.O. Asansol, Distt. Burdwan.
(iv)	Total number of workmen employed in the undertaking affected :	1100
(v)	Estimated number of workmen affected or likely to be affected by the dispute.	Eleven.

We further agree that the decision of the Arbitrator shall be binding on us.

The Arbitrator shall make his award within a period of one hundred and eighty days or within such further time as is extended by mutual agreement between us in writing. In case the award is not made within the period aforementioned the reference to Arbitrator shall stand automatically cancelled and we shall be free to negotiate for fresh arbitration.

(Department of Labour and Employment)

New Delhi, the 25th August 1972

S.O. 2414.—In pursuance of section 17 of the Industrial Disputes Act, 1947 (14 of 1947) the Central Government hereby publishes the following award of the Central Government Industrial Tribunal, Calcutta, in the Industrial Dispute between the employers in relation to the Calcutta Port Commissioners, Calcutta and their workmen, which was received by the Central Government on the 16th August, 1972.

CENTRAL GOVERNMENT INDUSTRIAL TRIBUNAL AT CALCUTTA.

REFERENCE NO. 98 OF 1971

PRESENT:

Employers in relation to the Calcutta Port Commissioners.

AND

Their Workmen.

PARTIES:

Shri S. N. Bagchi, Presiding Officer.

APPEARANCES:

On behalf of Employers.—Sri G. V. Karlekar, Labour Adviser & Industrial Relations Officer.

On behalf of Workmen.—Sri Syama Chakravorti, Secretary of Calcutta Port Shramik Union.

STATE: West Bengal.

INDUSTRY: Port.

AWARD

By Order No. L-32014/2/71-P&D, dated 20th August, 1971, the Government of India, in the Ministry of Labour and Rehabilitation (Department of Labour and Employment), referred the following dispute existing between the employers in relation to the Calcutta Port Commissioners, Calcutta and their workmen represented by the Calcutta Port Shramik Union, to this Tribunal, for adjudication, under Sub-section (2) of Section 10 of the Industrial Disputes Act, 1947, namely:

"Whether the claim by Shri Kartick Kumar Chandra, at present working as Junior Clerk for being fixed as Lower Division Clerk instead of Shri Sudhangsu Kumar Sen, now working as Lower Division Clerk, is justified? If so, to what relief is he entitled?"

2. Notices were served on both the union and the Commissioners for the Port of Calcutta. The union submitted its written statement on 1st April, 1971 and the Commissioners for the Port of Calcutta filed its written statement on 25th January, 1972. But neither party filed any rejoinder to either party's written statement.

3. The union's case, *inter-alia*, as made in the written statement is as follows: In paragraph 38 of the Report of the Classification and Categorisation Committee for the Major Ports of India, the Committee recommended that the Calcutta Port Administration should investigate the duties of Jamadar and Litrate Jamadars in the Sanitary section of the Medical Department and that if any of these holding the aforesaid posts is found to be doing work as full fledged clerk, he should be classified accordingly and fix in the appropriate scale. In terms of the resolution No. 1304 of the Commissioners for the Port of Calcutta in the meeting held on 1st April, 1963, it was decided to convert seven posts of Jamadars and Litrate Jamadars doing full fledged clerical duties into posts of Lower Division clerks and four into Junior clerks and that adjustments would be made according to the seniority. The departmental committee examined the impact of the resolution in the light of the recommendations of the Classification and

Categorisation Committee. Shri Kartick Kumar Chandra, the workman concerned in the dispute, is senior to Sri Sudhangsu Kumar Sen, the dates of appointment of Chandra and Sen in the identical scale of pay and in the same seniority unit being 1st September, 1951, and 16th February 1952 respectively. By wrong casting of the seniority position of Kartick Kumar Chandra, the Port Administration allowed Sri Sudhangsu Kumar Sen to supersede Sri Chandra and this wrong supersession was maintained by the Port authority in promoting Sri Sen to the post of Lower division clerk from the post of Literate Jamadar on 1st April, 1963 but both Sen and Chandra were in the same scale of pay in the same seniority unit. Earlier Sri Chandra protested against the wrong casting of his seniority position in the seniority list shown to him on 4th December, 1958 circulated as per Port Commissioners' Health Officers's letter No. H/EST/9 dated 7th November, 1958, but the representation containing the objection was neither enquired into nor replied to. Later, when the Union took up the case of supersession, the seniority list was amended, and the amended list was shown to Chandra, the workman concerned. Shri Sudhangsu Kumar Sen was working as a Number Taker of the conservancy lorries in the docks and his duty hours were from 6 a.m. to 12 noon and he was never doing full fledged clerical duties and his designation was literate Jamadar on 15th July, 1952. Sri Kartick Kumar Chandra was posted at the Calcutta Jetty Health Office and was working as a table staff for doing full fledged clerical duties during office hours only from 10 a.m. to 5 p.m. His designation was Literate Jamadar on 24th June, 1953. In his letter No. ID(i)43/337 of 22nd August, 1969 to the Union the Labour Adviser and Industrial Relations Officer, Calcutta Port Commissioners admitted supersession of Sri Kartick Kumar Chandra by Shri Sudhangsu Kumar Sen. The union took up the matter with the Chief Medical Officer on behalf of the said workman Chandra and the Chief Medical Officer by his letter No. CMO/U/2/316 dated 10th July, 1964 informed the Union that the adjustment of Jamadar and Literate Jamadar as Lower division clerks is to be made strictly in order of seniority. The dispute of seniority between Sri Kartick Kumar Chandra and his junior Sri Sudhangsu Kumar Sen who was allowed to supersede Sri Chandra against objection was pursued further by the Union. There was conciliation proceeding with the Assistant Labour Commissioner, Central, Calcutta-II and an agreement was reached to refer the dispute for adjudication under Section 10(2) of the Industrial Disputes Act whereupon the present reference with the issue being "whether the claim of Sri Kartick Kumar Chandra at present working as junior clerk for being fixed as Lower Division clerk, is justified? If so, what relief is he entitled?" There was nothing against Sri Chandra as regards his unitability, efficiency and merit. He was also of longer durations in service of the Calcutta Port compared to said Sri Sudhangsu Kumar Sen. Upon the aforesaid statement of case the union prayed for an award in answer to the issue in favour of Kartick Kumar Chandra granting him the relief of promotion retrospectively by holding his supersession to be illegal, unjust, malafide and to grant him any other or further relief as may be deemed fit and proper on merit.

4. The Commissioners of the Port of Calcutta in its written statement referring to paragraph 38 of the Report of the Classification and Categorisation Committee states that recommendations of the said Committee were investigated into by the Commissioners of the Port of Calcutta relating two categories, Jamadars and had a meeting held by the Deputy Chairman of the Commissioners with the representative of the unions and also with the representatives of National Union for Port Trust Employees, now called the National Union of Waterfront Workers, to discuss the implementation of the classification and categorisation as in Paragraph 38 of the Report, regarding the literate

Jamadars and Jamadars of the Health Section and to classify them to post of Lower division clerks. The union agreed to the Deputy Chairman's proposal that out of 11 posts of literate Jamadars and Jamadars taken together of the Health Section, 7 posts be converted to that of lower division and the rest to that of Junior Clerks. To the Deputy Chairman's further suggestion that the posts of Lower division clerk would be filled by the adjustment of literate Jamadars provided they possess the requisite qualifications, both the unions requested the Deputy Commissioner to accept certain modifications in regard to the absorption of the men then holding the posts of literate Jamadars and Jamadars which were accepted by the Deputy Chairman as a very special case. The unions' proposals were (i) that the seven posts of Lower division clerks be filled up by adjustment of the literate Jamadars on the basis of seniority, irrespective of whether they possessed the prescribed minimum qualifications or not in view of their long experience, and (ii) that those who would continue to be on the lower scale of Rs. 60-85 as Junior Clerks will be eligible for consideration only against the 2% per cent promotion quota of lower division vacancies in the Health Department which may arise from time to time including the newly created vacancies of 6 lower division clerks. Suggestions put forward by the union's to the Deputy Chairman's proposal were accepted by both the Commissioners of the Port of Calcutta and the unions and that agreed proposals were subsequently put before the Commissioners in a meeting and sanctioned by the Commissioners under Resolution No. 1305 of 1963. In answer to paragraph 3 of the written statement of the union relating to the initial appointment in the Health Section of the Commissioners for the Port of Calcutta of Sri Chandra and Sri Sen in the identical scale of pay on 1st September, 1951 and 16th June, 1952 respectively, the Commissioners in paragraph 3(i) of their written statement asserted, "Sri Kartick Kumar Chandra was first appointment in the Health Section of the Commissioners' Medical Department under the Chief Medical Officer on 1st September 1951 as Ratman in the scale of pay of Rs. 30-1/2-35 and was adjusted as Oilman with effect from 1st September, 1952 and was confirmed to the post of Oilman on 26th February, 1953. He was temporarily promoted as Mate with effect from 11th January, 1953 to 1st May, 1953 and from 26th May, 1953 to 23rd June, 1953. He was promoted to the post of Literate Jamadar on 24th June, 1953 in the scale of pay of Rs. 39-1-44 and confirmed in the same post on 4th July, 1957". In paragraph 3(ii) of the said written statement and the Commissioners assert that Sri Sudhangsu Kumar Sen was first appointed on 15th January, 1952 as a lascar in the scale of pay of Rs. 30-1/2-35 in the Health Section of the Commissioners' Medical Department under the Chief Medical Officer. He was adjusted in the post of Ratman on 11th July, 1952 and continued in the said post upto 14th July, 1952. He was temporarily promoted to the post of Literate Jamadar on 15th July, 1952 in the scale of pay of Rs. 39-1-44 and was adjusted in the said post on 30th November, 1952 and confirmed in the same post on 3rd July, 1957. Referring to the supersession of Sri Chandra by Sri Sen on the basis of wrong casting of seniority position in between them, the Commissioners of the Port of Calcutta in paragraph 4(i) states that the Commissioners deny the contentions of the Union that by wrong casting of the seniority position of Sri Kartick Kumar Chandra the Port Administration allowed Sri Sudhangsu Kumar Sen to supersede Sri Chandra and that the wrong supersession of Sri Kartick Kumar Chandra was maintained by the Port authorities in promoting Shri Sen to the post of Lower Division Clerk from the post of Literate Jamadar on 1st April, 1963. The Commissioners further assert in paragraph 4(ii) of its written statement that

during the years 1951, 1952 and 1953 a number of staff from the Health Section went on transfer to the Traffic Department and other departments of the Commissioners on various dates and in their places other staff of the Health Section were adjusted as Literate Jamadars as and when such staff were transferred. There are no records to show why seniority of staff was not followed while adjusting the staff as Literate Jamadars. The adjustment of Shri Chandra as Literate Jamadar also involved supersession of a number of staff senior to Shri Chandra on the basis of first appointment. The staff adjusted as Literate Jamadars could not be confirmed as their confirmation depended upon the confirmation of the staff transferred to other departments. Moreover, in the matter of confirmation of the staff in the Health Section the question of supersession of staff being involved, the Chief Medical Officer sought the sanction of the Chairman for confirmation of the staff. The Chairman, after getting the matter properly investigated, approved the supersession on 14th September, 1959 and the dates of their confirmation were staggered to ensure their position in the seniority list and to avoid future disputes. With regard to the union's statement in paragraph 5 relating to the Seniority list dated 4th December, 1958 and the amended list, the Commissioners in paragraph 5(i) of their written statement state that in pursuance of the recommendations of the Commissioners' Special Committee which were approved by the Commissioners under their No. 473 of the 6th Meeting held on 8th May, 1957, the Port Administration appointed a departmental Committee to draw up a consolidated set of Seniority rules, which would be applicable to all the departments. In paragraph 5(ii) it is stated by the Commissioners that the Committee drew up a consolidated set of rules for determining the seniority of all categories of staff in all departments. These rules were approved by the Chairman of the Commissioners and the Chairman directed all the Heads of the Departments that preparation of the seniority lists based on these rules should be completed and the lists forwarded by the departments to the said committee together with full particulars of the disputed cases as well as the difficult cases in which the rules could not be strictly applied. Under the Chairman's direction the committee was to examine these cases on their merits. In the case of the Health Section of the Chief Medical Officer's department, the seniority lists were prepared and first circulated among the members of the staff of the section. These lists were later forwarded to the Secretary and finalised. The difficulty about the seniority of Literate Jamadars were also resolved on the basis of the total length of service in the grade of Literate Jamadars. The Commissioners deny the contention of the union in the said paragraph that the representation containing Shri Kartick Kumar Chandra's objection was neither enquired into nor replied to. No such objection at alleged or at all was received by the Commissioners from him. Only Shri Monoranjan Chakravarty and Sri Sachindra Nath Banerjee, Literate Jamadars had submitted their objections which were duly enquired into. The amended seniority lists were at the relevant time shown to all the Literate Jamadars including Shri Kartick Kumar Chandra. The Commissioners assert that Sri Kartick Kumar Chandra at present working as Junior clerk cannot claim to be fixed as Lower Division clerk instead of Sri Sudhangsu Kumar Sen now working as Lower division clerk since the placing of Sri Kartick Kumar Chandra as Junior clerk and Sri Sundhangsu Kumar Sen as Lower Division clerk are justified.

5. On 18th May, 1972 the union i.e. the Calcutta Port Shramik Union had addressed a letter to this tribunal stating that it was sending a rejoinder in the reference. The letter with the Annexure was found not to be a rejoinder but an application for calling for certain documents. Thus, no rejoinder was filed to the written statement of the Commissioners of the Port of Calcutta by the union.

6. Neither party adduced any evidence. The case was opened for the workman represented by the union by Sri Chakravarty, the Secretary of the union. In paragraph 7 of the union's written statement it is admitted that on 15th July, 1952 Sri Sen was appointed Literate Jamadar and in paragraph 7 of the written statement the union further admits that Sri Kartick Chandra was appointed Literate Jamadar on 24th June, 1953. The Secretary of the union submitted that the initial appointment as stated in paragraph 3 of the union's written statement of Sri Kartick Kumar Chandra as Ratman dated from 1st September, 1951 whereas the initial appointment of Sri Sudhangsu Kumar Sen as Lascar dated from 16th June, 1952 but both in the same scale of pay i.e. grade. On that basis, the Secretary of the union submitted that on 15th July, 1952 when Sen was appointed Literate Jamadar, Kartick Chandra was superseded and that on 1st April, 1963 when both Sri Sen and Sri Chandra were Literate Jamadars, Sri Chandra was superseded by Sri Sen when Sri Sen was appointed as a Lower division clerk while Sri Chandra was appointed as Junior clerk. The Secretary also submitted that having regard to the length of the service Chandra, having had been appointed on 1st September, 1951 in the identical scale of pay with Sri Sen, who was appointed in the same scale of pay on 16th June, 1952, there was first supersession when there was the appointment of Literate Jamadar on 15th July, 1952, when instead of Sri Chandra, Sri Sen was appointed Literate Jamadar while Chandra was appointed Literate Jamadar on 24th June, 1953 about a year after the appointment of Sen as Literate Jamadar. Having regard to the seniority in the identical scale of pay of Chandra with reference to his length of service in the scale of pay being greater than that of Sri Sen, the claim of Chandra for being appointed as Literate Jamadar on 15th July, 1952 was superseded when Sen was appointed Literate Jamadar. As there had been supersession in disregard of the seniority with reference to the length of service of Chandra at the time of appointment of Sen as Literate Jamadar on 15th September, 1952, the appointment of Lower division clerk of Sen on 1st April, 1963 in preference to Sri Chandra had similarly affected the claim of Sri Chandra for such appointment on the basis of his overall seniority with reference to his length of service even though Sen was apparently appointed as Literate Jamadar on 15th July, 1952, i.e. only about a year earlier before Sri Chandra was appointed as Literate Jamadar. There had been denial of his right to promotion to the post of Literate Jamadar to Sri Chandra on 15th July, 1952 when his junior Sri Sen was appointed Literate Jamadar. That supersession continued even when there was promotion from the post of Literate Jamadar to the post of a Lower division clerk of Sri Sen on 1st April, 1963 in preference to Sri Chandra, who was promoted as a Junior clerk instead of a Lower division clerk. The Secretary of the Union submitted that the Labour Adviser and Industrial Relations Officer of Kartick Kumar Chandra by Sudhangsu Kumar Chandra objected against that seniority list and that such objection was neither enquired into nor replied to. But it is stated in that very paragraph 5 of the union's written statement that when the union took up the case of supersession, the seniority list was amended and the amended list was shown to Chandra. The Secretary of the union, however, did not submit as to whether any objection was taken either by the union or by the workman when the amended seniority list was made and circulated by the Commissioners of the Port of Calcutta.

7. Now, if the seniority list of 1953 was amended to the knowledge of the union and the workman Kartick Kumar Chandra, what was the position in between Chandra and Sen in the amended seniority

list and when such amended seniority list was prepared, circulated and shown to Kartick Chandra had not been stated by the union in its written statement, not only in paragraph 5 of such statement but nowhere else in the entire written statement. But it is stated in paragraph 6 of the written statement that on 15th July, 1952 Sen was Literate Jamadar while in paragraph 7 of the statement it is stated that on 24th June, 1953 Chandra was the Literate Jamadar. From these two paragraphs it appears that Sen was promoted to the post of Literate Jamadar on 15th July, 1952 whereas Chandra was promoted to the post of Literate Jamadar on 24th June, 1953. Certainly, therefore, the seniority amongst the Literate Jamadars, particularly in between Sen and Chandra in the seniority list prepared by the Commissioners of the Port of Calcutta vide Health Officer's letter No. HC/EST/9, dated 7th November, 1958 which was shown to Chandra on 4th December, 1958 on circulation must have had shown Sen, appointed as Literate Jamadar on 15th July, 1952, as senior to Chandra who was appointed Literate Jamadar on 24th June, 1953. The Secretary of the Union referring to paragraph 5 of the written statement submitted that there was an objection to such seniority list by Chandra which was neither enquired into nor replied to by the Commissioners. But the Commissioners in their statement of case, paragraph 5(ii), clearly stated that no objection as alleged or at all was received by the Commissioners from him, meaning Kartick Kumar Chandra, the workman but only Sri Monoranjan Chakravorty and Sri Sachindra Nath Banerjee, Literate Jamadars had submitted their objections which were duly enquired into. The amended seniority list were at the relevant time shown to all the Literate Jamadars including Sri Kartick Kumar Chandra. This statement of the Commissioners of the Port of Calcutta is borne out by the admission made by the Union in paragraph 5 of its written statement where it says, "later when the union took up the case of supersession the seniority list was amended and the amended list was shown to Sri Chandra". Therefore the 1958 seniority list, upon objections by two Literate Jamadars only i.e. Monoranjan Chakravorty and Sachindra Nath Banerjee, was amended, as stated by the Commissioners of the Port of Calcutta in paragraph 5(ii) of its written statement, but no objection was raised by Kartick Chandra to the list as prepared in 1958. The union claims in paragraph 5 of its written statement that it raised objection against the supersession meaning the seniority list as prepared in 1958 and on its objection seniority was amended and shown to Chandra (paragraph 5 of union's written statement). So, seniority list of 1958 was admittedly amended on objection by two literate Jamadars and also by the union with the knowledge of Sri Chandra and the Union.

8. Now, from 1958-59 nearabout five years elapsed i.e. since the publication of the amended seniority list when on 1st April, 1963 Literate Jamadar Sen was promoted to the post of Lower Division clerk in supersession, as alleged, by Sri Chandra. The Union stated in paragraph 9 of its statement that the union took up the matter of supersession of Chandra when Sen was appointed lower division clerk in preference to Chandra on 1st April, 1963 with the Chief Medical Officer. The Chief Medical Officer by his letter referred to in the written statement in paragraph 9 informed the union on 10th July, 1964 that the adjustment of Jamadar and Literate Jamadar as lower division clerk is to be made strictly in order of seniority. The Commissioners in paragraph 5(ii) of their statement of case stated that in the case of the Health Section of the Chief Medical Officer's department, the seniority list were prepared and first circulated amongst the members of the staff of the section. These lists were later forwarded to the Commissioners' Secretary and finalised. The Commissioners' difficulty about the seniority of Literate Jamadars

was also resolved on the basis of the total length of service in the grade of Literate Jamadars. The seniority list of 1958 and amended seniority list relating to Literate Jamadars as mentioned in paragraph 5 of the Union's written statement and paragraph 5(ii) of the written statement of the Commissioners for the Port of Calcutta, were prepared long after the appointment of Sri Sen and Sri Chandra as Literate Jamadar on promotion on 15th July, 1952 and 24th June, 1953 respectively. There was an objection to the seniority list of the Health section as mentioned in paragraph 5 of the union's statement and paragraph 5(ii) of the Commissioners' statement except that the objections to such list were only lay two Literate Jamadars but not Sri Chandra and those objectors were Sri Chakravorty and Sri Banerjee as mentioned in paragraph 5(ii) of the written statement of the Commissioners for the Port of Calcutta. Both the union and the Commissioners of the Port of Calcutta in paragraph 5 and 5(ii) of their respective written statements admit that the amended list, I mean the seniority list, that means the list prepared in 1958, and later on amended, were finalised and were shown to Sri Chandra. I have pointed out that the union did not state anywhere in its written statement as to whether when Chandra saw the amended list he raised any objection. Therefore, having regard to law of pleadings the admitted position is that according to the seniority list of Literate Jamadars, the date of appointment in the post of Literate Jamadar of Sen was on 15th July, 1952 whereas the date of appointment of Sri Chandra was 24th June, 1953. The Commissioners of the Port of Calcutta in paragraph 5(ii) of its written statement stated that the difficulty about the seniority of Literate Jamadars was also resolved on the basis of total length of service in the grade of Literate Jamadars. Sri G. V. Karlekar, appearing for the Commissioners of the Port of Calcutta, submitted that the initial appointment to the post of Literate Jamadars of Sri Sen and Sri Chandra, being on 15th July, 1952 and 24th June, 1953 respectively had to be reckoned in the matter of promoting Sen and Chandra to the posts of Lower division clerk and Junior clerk respectively since the total length of service in the grade of Literate Jamadars in case of Sen was greater than that of Sri Chandra by nearly about a year. He further submitted that the 1958 seniority list of Literate Jamadars and the amended list that was finalised had never been challenged when shown to Sri Chandra. So, the position was that when on 1st April, 1963 the question of promotion of Literate Jamadars to the posts of Lower division clerks and Junior clerks arose. Sen having had longer period of service in the grade of Literate Jamadar had to be preferred being senior to Chandra, for appointment as a Lower division clerk while Chandra was adjusted in the post of a junior clerk. In reply, the Secretary of the Union submitted that at the time of promotion of Sen to the post of Literate Jamadar the Commissioners of the Port of Calcutta had admitted in paragraph 4(ii) of its written statement that there had been supersession of a number of staff senior to Sri Chandra on the basis of first appointment when adjustment of Sri Chandra as Literate Jamadar had to be made in 1952, and that if such supersession had not also taken place in 1952 when Sen was appointed Literate Jamadar in preference to Chandra, Chandra would have been senior as he had been appointed in the identical scale of pay as that of Sen initially on 1st September, 1951 while Sen was appointed initially on 16th June, 1952. Sri Karlekar on behalf of the Commissioners in reply stated referring to paragraph 4(ii) of the Commissioners' statement to which no rejoinder had been filed by the union that in 1951, 1952 and 1953 a number of staff of the Health Section were transferred to the Traffic department and other departments of the Commissioners on various dates and in their places other staff of the Health section were adjusted

as Literate Jamadars as and when such staffs were transferred and that there were no record to show why the seniority of staff was not followed, while adjusting of staff was made as Literate Jamadars. But he submitted that the seniority list of Literate Jamadars and other staff of Health Section had been prepared in 1958 and that from amongst the Literate Jamadars and all other staff of the Health Section, objections to the said seniority list were invited and were heard and enquired into and that the final seniority lists were prepared and shown to all members of the staff of the Health Section including Chandra and the union. The final list of seniority of Literate Jamadars including the names of Chandra and Sen was published and there had been no objection to such list till upto the date when the question of promoting to the post of lower division clerk from amongst the Literate Jamadars arose on 1st April, 1963. Sri Karlekar submitted further that as there had been large scale transfer of staff from the Health Section to other Sections and other departments of the Port Commissioners in 1951, 1952 and 1953, from amongst the remaining staff of the Port Commissioners in the Health Section appointments had to be made in the post literate Jamadars depending on the exigency of the situation. Accordingly, in 1952 Sen was appointed Literate Jamadar, although there might have been some violation of the seniority rule in regard to the staff of Health section when Literate Jamadars had to be appointed for large scale transfer of staff from the Health section in those years. He, however, categorically submitted that if after the seniority list of Literate Jamadars prepared in 1958 that was later on amended and shown to Sri Chandra and other members of the staff on being finalised had not been objected to either by the union or by Sri Chandra right upto April, 1963, when according to the amended seniority list Chandra was junior to Sen in the grade of Literate Jamadars in 1st April, 1963, the belated objection of the Union, that had chandra been not superseded when Sen was appointed Literate Jamadar on 15th July, 1952 and was appointed as Literate Jamadar instead of Sen, Chandra would have been senior to Sen on 1st April, 1963 wherefore Chandra would have the lawful claim for appointment to the post of lower division clerk in preference to Sen on 1st April, 1963, could hardly be tenable. He pointed out that if the seniority list finalised to the knowledge of the union and Chandra in 1958-59 was to be amended at present, there would be serious dislocation in the matter of seniority of Literate Jamadars Lower division clerks and junior clerks in the Health Section of the Commissioners of the Port of Calcutta and that its impact would certainly reflect on other sections and lower division clerks as well. There would be thus no finality in seniority list which had been duly published with notice to all concerned after considering the objections to the list that was first prepared and objected to by two Literate Jamadars as well as by the union. Sri Karlekar also pointed out that as the seniority list stood on being finally published after 1958, there was no violation of seniority rule when the senior Literate Jamadar Sen was promoted, in preference to his junior Sri Chandra. Literate Jamadar, to the post of Lower division clerk, and Chandra was adjusted to the post of a junior clerk.

9. The Secretary of the Union submitted that on the date of appointment of Sri Sen to the post of lower division clerk the length of service of Sri Sen from the date of his initial appointment to the date of his appointment as Lower division clerk was lesser than that of Sri Chandra, and that on that account also having regard to the total length of service from the date of initial appointment in the same scale of pay of both Chandra and Sen irrespective of their respective appointment on promotion to the posts of Literate Jamadar. Chandra should have been preferred as senior to Sen since his total length of service on 1st April 1963 was greater than that of Sri Sen. Sri Karlekar, however, pointed out that the Commissioners' assertion in paragraph 5(ii) of their written statement reading as "The difficulty about the

seniority of Literate Jamadar was also resolved on the basis of the total length of service in the grade of Literate Jamadar' had not been controverted by any rejoinder filed by the union. The Secretary of the Union did not object to the principle to be followed in the promotion of Literate Jamadars to the posts of Lower division clerks and Junior clerks in terms of the agreed list formally arrived at between the Port Commissioners and the union as referred to in paragraph 2(b) (i) & (ii) and the Resolution No. 1305 of 1963. The Secretary's objection was on two counts, firstly, while promoting Sen to the post of Literate Jamadar, Chandra was superseded and, secondly, had that supersession been not effected Chandra would have been appointed Literate Jamadar on 15th July 1952 when in terms of the agreement referred to in paragraph 2(b)(i) of the Port Commissioners' written statement, Chandra would have been appointed Lower division clerk on the basis of his seniority as a Literate jamadar in preference to Sri Sen. Apparently, having regard to the fact that the Port Commissioners in their statement of case submitted that in 1951 to 1953 when large scale transfer from Health section were affected and Sen was appointed Literate jamadar there had been cases of supersession, the Secretary's contention regarding Sen superseding Chandra at the time of Sen's appointment as Literate Jamadar is very attractive. Sri Karlekar has, however, submitted that how Sen and Chandra were preferred to others in the same scale of pay when they were each appointed Literate Jamadar, there was no record therefor in the department. The Commissioners for the Port of Calcutta on 9th April 1959 (Health Officer's office) published the seniority list of class III employees, filed by the Union as an Annexure to its written statement and it would show that Sudhangsu Kumar Sen at first appointment was lascar was on 15th January 1952 and was post of Literate Jamadar on 11th July 1952. Sachindra Nath Banerjee first appointed as Sweeper on 6th July 1948 was adjusted as Sweeper on 6th July 1948, on a substantive post as Sweeper, confirmed as Mate on 6th July 1949, and was made Literate Jamadar on 11th December 1952. Monoranjan Chakravarty was appointed as Mathor on 10th October 1947, adjusted as Mathor on 10th October 1947, confirmed in the post of Mate on 1st December 1948 and was made Literate Jamadar on 11th January 1953. Kartick Kumar Chandra, Ratman, appointed on 1st September 1951, adjusted in the substantive post of Oilman on 1st September 1952, confirmed as Oilman on 26th February, 1952, appointed Literate Jamadar on 24th June 1953. Bhupan Chandra Das, Mathor appointed on 26th October 1948, adjusted in the continuous service as Mathor on 26th October, 1948, adjusted in the substantive post of Mathor on 26th October 1948, subsequent designation Mate on promotion on 1st December 1949, working in office as Jamadar on 10th October 1957 confirmed on 3rd December 1958. Bhupesh Chandra Vaccinator was appointed on 15th November, 1944, adjusted as a vaccinator on 15th November, 1944 in the substantive post, confirmed in the post on 15th September 1947, appointed Jamadar on 3rd December 1958. So, it is clear from this seniority list, that after 1958 list was circulated in 1958 Monoranjan Chakravarty and Sachindra Nath Banerjee ga . . . objection and the final seniority list was prepared on 9th April 1959 and was shown to Chandra. Sri Karlekar's statement that there had been supersession in 1952 and 1953 when Sudhangsu Kumar Sen and Kartick K. Chandra were appointed Literate Jamadar on 11th July 1952 not on 15th July 1952 (vide Seniority list Annexure to Union's written statement), and on 26th April 1953 respectively would appear from this list of 9th April 1959 filed by the union, and the persons involved were Sachindra, Monoranjan Kartick vis-a-vis Sen, Bhupan, Bhupesh and Paresh Pande. Long before those persons were appointed either as a Jamadar or a Literate Jamadar, both being eligible in terms of the agreement referred to in paragraph 2(b) (i) and(ii) of the Port Commissioner's written statement

for appointment as a Lower division clerk or a Junior clerk, as the case may be, Sudhangsu Sen was appointed Literate Jamadar on 11th July 1952 (see Seniority list 1959) so also Chandra on 26th April 1953. Sri Karlekar's submission, in consonance with paragraph 5(ii) of the Commissioner's written statement to which no rejoinder was filed, that large scale transfers from time to time from the Health Section of the Port Commissioners necessitated appointment of Literate Jamadars on supersession from amongst the staff holding posts of different designations in the same scale of pay and that might have been for some administrative reasons, finds support from the amended Seniority List of 1959. The Secretary of the union was asked to enlighten the tribunal whether in case of Sudhangsu Sen's appointment as Literate Jamadar on 11th July 1952 by the then authority in the Health section in preference to all those persons mentioned above who were senior to Sen, counting their length of service in the same grade from the date of first appointment in Health section there was any malafide or victimisation or unfair labour practice indulged in by the authority the then in office of the Health Section who was competent to appoint Sen as Literate Jamadar in preference to Chandra and others mentioned above, who were senior to him drawing pay in the same scale with diverse job designations. The seniority list would show, published in April 1959, i.e. the final list, that in the gradation ladder Literate Jamadar Sen was on the 51st serial while Sachindra N. Banerjee, Monoranjan Chakravarty, Nagendra N. Bhattacherjee and Kartick Chandra were on the serial Nos. 52, 53, 54 and 55 respectively, so also Bhuban Chandra Das, Bhupesh Cha. Chakravorty, Paresh Pande on 56, 57 and 58 respectively. This list would show that in 1959 Literate Jamadar Sen was senior to those persons in the list and that was the final list as submitted by Sri Karlekar to which the Secretary could not make any contrary submission. The Secretary in his submission, however, had to admit that there is no pleading in the written statement filed by the Union that the authority that had appointed Sen, in preference to all those persons named above, who according to the length of their service, dating from their initial appointment in the same scale as of Sen, were apparently senior to Sen, had indulged in malafides against all those that were superseded, or that had indulged in unfair labour practice as against all those who were apparently superseded or that had indulged in victimisation of those that had been apparently superseded. There is no case in the written statement of the union that all those persons whose names I have mentioned with reference to the seniority list of 1959 filed by the union as an Annexure to its written statement had been the subjects of malafides of appointing authority or had been victimised otherwise by the appointing authority or had been affected by the unfair labour practice, while appointing in preference to all those persons named above in the seniority list, Sen as Literate Jamadar on 11th July 1952. The union is espousing, as it appears from the written statement, only the case of Kartick Chandra but not all those who were apparently superseded, if regard be had to the dates of their first appointment of those in the Health Section in the scale of pay to which, from Sen to Pande, Sl. 51 to 58 of the seniority list of 1959, had been appointed with diverse job designations as in the list.

10. Now, if the promotion of Sen to the post of Literate Jamadar is to be interfered with by the tribunal, then as Sri Kadlekar submitted, the cases of all other persons mentioned above were required to be reviewed, so much so that there would be a cause for an industrial unrest instead of industrial peace amongst all those persons mentioned above who had, on seeing the final seniority list, raised no objection not to speak of the union, for all those persons for all these years from 1950 to 1971 when the reference was made to this tribunal by the Central Government on 20th August, 1971.

11. The second branch of contention of the Secretary of the Union was as I have pointed out, could be rationally accepted if I could interfere with the seniority list of 1959 that remained unchallenged from 1959 April to August, 1971 when this reference was made regarding the case of only Kartick Kumar Chandra espoused by the union that had not considered the cases of apparent supersession of all those persons mentioned earlier with reference to the seniority list of 1959, filed as an Annexure by the union itself. In its written statement the union did not challenge the correctness and bona fides in the making of the amended seniority list i.e. list of 1959. On the basis of the seniority list of 1959 amongst the Literate Jamadars promotion to the posts of Lower division clerks and Junior clerks had to be made by the authorities of the Port Commissioners on 1st April 1963. The Secretary of the Union did not submit before me that in preferring Sen as literate jamadar being senior to Kartick Kumar Chandra, on the basis of the seniority list of 1959, filed as an Annexure to their written statement by the union, there had been any violation of the seniority rule. From the written statement of the union also, the Secretary of the union could not point out that the union had pleaded either malafides or victimisation or unfair labour practice in the appointment of Sen senior to Chandra, as a Lower division clerk, and appointment of Chandra as Junior clerk. The Secretary did not submit that in preferring Sen to Chandra in the appointment of lower division clerk, there was any violation of the agreement as mentioned in paragraph 2(b)(i) and (ii) of the Commissioners' written statement. The Secretary, however, submitted that in the prayer portion of the written statement of the union it had stated that in the circumstances stated in the written statement, the tribunal should answer the issue referred to for adjudication in favour of Sri Kartick Kumar Chandra and award Kartick Kumar Chandra the relief of promotion retrospectively by holding his supersession to be illegal, unjustified and malafide. But nowhere any circumstance was pleaded in the written statement of the union, i.e. the factual circumstance, indicating thereby malafides or victimisation or unfair labour practice in the appointing authority either when Sen was promoted to the post of Literate Jamadar on 11th July 1952, or when Sen was promoted to the post of lower division clerk on 1st April 1963. Malafides, victimisation or unfair labour practice are matters of fact. If anybody pleads malafide, victimisation or unfair labour practice, he is to plead the facts and circumstances in its statement of case upon which malafide, etc. could be grounded. The party opposing such statement is either to admit or deny specifically by pleading the facts counteracting such malafides or victimisation or unfair labour practice. Thereupon, an issue of fact would arise as to whether under the factual circumstances, as pleaded by the parties to an adjudication proceeding, there was either malafides or victimisation or unfair labour practice in the appointing authority amongst anyone of it, indulged in by the while the appointing authority amongst many of the same cadre to a higher cadre-post preferring that promotee to other eligibles in the lower cadre. Upon such an issue evidence to be adduced by parties would be relevant and such evidence the tribunal is to find proved circumstances of the case, that there had been malafides or victimisation or unfair labour practice in the appointing authority while appointing one amongst many from the lower cadre post to a higher cadre post superseding the claims of other eligibles in the lower cadre. In that event, only the tribunal may have to interfere with the dispute over a promotion matter.

12. Now, the question arises whether on the facts in pleadings an issue of fact on the question of malafides or victimisation or unfair labour practice affecting Kartick Chandra in the matter of promotion of Sen

in preference to Chandra to the post of Literate jamadar and subsequently to the post of lower division clerk could arise merely on the mention of an word 'malafile' in the prayer portion of the union's written statement. I am sorry, that the law would not permit such an issue of fact to be raised on the pleadings before this tribunal. So, no evidence on such an issue would be relevant and admissible. The Secretary did not dispute in his submission before me that in following the seniority list of Literate Jamadars 1959 List there was any irregularity or illegality while Sen senior to Kartick Chandra in the seniority list of Literate Jamadars was appointed to the post of Lower division clerk. I have already pointed out that the Secretary of the union first attacked the promotion of Sen to the post of Literate Jamadar in preference to Chandra and submitted that if that promotion could be interfered with, then Sen would have been junior to Chandra on 1st April 1963 having regard to the total length of his service in the scale of pay to which both were initially appointed, and that in that event Sen ought not to have been appointed lower division clerk in preference to Chandra. The tribunal cannot, as the law stands, interfere with the seniority list of 1959 where Sen is shown senior to Chandra as Literate Jamadar nor can it undo the promotion of Sen from the post of a Ratman to that of Literate Jamadar as there is no pleading of malafiles, etc., as I have already pointed out in the written statement of the union. Moreover, as the law stands, I cannot permit myself to interfere with the seniority list of 1959, and cannot set aside the promotion of Sen to the post of Literate Jamadar and thereafter to the post of lower division clerk, when in the written statement of the union, there is no factual assertion of malafiles or victimisation or unfair labour practice in the appointing authority while promoting Sen to the post of Literate Jamadar, and again to the post of lower division clerk respectively in preference to Chandra. on both the occasions.

13. The law is now well settled on this score. In the case of Mahendralal vs Hindustan Steel Limited, Bhilai Steel Project (by General Manager), and another, reported in 1969 I LLJ, page 73, their Lordships of the Division Bench of the Madhya Pradesh High Court had copiously referred to and relied on the decisions of the Supreme Court of India in the case of Brooke Bond (India) (Private) Limited, vs their workmen, 1963 I LLJ page 256 and 1966 I LLJ, page 402 and laid down the content and scope of jurisdiction of a Labour Court and an Industrial Tribunal in interfering with the question of promotion of employees of industrial establishments. In Brooke Bond's case (1963 I LLJ page 256) their Lordships of the Supreme Court laid down, "Thus, though promotion is normally a function of the management, if it appears to the tribunal to which a dispute as to failure of the employer to promote a senior employee is referred, that in promoting another employee in preference to the senior employee, the management has been actuated by considerations other than on merits or that the failure to promote the eligible person who is senior in service amount to an unfair labour practice, the tribunal would be justified in interfering with the order made. But in the absence of malafiles, normally it must be left to the discretion of the management to decide which of the employees should be selected for promotion at a given time subject of course to the above formula. "In Brooke Bond's case reported in 1966 I LLJ, page 402, their Lordships of the Supreme Court observed, "Generally speaking promotion is the management's function; but it may be recognised that there may be occasions when a tribunal may have to interfere with promotions made by the management where it is felt that the persons superseded have been so superseded on account of malafiles or victimisation. Even so, after a finding of malafile or victimisation it is not the function of the tribunal to consider the merits of the various employees itself and then decide whom to promote or whom not to promote. If industrial tribunal finds that promotions have been made which are unjustified on the ground of malafiles

or victimisation, the proper course for it to take is to set aside the promotions and ask the management to consider the cases of superseded employees and decide for itself whom to promote, except of course the person whose promotion has been set aside by the tribunal". Quoting those two observations of their Lordships of the Supreme Court, Madhya Pradesh High Court observed at page 79 of the Report, "The Labour Court, in transgression of these settled principles, tried to interfere with a fair and just decision of the management. Thereby, it usurped a jurisdiction which it did not possess". In that case the question of seniority in terms of certain circular of the Bhilai Steel Project had to be construed by the Labour Court. The circular of the General Manager as quoted in page 80 of the Report was "Seniority shall be fixed strictly in accordance with date of joining of an employee in a particular category or cadre". In that case the Industrial Court interpreted that the temporary promotion of the employee concerned in an officiating capacity made on ad hoc basis would be counted in determining his seniority in the cadre of Section Assistant. In that context their Lordships of the Madhya Pradesh High Court observed at page 80, "The temporary promotion of a person to a post in a higher cadre in an officiating capacity, is not tantamount to his appointment in a particular category or cadre within the meaning of the circular. Such a temporary appointment confers on him no right to that post. It, therefore, follows the appointment of the petitioner to the cadre or section assistant was on 20th September, 1958, when he, along with 33 other upper division clerks, was first promoted as section assistant, the Labour Court acted illegally or with material irregularity in not adhering to the basic principles". In that case the Labour Court misconstrued the circular and revised the seniority list on a wrong interpretation of the Circular in case of the employee who claimed that he had been superseded. The Madhya Pradesh High Court found that the Labour Court from whose decision there was revision to the Industrial Court under the Madhya Pradesh Industrial Relations Act disregarded the relevant circular of Bhilai Steel Project that the seniority shall be fixed strictly in accordance with the date of joining an employee in a particular cadre or category. At page 79 of the Report their Lordships of the Madhya Pradesh High Court observed: "The first question regarding jurisdiction of the Labour Court is inter-linked with the second question regarding the constructions of the different circulars Normally in dealing with dispute as to promotion, however, anxious industrial adjudication may be, regard must always be had to the fact that in matters promotion discretion has primarily to be left to the employer. In that context their Lordships quoted the two decisions of the Supreme Court in the two Brooke Bond cases from which I have extracted the relevant observations. In Brooke Bond case reported in 1966 I LLJ page 402, the Supreme Court made it abundantly clear that supersession in a promotion case could be interfered with by an industrial tribunal only when there was malafile or victimisation. After it is found that there has been malafiles or victimisation affecting the superseded employee, then the promotion of the promotee employee would be set aside and the management should be left with the direction that it should according to the rules in force, consider all the cases of eligibles for promotion to a particular post. In absence of pleading and proof of malafiles, on victimisation or unfair labour practice, or any of those the tribunal has no jurisdiction either to interfere with the seniority list or to set aside a promotion, and appoint in place of the promotee, the superseded employee who claims that he had been superseded in preference to the promotee. Now, if in the case of a promotion, an eligible employee has been superseded in preference to the promotee by the management and if such decision is fair and just, the tribunal cannot interfere with such promotion. In a recent case, B. A. Nigam, Petitioner vs The Registrar of High Court of Madhya Pradesh, Jabalpur and others, reported in

1972 L.I.C., Volume 5, Part 49, page 95, the Madhya Pradesh High Court had to deal with the case of supersession of a Civil Judge to the post of Additional District and Sessions Judge. The petitioner, a Civil Judge in the Madhya Pradesh called in question the promotion of 40 Civil Judges to the post of Additional District and Sessions Judges on the ground that Civil Judges junior to him in the cadre were promoted under the circumstances in which his claim for such promotion was not considered. The direction of their Lordships was given in paragraph 23 of the Judgment at page 105 of the Report. The Madhya Pradesh High Court was Respondent No. 1 and the Madhya Pradesh Government was Respondent No. 2 in that case. Their Lordships observed, "The Respondents 1 and 2 shall be required to consider the claims of the petitioner for promotion whenever, after November 30, 1968, the claims of those junior to him in the cadre of Civil Judges were considered for promotion. If he is found fit for promotion, the promotions made on those occasions shall be reviewed and the petitioner shall be given his relative seniority in the cadre of Additional District and Sessions Judges on that basis. The respondents 1 and 2 shall also consider what other consequential benefits should be allowed to him". So, the law as laid down in Brooke Bond case 1966 I LLJ page 402, supra, and in Nigam's case 1972 L.I.C.'s that if there had been supersession in the matter of promotion of Sen in preference to Chandra on the ground of malafides or victimisation or unfair labour practices operating as against Chandra while Sen was appointed Literate Jamadar and subsequently as Lower division clerk by the appointing authority, the promotion of Sen to the post of Literate Jamadar and subsequently to the post of Lower division clerk shall have to be set aside and the management shall have to be directed to take into consideration cases of all those persons who on 11th July, 1952, were eligible for promotion as Literate Jamadars from the scale of pay to which Sen and Chandra and those others were appointed, with diverse designations in the Health section of the Port Commissioners. The management shall have to be directed to consider that after considering the eligibility of all those on 11th July, 1952 for promotion to the post of Literate Jamadars, those found fit by the management under the Rules, should be appointed on and from that date. Thereafter on 1st April, 1963 having regard to the seniority amongst the Literate Jamadars the management shall have to consider the eligibility of those amongst the Literate Jamadars fit under the Rules for promotion to the post of Lower division clerks. The tribunal cannot usurp the jurisdiction of the management. The tribunal can only direct the management to follow the seniority rule and review the entire case of promotion on 11th July, 1952 of all eligibles to the post of a Literate Jamadar and to review all cases of those eligible for promotion on 1st April, 1963 to the posts of Lower division clerks. The tribunal cannot set aside the seniority list and appoint on and from 11th July, 1952 Chandra as a Literate Jamadar and then on 1st April, 1963 as a Lower division clerk. This function is entirely of the management. But the moot question would be whether on the pleadings an issue could be raised regarding the malafides or victimisation or unfair labour practice indulged in by the respective appointing authority while promoting Sen to the post of Literate Jamadar and Lower division clerk in preference to Chandra and not only Chandra but others as mentioned above. But there is not a whisper even in the written statement of the union relating to the factual circumstances alleging either malafides or victimisation or unfair labour practice or all those in the relative appointing authority when Sen was promoted to the post of Literate Jamadar and later on to the post of Lower division clerk in preference to Chandra. Therefore, as laid down by the Supreme Court in the Brooke Bond cases from which I have extracted the relevant observations, this tribunal cannot, within the scope of the pleadings, raise an issue as that of malafides or victimisa-

misation or unfair labour practice as already observed nor can it allow the union to lead evidence on such a question. As there was no factual assertion of circumstance relating to malafides or victimisation or unfair labour practice in the union's written statement, the Commissioners for the Port of Calcutta in their written statement had no occasion for traversing any such fact as being not relevant to the circumstances stated in the written statement filed by the union for the workman. I wonder how can the union espouse only the case of one workman when the seniority list of 1959 made Annexure to the Union's written statement would show that in 1952 when Sen was appointed Literate Jamadar many amongst those in the same scale of pay with Sen who had entered service long before Sen had entered as a lascar, had not been preferred to Sen, when Sen was appointed Literate Jamadar on 11th July 1952. The seniority list of 1959 also shows that Chandra superseded many senior to him when appointed Literate Jamadar 24th June, 1953. I wonder why the union espousing the case of Chandra had not challenged the Sen's promotion to Literate Jamadarship as having had been affected by the appointing authority's malafides or victimisation or unfair labour practice operating as against Chandra as well as against others senior to Sen on the score of their total length of service in the same scale of pay and as such eligible for such promotion as contended by the Secretary. The Secretary of the union during the discussion on the point of law, and on the absence of pleading in the union's statement of case on the factual circumstances relating to malafides or victimisation or unfair labour practice having had been indulged in by the relevant appointing authorities, submitted that he would not produce any evidence as the reference was pivoted only upon a case that Sen's appointment as Literate Jamadar and Lower division clerk in preference to Chandra on 11th July, 1952 and 1st April, 1963 respectively was affected by the appointing authority's malafide or victimisation or unfair labour practice operating as against Chandra to the benefit of Sen when the union had not pleaded such a case in its written statement. The Secretary, however, submitted that he would not question the law as has been laid down by their Lordships of the Supreme Court and Madhya Pradesh High Court. He also submitted that on the case as made in the written statement and on the submission he made before the tribunal, if law as laid down by the Supreme Court and the Madhya Pradesh High Court stood in the way, he had nothing to complain. Thus, upon the argument advanced by the Secretary on the pleadings as well as by Sri G. V. Karlekar, and on the Annexure, which I have referred to filed along with the written statement of the union, there can be no escape from the conclusion that as Sen's promotion to Literate Jamadarship by the appointing authority was neither malafide nor a case of victimisation or unfair labour practice, this tribunal cannot set aside such promotion. The seniority list of 1959 that was accepted both by Chandra and by the union made Sen senior to Chandra as a Literate Jamadar. On 1st April, 1963, when senior Sen was appointed as a Lower division clerk, there was no violation of the seniority rule. There was no malafides or victimisation or unfair labour practice when senior Sen was first appointed Literate Jamadar and then appointed Lower division clerk in preference to Chandra now working as junior clerk. The ground on which this reference has been made before this tribunal could have been adjudicated in favour of Chandra if the union had pleaded in its written statement that when Sen was appointed Literate Jamadar in preference to Chandra, the appointing authority acted malafide against Chandra and/or it was a case of victimisation or indulgence in unfair labour practice against Chandra by such authority. In regard to the seniority list of 1959 i.e. revised list there is no pleading by the union that when the revised seniority list of 1959 was finally published and accepted by all Literate Jamadars including Chandra in 1959, there was malafide or unfair Labour practice or victimisa-

tion against Chandra in the preparation of the seniority list wherefor such seniority list could be on proof of malafides or victimisation interferred with by the tribunal upon an issue raised on that point on the union's making such a case in the written statement when the Commissioners of the Port of Calcutta could either deny or admit such assertion. Therefore, there is no case of the union before this tribunal that when Sen was appointed Literate Jamadar in preference to Chandra, the appointing authority acted malafide or was guilty of victimisation or unfair labour practice affecting Chandra nor is there any such case that while publishing the final seniority list in 1959 the authority that published the list that means the Secretary of the Commissioners of the Port of Calcutta in 1959, acted malafide or indulged in victimisation or unfair labour practice affecting Chandra. There is no case that while appointing Literate Jamadar Sen senior to Chandra as appearing in the Seniority list of 1959, as Lower division clerk on 1st April, 1963, the appointing authority acted malafide or was guilty of victimisation or unfair labour practice as against Chandra. So, the reference as now appearing for adjudication before this tribunal cannot be answered in favour of the workman whose case is being espoused by the union.

14. In the circumstances reviewed above, the tribunal holds that the appointing authority was justified in promoting Sri Sen to the post of Literate Jamadar on 11th July, 1952 and thereafter in promoting Sri Sen to the post of Lower Division clerk on 1st April, 1963 superseding on both occasions the alleged claim of the workman Chandra, junior to Sen in the seniority list of 1959 relating to Literate Jamadar. The promotion of Sri Sen on both occasions being just and fair cannot be interfered with by this Tribunal.

In the result the reference is rejected.

This is my award.

(Sd.) S. N. BAGCHI
Presiding Officer.

Dated, the 2nd August, 1972.

V. SANKARALINGAM, Under Secy.

MINISTRY OF EXTERNAL AFFAIRS

New Delhi, the 8th June 1972

S.O. 2415.—The following bye-laws made by the Haj Committee, Bombay, under sub-section (1) of section 18 of the Haj Committee Act, 1959 (51 of 1959) to amend the Haj Committee Bye-Laws, 1966, and confirmed by the Central Government under sub-section (2) of that section, are hereby published as required by sub-section (3) thereof namely:—

1. **Short title.**—These bye-laws may be called the Haj Committee (Amendment) Bye-Laws, 1972.

2. **Amendment of bye-law 5.**—In bye-law 5 of the Haj Committee Bye-Laws, 1966 (hereinafter referred

to as the principal Bye-Laws), for clause (4), the following clause shall be substituted, namely:—

"(4) The Presiding Officer shall be responsible for preserving order at the meeting and may direct any member whose conduct is in his opinion disorderly and not conducive to the decorum of the meeting, to withdraw immediately from the meeting. Such member shall do so forthwith and shall absent himself during the remaining period of that meeting."

3. **Amendment of bye-law 14.**—In bye-law 14 of the principal Bye-Laws, in clause (v), the words and figure "on payment of a fee of Rs. 5" shall be omitted.
